## SPOTLIGHT ALTERNATORS

For some alternators, seeing as low as 13 volts is normal. For some, a constant 13.6 volts is an indication of a problem. For others, seeing as high as 15 to 16 volts for long stretches is normal. Still, it's normal for others to see the alternator not charging under specific conditions. It can be challenging to make the call if it is the alternator, battery or even the software.

This wide discrepancy in voltages is because most alternators are controlled by the ECM, PCM or battery management module to improve fuel economy. This means that the load on the engine is controlled to reduce parasitic loss at the crankshaft. Alternator output is on-demand when loads are detected, or the battery needs to be charged.

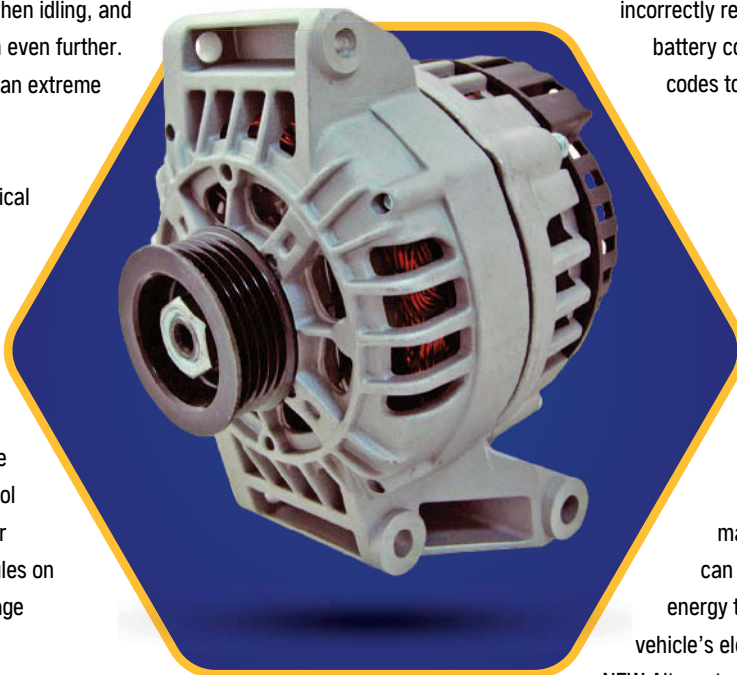

For most systems, temperature plays a significant role in the charging of the battery and how much current and voltage is applied to the battery because it is a chemical reaction. Temperature can be measured with sensors on the battery or the ends of the battery cables. Some systems even use a temperature sensor located in the ECM if it is mounted under the hood.

Although load-testing an alternator provides a quick way to test for drive belt slippage, remember that an alternator can easily be overheated when testing for maximum output during low-speed operation for an extended period. Most alternators cannot keep up with the load when idling, and the lack of cooling compounds the problem even further. Some systems might even stop charging if an extreme load is detected and set a code.

For most late-model vehicles, the most critical tool for diagnosing the alternator is a scan tool. The battery light on modern vehicles, however, is controlled by data and trouble codes. This is why a scan tool is essential to diagnosing a charging system. These codes can lead to a faster and more accurate diagnosis. Codes for the alternator can be found in the engine control module and the modules that control power distribution to the vehicle. Also, most modules on a vehicle will set a code if low system voltage is detected.

If you see a modern vehicle that measures the life or temperature of the battery, it is bad practice to use the positive and negative battery terminals to power aftermarket accessories. The extra connections can cause the battery to incorrectly report the state of discharge despite a normal battery condition. This can cause overcharging and/or codes to be set, which may cause the charging light on the instrument cluster to illuminate.

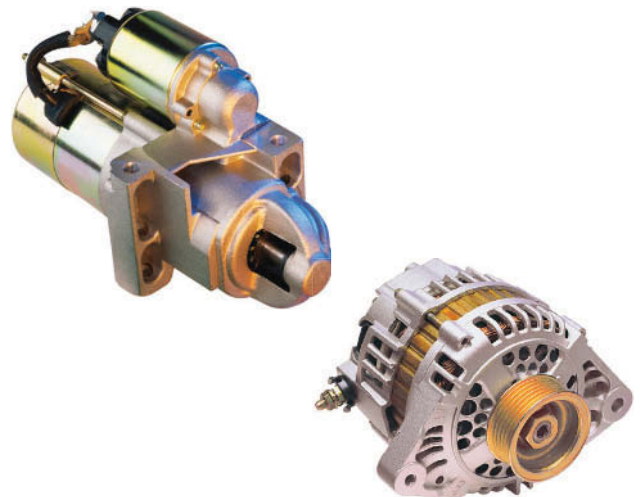

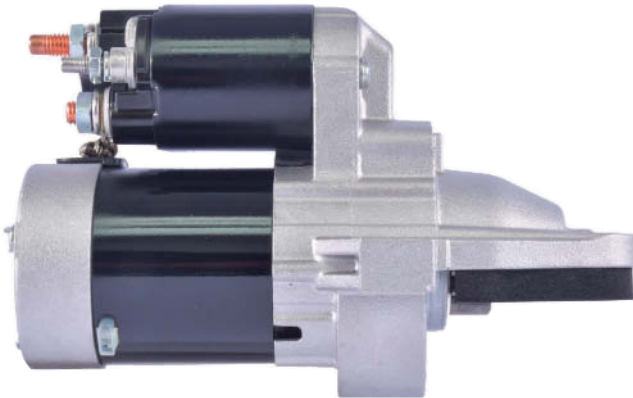

NAPA 100% NEW alternators are designed and engineered in the USA to match OE manufacturing & performance specifications. A 100% NEW unit guarantees a true OE equivalent in performance and durability. NAPA 100% NEW Alternators use high-quality electronics boards, rectifiers and voltage regulators that work seamlessly together to maximize power output and endurance so you can be confident your vehicle will have plenty of energy to power additional electronics and keep the vehicle's electrical system energized. With NAPA 100% NEW Alternators, you do not have to deal with the old core.

Royal Purple specially formulated their SAE grades to be suitable for engines from trucking to general transportation. The now API Certified oil is excellent for today's turbo, supercharger and even warranty motors. Motors stay cleaner and cooler, resulting in better gas mileage, superior engine protection, and longer oil life. Increased pressure is met with increased viscosity to meet the demands of your modified engine with a higher level of performance and protection.

## RESTORE COOLING SYSTEMS TO LIKE NEW PERFORMANCE WITH NAPA RADIATOR HOSES

Be sure to replace the radiator hoses any time you are servicing the cooling system, especially on higher mileage vehicles. Older hoses can crack or collapse under pressure, leaving your customer stranded and upset with your last repair.

NAPA Radiator Hoses and Modular Coolant Hoses are built to the OE-exact specifications by the leading automotive aftermarket manufacturer for these segments.

■ NAPA offers coverage for 90% of the modular coolant hose applications on the market

■ More than 20% of new vehicles come equipped with modular coolant hoses

### Buy \$300 or more of Radiator Hoses and Get \$50

**Promo Dates: July 1 – 31, 2025 - Eligible Parts: NBH Group Codes 20 and 80**

Purchases will be tracked by NAPA HQ and no submissions will be required. Prepaid Visa® Cards\* will be issued by IS Results and mailed within 8-10 weeks after the promotion has ended. For every \$300 purchase of Radiator Hoses, get a \$50 Prepaid Visa® Card. For more details, speak to your NAPA Representative.

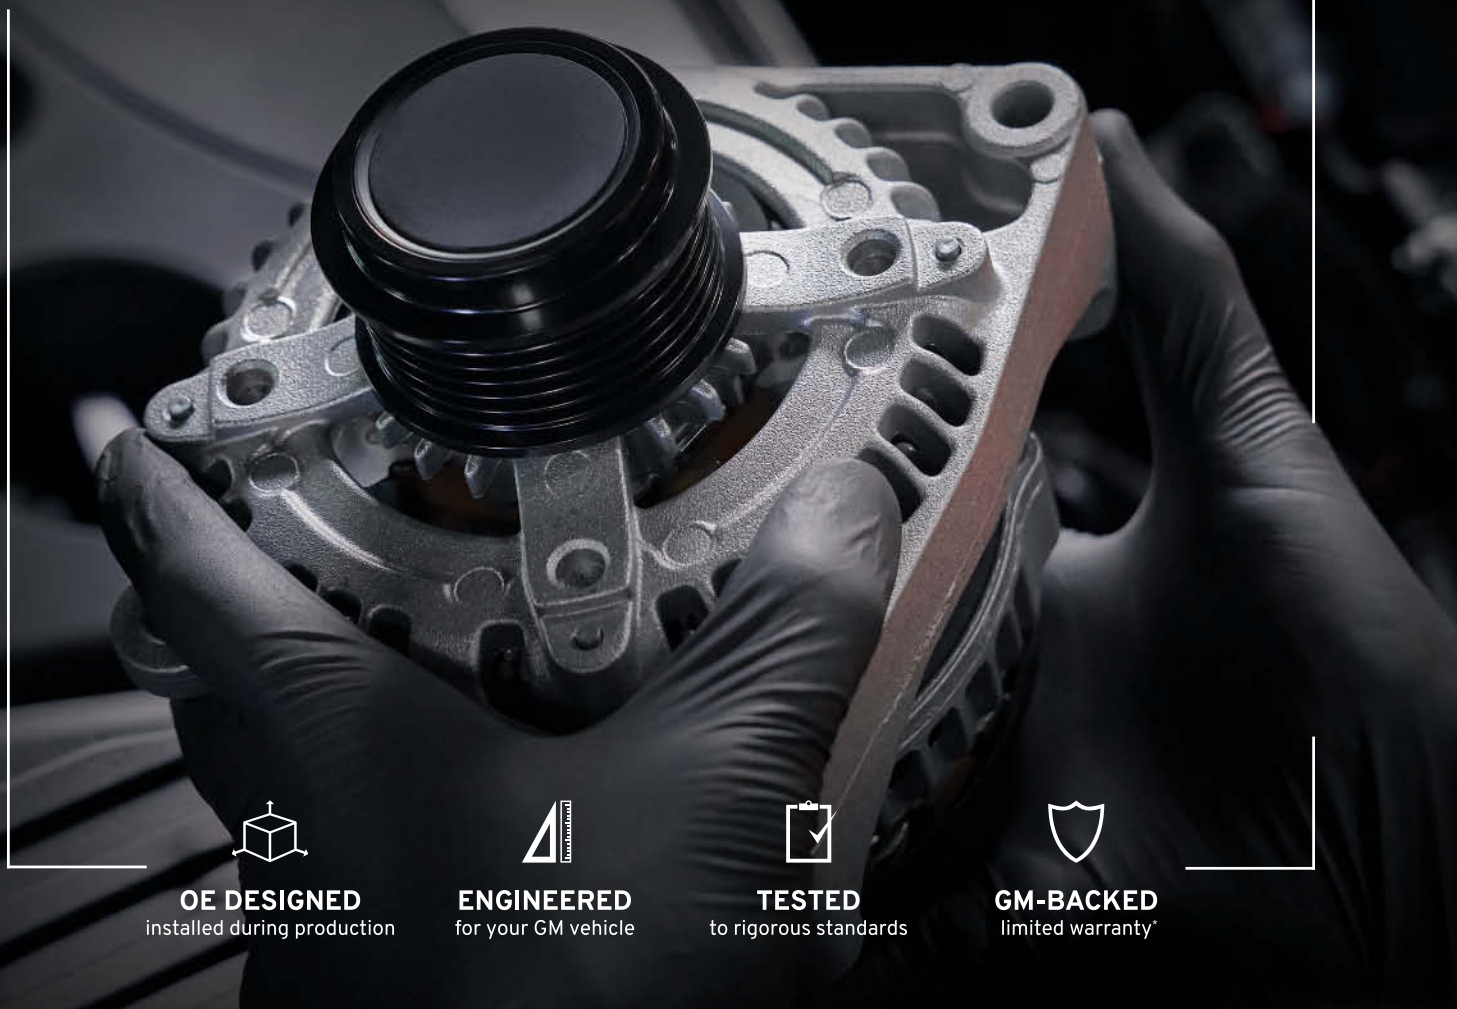

\*This Card is issued by Sunrise Banks N.A., St. Paul, MN 55103, Member FDIC, pursuant to a license from Visa U.S.A. Inc. This card may be used everywhere Visa debit cards are accepted. Use of this card constitutes acceptance of the terms and conditions stated in the Cardholder Agreement. Card expires 12 months from issuance, per the "Valid Thru" date printed on the card.

- Grote has best-selling plugs and sockets needed to maintain electrical connections from tractor to trailer and keep your truck on the road.
- Grote's Heavy Duty 7-Way Sockets are designed to meet and exceed SAE J560 specifications. Our quality features include a reliable closure spring, industry standard mounting holes, and solid brass terminals for optimal conductivity.
- Grote's Heavy Duty 7-Way Plugs are designed to meet and exceed SAE J560 specifications. Our quality features include clear circuit identification printed on the plug insert, rugged zinc-diecast or nylon housings for superior corrosion resistance, and the use of a stainless steel spring guard.

## SEE SAFETY IN A WHOLE NEW LIGHT.

Turn high-visibility clothing, reflectors, and equipment into active safety devices with Grote's WorkShield warning lights. Powered by HINVII technology, WorkShield lamps use minimally visible, low-wavelength light to brilliantly illuminate any high-visibility material, significantly raising its conspicuousness without blinding personnel and surrounding traffic. Create a safer, more visible work zone with WorkShield by Grote.

### FEATURES & BENEFITS

- Get the most out of high visibility clothing and gear, enhancing worksite visibility and safety
- Perfect for applications where high visibility clothing is used: Police, Fire, EMS, Utility, Refuse Collection, and more
- Can be used with or without an external flasher
- Durable design features ultrasonic welds, fusing lens, and plastic base for a tough, weather-tight seal
- An ultra-thin profile bezel mount easily mounts to nearly any solid, flat surface
- 79266 features the S-Link™ 2.0 System for synchronizing with other Grote S-link units
