SUPPORTING OUR REGIONAL COMMUNITIES

When we take on a project, we don't just work for our Client, we work for the community.

Proterra Group have specialist personnel who deliver a range of civil design, engineering, and project management services who are focused on delivering fit for purpose solutions to regional Australia.

ABOUT PROTERRA GROUP

Established in regional Queensland in 2008, Proterra Group is proud of our history of **supporting and strengthening communities** across regional Australia.

We have over 80 employees and permanent offices in Toowoomba, Goondiwindi, Quilpie and multiple waste facilities we manage throughout regional Queensland.

Proterra Group has over 17 years of experience partnering with private clients, local governments, and regional councils to reduce project risk and deliver practical, on-time, and cost-effective outcomes. Our civil engineering team provides end-to-end project support — from detailed design and technical reporting to the delivery of civil infrastructure and environmental management solutions that strengthen regional communities.

CORE COMPETENCIES

Engineering options analysis on the following classes:

- Roads and traffic
- Wastewater infrastructure
- Water supply
- Stormwater infrastructure
- Parks and community facilities

Design of civil infrastructure including:

- Roads
- Wastewater infrastructure
- Water supply
- Stormwater infrastructure
- Parks and community facilities

Project management of the design and construction of;

- Culverts and bridges,
- Sealed and unsealed roads
- Rest area and road-side amenities
- Community buildings
- Water and wastewater infrastructure and reticulation
- Waste facility, weighbridge and transfer stations
- Parks, gardens, sporting fields and cemeteries
- Stormwater and flood mitigation infrastructure
