

# Sunshine Green Environmental Protection

---

The  
Sustainable  
Company profile

The  
Future  
of Earth is  
the Future of Mankind

POWERED by  
ENSYNOX<sup>®</sup>

## Company name

**Sunshine Green Environmental Protection LLC**

## Headquarter

9040 Town Center Pkwy  
Lakewood Ranch FL 34202, USA

Representations

- Dubai, UAE-Gulf-Countries region
- Budapest, Hungary, EU-region
- Lima, Peru, South-America-region

## Founded

2018 (successor, European mother companies from 2002)

## Profile

Environmental Protection, Clean up, Bioremediation,  
Renewable Energy and Energy Storage Systems

## Phone

941.718.3373 ; 937.825.0007

## Website / email

The Next Chapter

**You are a Stakeholder.**

You have ownership in the Earth, and in the Oceans.

We are your Property Management Company and we know our job.

Trust Us, if you want a sustainable Earth, healthy Ocean and peaceful, bright vision of the future for all of the residents of the Globe.

## Our Story

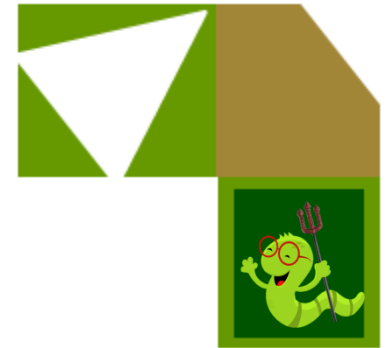

[Our story began in Europe during 2002](#), with our goal to make the planet a cleaner and more liveable place through utilizing our product-line of enzymes.

With some 15 years of experience behind us, we have developed a wide range of products through laboratory and live field testings that are precise, effective solutions for specific environmental problems in aquatic or soil environment. There are tons of researches are available about

[earthworms' and its enzymes decontamination capability and ability](#) and we studied, used them during the perfection process of creating Ensynox. It was our team who provided this special organic enzyme that may bring natural balance to the Globe. We are environmental enthusiast and also business centered, but more importantly a Family, Team Ensynox. We care for our fellow citizens and we strive to live in harmony with our social and environmental communities. We are more than proud to say that we are active, caring members of not just the United States, but the United Earth and are dedicated to improving the lives and environment of all those around us while building a trusted national brand.

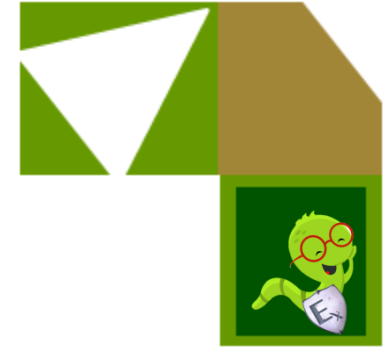

## Mission Statement

The mission of Team Ensynox is to be not just one of the world's leading organization who educate people, how to save the environment, but to be the most effective entity who show the way and provide quality environmental protection and restoration services as no one else. Using our portfolio, we make difference in people's life and contribute to solve the major environmental problems on Earth, combat global warming and create a peaceful, healthy and sustainable future of Mother Nature.

## **Core Values, Principles, Responsibilities**

### **Passion for the natural environment**

Helping minimize impact on the environment, protect ecosystems, and promote a chemical-free natural environment.

### **Passion for health**

We put people's health and safe environment at the forefront of everything we invent.

### **Passion for our human friendly green service spirit**

We aim high, think BIG, work GREEN, and take risks. Our healthy green service, organic enzyme product and bioremediation agent powder are one that we are proud to stand behind.

### **Commitment**

We are committed to our partners, to our team, and all those that are committed to operating in a sustainable manner.

### **Excellence**

Excellence is not simply a destination, but a never-ending journey. Every challenge is an opportunity for us to achieve ever-greater goals, creating healthy environment wherever we provide our service. We believe that professional people provide excellent service and exceed expectations.

### **Accountability**

We work ethically and responsibly, demonstrate honesty, fairness, and openness, with clear, transparent boundaries in all our interactions. When we make a promise, we deliver. Our integrity, respect, and credibility come from our sense of accountability, which we express clearly through our decisions and actions with our partners in order to develop and encourage open and honest working relationships.

## **Positive Energy**

We strongly believe that positive thoughts generates positive feelings and produce positive life experiences. We actively energize, support, and motivate others. For us, happiness is a priority.

## **Continuous Improvement**

Just good enough is never enough. We set challenging goals for ourselves to follow our dream and never give up. We always have options to choose from and solutions to offer. Additionally, we keep continue to develop our skills and knowledge and use our experiences to perfectise our technologies.

## **Integrity**

We are dedicated to providing integrity in our service to our customers, to the people and Nature.

## **Profit**

We pursue growth both internally and externally. We build profitable solutions for our partners and clients, as much as for the environment, supporting one another along the green way.

## **Health-conscious Society**

We are inspired to care about individuals, organizations, and community - to live in a health-conscious society.

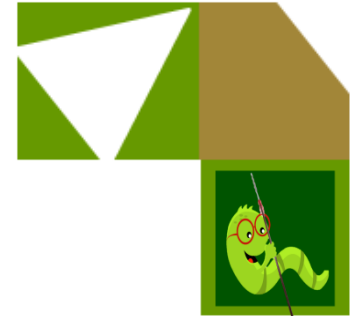

## **Green Brand**

We are committed to building an innovative, health and environmentally-conscious Green Brand through the production of our highly effective organic enzyme.

## **Healthy Environment**

We strongly believe in our human and environmentally friendly, healthy solutions that lead to the healthier-happier life and global sustainability.

## Healthy People

We are immensely grateful to be able to take part in supporting people's health by producing not only an organic, eco-friendly product but also one that drastically helps to reduce chemical toxins in the environment and in people's lives.

## International Culture

We value different cultures and beliefs as well as people's uniqueness. We respect the diversity of cultures and customs. Our diverse workforce is the key to our keen ability to understand, embrace, and serve the people and our partners globally.

## Our People – Team Ensynox

### Management Team

**Attila Tottosi**, CEO/Founder

Executive and operation management, project and technology owner, The Caribbean-Region

**Bradley Warner**, Managing Partner, Brand Ambassador

Director of Communication, USA and Pacific-Region

**Scott L. Caridi**, Managing Partner

Technology Partner Atlantic-Region

**Jerry Warner**, Chief Technology Officer  
Supervisor, Field Manager

**Dr. Laszlo Horvath**, International Director  
Europe and China, seats in Budapest, Hungary, EU

**Dr. Bettina Polycarpou**, Head of Legal Operations  
International Attorney, Arabian Gulf Countries, seats in Dubai, UAE

Management Team in details: <http://www.ensynox.com/team-ensynox/>

#### Advisory Board

**George Cummings**, WFCRC Mission Blue Ocean Ambassador for United Nations SDG14

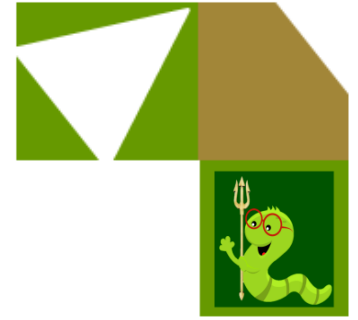

**Melody Saunders Brenna**, Coral-Reef Expert, Reef Life Restoration, Sealegacy

**James A.R. MacFarlane** President, McFarlane Marine Services

**James Gormley AEE**, Scientist / Inventor

**Orren Schneider Ph.D., P.E.**, Scientist, Water Quality Industry leader

Advisory Board in details: <http://www.ensynox.com/advisory-board/>

## Why choose Us?

If you choose to walk with us, we will show you the path on our journey down the rabbit hole. Our Company Profile seems unreal, even strange to some.

But why?

Truth be told, the unknown may often seem unreal. As we fight and scratch our way down this hole we do not know the depth but we can't stop due to the fear of failure. Let's make it known right now that WE do what no other entity can do.

Allow us to lead you there.

We will be making History. Together.

We have answered the unknown questions through our successful lab tests. What we state, that is proved. We have to share this information so the world can follow us on our journey to a clean ocean and earth. We need assistance to stay on this path. Join us!

## Why Partnering with Us?

With You, we can enter a higher level of mass production....we can upgrade our systems, and machinery, to make it fit for large scale projects. We must and we can relocate the production location to a Logical place. With this we can make the preparations to combat these worldwide issues. So please choose us if you want to make an impact with a unique, groundbreaking technology that you will introduce to the world with us, side by side. For us, it is not just about success, it is about our honor and reputation. Your reputation. Lets start the journey because WE know where it leads...let's get started. WE and only WE know the way because we have the proof.

## Why Support Us?

### No one has the same technology to:

- clean up toxins and restore, regenerate the ecosystem in an organic way as we do without any harmful residual left behind
- stop the coral disease and regenerate, revive coral reef all over the World
- clean up the bottom of the Lakes from toxic, acidic sediments
- [clean up the oil sediment in Gulf of Mexico](#) on the ocean-floor that is poisoning the ecosystem
- protect and regenerate phytoplankton in the Ocean that absorbs CO2 and transform it into oxygen, by eliminating acidic status
- produce safe and affordable renewable energy from saltwater.

**JUST US. TOGETHER**

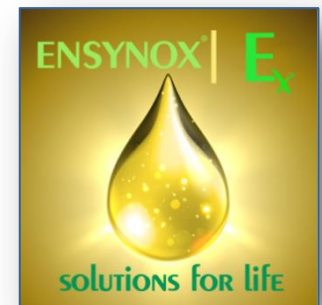

## Product and technology descriptions

### Ensynox® Organic Enzyme

The end product of Ensynox enzyme is an organic, edible pure protein that neutralizes harmful chemical toxins, bacteria and oil-based substances in a biodegradation process in aquatic environment that also enables soil regeneration. Ensynox enzymes are extracted from a winner combi combination of selected earthworms, mainly the special “Eisenia Foetida” species. The special diet, method of production and technology are protected with manufacturer’s secret. At the end of the production, the different earthworm species creates synergy, which means they enhance each other’s strengths and build up momentum. We are the only company on Earth who have the specially developed liquid formula of earthworms’ healing-decontamination and regeneration formula.

[More](#) about Ensynox®

### Bra(i)nsynox Bioremediation Agent

Bra(i)nsynox is created from a special lime by a unique bio-hydration process when we add components, Ensynox and emulsion, creating and increasing the remediation ability. It is a smart product, temporary hydrophobe formula, repels the water but absorbs oily and toxic substances, containing decontaminating and regenerating agents. BRA means **Bio Remediation Agent**, (i) means it is an intelligent formula, we can set up and change the time when the material releases its bio-remediation agents by varying the composition of the formula. Using this technology we can prevent the active ingredients from early dissolution in the water and we can apply this solution on the bottom of the ocean or waters.

[More](#) about Bra(i)nsynox

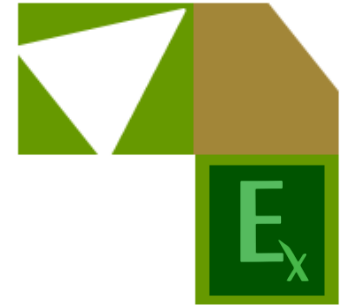

### Energy Generating and Storage Systems runs by Saltwater

We create stable electricity by our powder adding components, the system runs by saltwater. At the same time, we separate the saltwater for salt and drinking water. We can create power supplies in any level by connecting modules.

## Start-up Intangible Company Assets

*Intellectual Property: Exclusive rights of the distribution and marketing (worldwide):*

<b>Ensynox Organic Enzyme</b>	\$300,000,000.00 – Trademarked / Manufact. secret
<b>Hydrophobe Bio-Remediation Agent</b>	\$50,000,000.00 – Manufacturer's secret/patentable
<b>Bra(i)nsynox</b>	\$100,000,000.00 - Manufacturer's secret/patentable
<b>Production Technology / HyBRA</b>	\$25,000,000.00 - Patented, further patent available
<b>Total Start-up assets</b>	<b>\$475,000,000,00</b>

1. Paraguay project – Mr. Lars Anderson
2. USA, New Jersey – Mr. Scott Caridi (Boca Raton, FL, his phone number is: 201.696.2669)
3. Venezuela - Marianela C. Arias MsC, PhD Departamento de Ecologia y Ambiente PDVSA Intevep
4. Venezuela – Ing. Eduardo J. Ferrer, Director – Gerente, Constructora JJ
5. France – Francois-Xavier Merelin, Head of R-D Department
6. China - Yu Shuai, General Manager, Zhangjiagang Free Trade Zone Sen Yuan Int'l Trade Co. Ltd.

A few completed projects:

- Oil decontamination of the Rota Army Naval Base, Spain.
- Cleaning and restoration of the water of Lake Taihu at Wuxi, China
- Decontamination and cleaning of oil and algae at Skoda Car Plant
- Decontamination, cleaning and recovery of 224 km coastal in Croatia

## Our Capabilities

- Water Cleaning from Bacterias, [Red Tide](#), [Blue-Green Algae](#), etc.
- Coral Disease – [Stops the Disease](#) and Generates Recovery Process
- Rids the [Soil from Chemicals](#) and other Harmful Substances by biological degradation
- Disaster Relief (neutralization of harmful and poisoning substances in soil and water)
- Oil Pollution Handling (100% clean up and bioremediation on surface of water and soil)
- Ocean floor and water bed clean up (elimination of oil, toxic, acidic and bacterial sediment)
- Regeneration of phytoplankton and plant-like photosynthesizing microorganisms by creating balanced PH in the ocean, combat global warming by absorbing more CO2 and releasing more oxygen
- Waste Water Decontamination with biological degradation – Sewage Handling System
- Marine Animal Treatment – regeneration of sick animals caused by bacteria or viruses
- Plant Rejuvenation, Supports Growth, Increase Crop Volume
- Eliminating Bacteria in Animal Husbandry, Increase The Volume And Quality Of Meat
- Sargassum Removal and Creating Organic Compost
- Cannabis Cultivation support with plant and soil treatment

## Science behind our technology

Our solution is a brand new science, but at the same time, it is a very old science.

Earthworms and their enzymatic cleaning and regeneration abilities have been used by the Chinese for thousands of years in the area of pharmaceutical applications. In other products, the basic elements of our bioremediation powder, also have been used for de-acidification of the waters. Aside of the decontamination effect, our calcium-rich hydrophobic powder provide the **necessary calcium** for the microorganisms in the water that is [critical in our polluted waters](#). List a few scientific research from the thousands on [our website here](#).

## Endorsed by United Nation (UN) Sustainable Development Goals 14 and 17

The UN Sustainable Development Goals are the blueprint to achieve a better and more sustainable future for all. We are proud our Products, Ensynox, Bra(i)nsynox and our technologies are part of the [Strategy Technology Alliance](#) and able to provide impact solution and effect to the Globe and Sustainable Future.

### Where are we in the Sustainable Market?

For this type of service, with our products and technologies **we have no competitor, anywhere in the world.**

No one is able to produce the effective liquid formula of earthworms' enzyme, especially not high volume of it.

No one is able to

We do have a few competitors in our second product, but their hydrophobic powder is not temporary hydrophobic, but constantly repels water and does not dissolve in it, that is hydrophobic once and forever, at least for long time, until chemical effects does not damages their chemical bonds. That is called construction material. But not bio-remediation material that is able to transform harmful substances into neutral material in Nature.

Our solution is effective and safe in the same time, because the enzyme itself is also biodegradable.

Our competitors in environmental clean up mainly and usually just perform a mechanical removal and they may use chemical synthetic substances for remediation, that may be effective somehow, but leaves harmful chemical residual behind and generates changes in the environment. We do have several cases from our past for these methods.

## Media recognition

Eduardo Murat Hinojosa, Mexico*

### Further Information – [Project Plan](#)

Additional, more exact details are available about our projects, company and technology by clicking this [link](#).

### We are opening to the Experts

If you are professional, scientist, expert on your field we open positions for qualified experts join [Team Ensynox](#). Contact us at [office@ensynox.com](mailto:office@ensynox.com) to get more information about our programs.

### Do you want Partnering with us?

If you want to support us or want to be part of our incredible story, part of the History, we are glad to hear from you. Saving Earth and Ocean is a honor but costly and we appreciate having you on Board even supporter or business level. Business and Financial Plan with Capital Expenditures is available for qualified Partners.

**Contact Us. Thank You.**

[office@ensynox.com](mailto:office@ensynox.com)

## The Next Chapter

We are prepared to enter higher level, make the actions and perform our environmental clean up and remediation service where we biologically restore the environment after the clean up is done.

More information is available in our two years (2019-2021) Project Plan, Business and Financial Plan with Capital Expenditures upon your interest, contact us or our representative.

Visit our website: [www.ensynox.com](http://www.ensynox.com) for more details.

*“Ensynox (Ex) and Bra(i)nsynox (Bx) as part of the Strategic Technology Alliance may have key role finding solution for environmental problems in the world and combat global warming.”*
