SUPPORTING OUR REGIONAL COMMUNITIES

Shortages of staff and excessive workload due to extraordinary occurrences like floods can place significant strain on resources.

Proterra Group can quickly mobilise trained personnel for your project and aid in Council's recovery.

ABOUT PROTERRA GROUP

Established in regional Queensland in 2008, Proterra Group is proud of our history of **supporting and strengthening communities** across regional Australia.

We have over 70 employees and permanent offices in Toowoomba and Goondiwindi, a site office in Quilpie and fifteen (15) waste facilities we manage throughout regional Queensland.

Proterra Group have delivered natural disaster recovery works since 2010, initially through the Natural Disaster Relief and Recovery Arrangements (NDRRA) and now through the Disaster Relief Funding Arrangements (DRFA).

CORE COMPETENCIES

Natural Disaster Recovery Projects

Damage identification and recording

Evidence verification

Funding submission development

Project close out

Procurement and project delivery

Project Management

Site supervision

Project management of the design and construction of;

- Culverts and bridges,
- Sealed and unsealed roads
- Rest area and road-side amenities,
- Community buildings,
- Water and wastewater infrastructure and reticulation,
- Waste facility, weighbridge and transfer stations,
- Parks, gardens, sporting fields and cemeteries and
- Stormwater and flood mitigation infrastructure.

WHY PROTERRA GROUP?

We share our knowledge & train people in the best practice.

10 sites across regional QLD with a commitment to using local suppliers & contractors.

Provision of high quality and extensive pick-up with maximisation of approved funding.

Emergent and REPA funding experts, focussed on Betterment & Resilience.

Years of experience with relationships with QRA from RLO's and GM's.

Experts at converting State Government funding to local community projects.

RELEVANT PORTFOLIO PROJECTS

Project Management of Natural Disaster Recovery operations for Goondiwindi Regional Council.

Value: \$80M+ (2010-2022)

- Gavin Williams, Regional Liaison Officer (QRA)
- Luke Tanner, Works Manager (Council)

Proterra Group was established in Goondiwindi in 2008 and has been heavily involved in the delivery of Flood Restorations works with Goondiwindi Council ever since. This has not only involved Project Management but also full construction restoration works on roads, levee banks and stormwater infrastructure such as culverts and pump stations. Our Team in Goondiwindi consists of a Project Manager for the current 2021 event supported by our Engineering Manager Mick Shellshear along with four Site Inspectors and a Technical Officer. This team manages works on the ground and is supported by our office-based staff in Toowoomba for submission building and liaison with the QRA Team out of Brisbane.

The 2021 Event is in the order of \$40M and Proterra Group will be looking after overall Program Management as well as managing Construction teams delivering emergent works on local roads, along with Betterment works on Levee Bank and Culvert Infrastructure along the McIntyre River.

Project Management of Natural Disaster Recovery operations for Quilpie Shire Council.

Value: \$60M over 7 events (2012-2022)

- Tyrone McLean, Regional Liaison Officer (QRA)
- Peter See, Director of Engineering Services (Council)

Since 2012 Proterra Group have been working with Quilpie Shire Council delivering any Flood Restoration events as they've occurred under a LocalBuy Arrangement. This has been an effective partnership for both parties and has ensured that all works delivered under the approved programs were completed using locally based contractors, who are often local landholders who can take advantage of road works during busy periods. It's a win-win for the Shire and the community.

After recently completing the 2020 Program, Proterra Group is now supervising composite crews of Council staff and contractors to deliver the program of works that have occurred due to flooding and rain events in April 2021. We currently have a Project Manager, two Site Supervisors, a Works Assistant and an Administration Officer working and living onsite in Quilpie. Whilst onsite Proterra Group staff also assist in other Council projects including RMPC and TMR Project works.

Project Management of Natural Disaster Recovery operations for Paroo Shire Council.

Value: \$74M over 5 events (2019-2022)

- Gavin Williams, Regional Liaison Officer (QRA)
- Cassie White, CEO (Council)

Proterra Group commenced works with Paroo Shire Council in June 2019 to inspect an estimated \$500k in infrastructure damage. Following the completion of inspections, the approved submission value was just over \$3M and Proterra Group have had a relationship with Paroo Shire Council ever since.

We currently have three staff based onsite in Cunnamulla managing the completion of Council's 2020 & 2021 events (\$49.5M) and have recently completed submissions for the 2022 event which is in the order of \$18M. Our onsite personnel include a Project Manager, a Contract Administrator, two Site Inspectors and a Site Inspector.

Each of the above-mentioned events required initial inspection by Proterra Group, preparation of submissions and lodgement in MARS, and then full delivery of works involving a combination of Council and local contract resources to ensure that not only was the infrastructure returned to pre-event condition, but there was maximum value to the local community during the project delivery.
