

Environmental Policy

Commitment to Environmental Protection

Zenergy Asia Pacific Pty Ltd (Zenergy) is dedicated to conducting all business activities in a manner that prioritises environmental protection. This commitment is embedded within the organisation through the following principles and actions:

Continuous Improvement

We pursue ongoing enhancement in our environmental management and performance by setting clear environmental objectives and targets. These goals are designed to help Zenergy meet the commitments outlined in our Environmental Policy and drive continual improvement across all aspects of our operations.

Legal Compliance

Zenergy adheres to all relevant laws, regulations and statutory requirements concerning environmental matters. We ensure our practices align with the latest legislative standards to maintain compliance and uphold our responsibility to the environment.

Environmental Protection and Pollution Prevention

Protecting the environment is central to our approach, with a specific focus on preventing pollution. We address the unique environmental aspects and impacts associated with our activities and take all reasonable measures to avoid adverse effects.

Client and Contractual Requirements

We manage environmental issues and impacts in accordance with any client specifications and contractual obligations, ensuring our services meet or exceed expectations regarding environmental stewardship.

Waste Management and Pollution Control

Zenergy applies effective waste management principles throughout its operations. We are committed to taking practicable steps to prevent pollution, minimise waste production whenever possible, and employ suitable recycling processes to reduce our environmental footprint.

Environmental Management System

We develop, establish, assess and monitor an environmental management system to guide our approach to environmental protection. Qualified resources are allocated as required to ensure the effective implementation and ongoing improvement of this system.

Education and Training

Zenergy invests in the education and training of all team members to enhance their awareness, skills and knowledge related to environmental concerns, impacts and sustainable practices. We actively communicate identified opportunities for improvement and encourage continuous learning in this area.

Performance Monitoring and Communication

Environmental performance is regularly monitored and evaluated. We maintain effective communication channels regarding environmental issues to ensure transparency and foster ongoing improvement in our practices.

Reporting and Continual Improvement

We report on environmental performance, including any infringements or instances of regulatory non-compliance. A process of continual improvement is applied to address non-conformances and prevent future occurrences.

Support for Sustainable Initiatives

Zenergy supports environmentally friendly and sustainable development initiatives that reflect current, accepted technical, industrial and applicable processes.

We are committed to promoting practices that contribute to a healthier environment and sustainable future.

Policy Accessibility and Review

The Zenergy Environmental Policy is made available to all interested parties and the public. The policy is periodically reviewed to ensure its ongoing relevance, appropriateness and suitability for the organisation.

Responsibility and Community Impact

All Zenergy team members share the responsibility for adhering to the Environmental Policy. Team members are encouraged to consider the impact of their activities on the community and environment whenever representing the company.

Dean Woods, Director Zenergy Safety, Health and Wellbeing
