

Sustainability Policy

Commitment to Sustainability

Zenergy Asia Pacific Pty Ltd (Zenergy) is dedicated to enhancing the sustainability performance of the organisation. This is achieved by fostering a culture that values sustainability, ensuring operational practices minimise both environmental and social impacts, and supporting the integration of sustainability principles into all facets of teaching, learning, research, and community engagement.

Definition of Sustainability

Sustainability refers to the ability to fairly address the essential human needs of the present generation without jeopardising the capacity of future generations to meet their own needs. This is accomplished through the preservation and protection of ecosystems and natural resources within the area.

Our Commitments

- Promoting a culture that values sustainability and actively working to reduce Zenergy's ecological footprint.
- Embedding the principles and understanding of sustainability across training, development, research, operations, and community engagement activities.
- Incorporating sustainability performance as a key indicator alongside other organisational performance measures.

Actions to Achieve Our Commitment

- Ensuring that sustainability is integrated within the Zenergy Integrated Management System (IMS).
- Establishing a framework for sustainability reporting.
- Developing educational initiatives that foster sustainability within the organisation.
- Providing staff with training and support to adopt sustainability principles and practices, promoting lasting sustainable behaviour change in the workplace.
- Engaging in research activities that build and strengthen business partnerships focused on sustainable development.
- Collaborating with the community to address the needs for a sustainable future and to provide leadership in sustainability efforts.

Dean Woods, Director Zenergy Safety, Health and Wellbeing
