Additional body preparation services

It is our policy that human remains be identified whenever possible. The identification may be made by anyone who knew the deceased, including a relative, friend, neighbour, co-worker, or clergy person. While identification of a body is possible with the minimum required preparation, you may wish to consider opting for "basic preparation of remains," as it might afford a more peaceful final viewing experience. One of our funeral directors will be able to guide you on preparation options and make recommendations based on the condition of the body.

Transportation services to and from a location of a family-led visitation and/or funeral service

Although a Transfer Service Operator – Class 1 is prohibited by law from arranging, conducting, or participating in a visitation, or funeral service at which human remains are present, it may offer transportation services to and from a location of a visitation or service that is led by the family.

CASKETS

The following caskets listed are those generally available. Additional options are available upon request. **Unless otherwise noted, all caskets listed are standard adult size.** ***Oversized caskets are available for additional cost.***

Minimum requirements for a casket:

For burial: The least expensive wood casket is suitable and is required by most cemeteries' by-laws for interment, in the interest of the health and safety of the workers involved in the interment process. A metal casket may also be used for burial. A growing number of cemeteries in Ontario offer "green" burials, which may consist of interment of a body without a casket. Since there is no legal definition for a "green" burial, it varies from one cemetery to another. For more information, please speak with one of our licensees or visit www.greenburialcanada.ca.

For cremation: A body must be presented to the crematorium in a rigid, leak-proof casket that is made of a combustible material, such as wood or cardboard. Caskets containing non-flammable, hazardous material or chlorinated or fibre-reinforced plastic, other than incidental metal, cannot be used for cremation. We offer a selection of inexpensive caskets below that are suitable for cremation.

A cemetery operator may designate a specific area in the cemetery where vaults or grave liners are required; however, the operator must have another area where vaults or grave liners are not required, so that consumers have a choice.
