

*Where transformation
Takes Root*

RITA NOLAN

— Executive Director —

The Montessori Network

Dear Friends,

In this moment of reflection, I find myself both humbled and inspired by what we have built—together. This past year, The Montessori Network served over 425 children and their families across our three core programs: The Montessori School of Englewood, our Head Start Early Childhood Center, and the Montessori Residency of Chicago. These aren't just numbers. They are stories—of joy, of progress, of transformation—that unfold every day in our classrooms and ripple through the community. At the heart of our work is a simple, radical belief: every child, regardless of income or zip code, deserves access to a high-quality Montessori education. You help make that belief a reality. Because of your generosity, our students, 98% of whom come from low-income households, are engaged in hands-on, inquiry-based learning that cultivates academic excellence, compassion, independence, and leadership. We took bold steps to reinvigorate Montessori practice in our early childhood classrooms, ensuring even our youngest learners are supported by research-based, developmentally appropriate pedagogy. The Montessori Residency of Chicago expanded its reach, training and mentoring aspiring educators deeply committed to equity and excellence in underserved communities. In many ways, this year was about laying foundations for a more sustainable financial model, long-term leadership succession, and deeper programmatic alignment across our network. Your investment is helping us meet today's needs—it is helping us shape the future of public Montessori education. We are clear-eyed and full of resolve as we look to the road ahead. On behalf of our students, families, faculty, and staff: thank you. Thank you for believing in our work, for walking beside us, and for making this vision possible.

With deepest appreciation,

Rita Nolan

Executive Director

The Montessori Network

STEPHANIE TOON

Principal

The Montessori School of
Englewood

Dear Friends,

As I complete my first year as Principal of The Montessori School of Englewood, I am honored to reflect on our progress together. This past school year has been a transformative chapter in our journey—one marked by deepening our roots in authentic Montessori practice while embracing the unique responsibilities of serving a public school community in Englewood. Our school theme this year centered on diversified leadership, collective efficacy, and building strong teams. These priorities were not just aspirational—they guided every decision and structure we refined. We focused on cultivating leadership at all levels, recognizing that sustainable school improvement depends on distributed responsibility and shared ownership. Our teacher leaders, instructional coaches, and support staff rose to the occasion, contributing meaningfully to school-wide initiatives and fostering a sense of collective purpose. In professional development and daily practice, we emphasized collaboration and trust. Through data-informed team meetings, cross-functional leadership groups, and shared problem-solving protocols, we built a culture where staff began to feel empowered to lead and supported to grow. The results were evident in the confidence with which our teams approached instructional challenges and student support. This year also reaffirmed the power of Montessori education in a public, urban setting. We remained committed to meeting each child where they are—academically, socially, and emotionally—and worked to ensure that every classroom environment reflected this commitment. We expanded our support for diverse learners and deepened our partnerships with families, anchoring our work in equity and authenticity. The work we do is not easy, but it is meaningful, urgent, and transformative. As we look ahead to the coming year, I am excited to continue building on this foundation—with a clear focus on student achievement, adult learning, and community connection.

Montessori School of Englewood

A Journey of Equity, Empowerment, and Excellence

"We believe in every child, every family, and every future."

A Vision Takes Root (2010–2012)

In the heart of Chicago's South Side, in a community too often overlooked by systemic institutions, one visionary educator—Rita Nolan—envisioned something radical: a free, public Montessori school serving the children of Englewood. At a time when most Montessori schools were private and inaccessible to low-income families, the Montessori School of Englewood (TMSOE) was created to challenge that norm. It began with a simple but revolutionary belief: children in underserved communities deserve access to the same empowering, child-centered education offered in more affluent areas. The school opened its doors with just a few classrooms, a handful of passionate teachers, and a mission that would soon ripple across the city.

Growing Roots and Building Trust (2013–2016)

As the school expanded to serve more grades, families and community members began to take notice. TMSOE wasn't just teaching reading and math but nurturing curiosity, independence, and peace education. Students learned how to care for themselves, each other, and their environment. The results were tangible. Discipline referrals decreased, while engagement and attendance soared. Parents became partners in their children's education. TMSOE wasn't just a school—it was becoming a pillar of community hope.

Head Start, Big Futures (2017)

In 2017, TMSOE took a groundbreaking step by partnering with Start Early to launch a Montessori-based Head Start program—one of the few in the country operating in a public school setting. This program wasn't just about early learning. It was about early empowerment. Children as young as three learned to pour their own juice, speak respectfully to peers, and engage in hands-on activities that laid the foundation for math, language, and executive functioning skills. Families received wraparound services, including health screenings, mental health support, and parenting workshops. For many, it was their first experience of feeling seen and supported in a school setting.

The Residency Program: Planting Educators in the Community (2018)

To address the shortage of Montessori-trained teachers—especially teachers of color—TMSOE created a Teacher Residency Program in 2018. In consultation with the National Center for Montessori in the Public Sector's Jacqueline Constantino, a new, innovative model of Montessori training evolved—The Chicago Montessori Residency. The program was approved by MACTE and received the Denis Shapiro Award for Innovative Models the following year. Central to the program's success was its focus on recruiting from the community, ensuring that students would see teachers who looked like them, understood their stories, and believed in their potential. Graduates of the residency program now teach at TMSOE and across Chicago, spreading a new model for equity-driven Montessori education.

Resilience in Crisis: The COVID-19 Years (2020–2022)

When the pandemic hit, Englewood—like many historically marginalized communities—was disproportionately impacted. TMSOE did not retreat. It rose. Teachers delivered Montessori learning kits to students' homes. Staff made weekly phone calls to check on families. Meals, laptops, and emotional classroom lessons. Even in remote learning, TMSOE preserved what made it special: independence, self-paced learning, and deep trust in students' capacity to thrive.

Today: A Model of Urban Montessori Excellence (2023–2025)

From its bold beginnings in 2010, The Montessori Network has grown into a movement—one that redefines what's possible for children, families, and educators in Chicago and beyond. What started as a dream in a single Englewood school has evolved into a thriving ecosystem of learning, leadership, and love. Today, The Montessori School of Englewood stands as a beacon of equity and excellence, nurturing curiosity, independence, and imagination from Head Start through middle school. Through the Montessori Residency of Chicago, we are preparing the next generation of educators to lead with purpose and compassion—ensuring that the impact of Montessori education multiplies for generations to come.

This is more than education—it's transformation. The Montessori Network is growing a future rooted in justice, joy, and endless possibility, proving every day that when opportunity takes root, the future flourishes.

Impact Highlights

100%

TMSOE Head Start students receive developmental screenings, health support, and social-emotional enrichment

90%

Retention rate in public Montessori classrooms

TMSOE is a leader in anti-bias, anti-racist Montessori pedagogy, shaping national conversations on educational equity.

A Final Word: Education as Liberation

The Montessori School of Englewood isn't just a school. It is a movement that says every child, regardless of income or background, deserves a prepared environment, freedom to grow, and guides who believe in them. Its legacy is not just in test scores or program grants—it's in the confident child who leads a classroom discussion, the parent who finally feels heard, and the teacher who came back to serve her own neighborhood.

Montessori: An Education for Life, Not for Test Scores

At The Montessori School of Englewood (TMSOE), we believe that education should not be limited to preparing students for standardized tests. Instead, our mission is to prepare children for life—to nurture independent thinkers, compassionate leaders, and curious learners who can thrive in a complex world. The Montessori approach equips students with lifelong skills: critical thinking, self-discipline, problem solving, and a deep sense of agency. These outcomes can't be fully captured by a test score—but they are clearly visible in the real-world success of our students.

Rising Attendance, Strengthened community

Three years ago, chronic absenteeism posed a major challenge. Today, we are proud to share a significant reduction in chronic absenteeism, reflecting deeper student engagement and stronger family partnerships. (See Graph X.) This improvement stems directly from Montessori principles: classrooms that cultivate a sense of belonging, individualized learning that honors each child's pace, and purposeful work that inspires curiosity and intrinsic motivation. When students feel seen, valued, and inspired they come to school — every day.

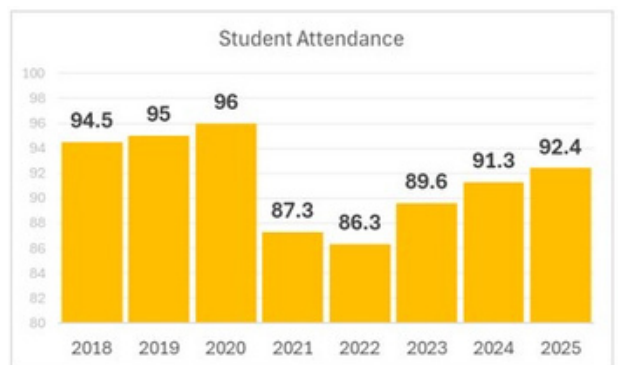

Enrollment Growth and Family Trust

Families are choosing Montessori education in increasing numbers. This year, TMSOE welcomed 50 additional students, a clear vote of confidence in our mission and impact. (See Graph XX.) This growth reflects more than rising enrollment—it reflects trust. Families recognize that Montessori education fosters learners who are eager, independent, and deeply engaged. Our classrooms are places where students lead conversations, collaborate authentically, and develop the skills to navigate their world.

Consistent Attendance, Long-Term Success

Over the past three years, overall attendance has steadily increased, laying a stronger foundation for both academic and personal development. Students who regularly experience Montessori's prepared environment build critical executive functioning skills and resilience. This strong foundation leads to remarkable outcomes. Each year, TMSOE graduates are accepted into selective programs and selective enrollment high schools throughout Chicago. They enter those schools as self-directed learners with the confidence, focus, and intellectual curiosity to thrive.

The Secret Sauce: Education Rooted in Humanity

The “secret sauce” of Montessori isn’t a single program or intervention — it’s a philosophy that places the child at the center of the learning experience:

Community & Connection: Teaching collaboration, empathy, and grace.

Child-Centered Learning: Honoring individual pace and interests.

Intrinsic Motivation: Inspiring curiosity, not compliance

Independence & Agency: Building skills for self-management and decision-making.

“Free the child’s potential,
and you will transform
him into the world.”

Maria Montessori

At TMSOE, we aren’t preparing students to pass a test. We are preparing them to lead, innovate, and contribute to their communities and beyond.

Jode Redding: Lindblom Math & Science Academy Graduate

Jode Redding’s story is one of perseverance, excellence, and promise. A graduate of Lindblom Math and Science Academy, Jode earned a full scholarship to Smith College, where she is continuing her academic journey as a leader and changemaker.

At Lindblom, Jode was a proud member of the Million Dollar Club, an elite recognition awarded to students who collectively secure over one million dollars in scholarship offers. This accomplishment speaks to her determination and the community of support and opportunity that helped make her dreams a reality. Her success powerfully reminds us why we remain committed to creating pathways that prepare students to thrive in college, career, and life.

“I am grateful for the support and opportunities that pushed me to aim higher and believe in what’s possible.”
– Jode Redding.

Student Spotlight: Leah White Class of 2025 Valedictorian

Our 2025 Valedictorian, Leah White, is a shining example of academic excellence and leadership. Her hard work, determination, and commitment to learning have earned her acceptance to Whitney M. Young Magnet High School, one of Chicago's most prestigious selective-enrollment schools.

Leah's success reflects her perseverance and the supportive Community that nurtured her talents and fueled her aspirations. As she prepares to take the next step in her journey, Leah is a role model for her peers and an inspiration for future graduates

**“Being named
Valedictorian shows me
what's possible when
you set high goals and
never give up.”
– Leah White.**

The Universal Child

I am reminded of the many changes in my childhood—coming to a new country as an adopted child at age four, not knowing anyone or why I was on a plane, never having seen that monstrous machine with giant wings. I flew into St. Paul, Minnesota, during a winter storm, seeing snow for the first time. My new family offered ways to help me experience this new environment—letting me play in the fresh snow, bundling me in a snowsuit, and preparing me for what was to come. I had never been in a blizzard before, yet I was thrilled to play for hours, sliding down the back stairs with joy. My new family could hardly believe how happy I was after such a dramatic change—from the Andes Mountains of the Urubamba region of Cusco, Peru, to a winter storm of several feet in my new home.

Many children experience similar uncertainty, dramatic change, and, ultimately, joy and comfort. What does a child seek when brought into an unfamiliar environment? How do they engage with what is in front of them? Whom do they look to, and what motivates them to explore and discover? The Universal Child begins to answer these questions through their actions—they begin the great adventure of life.

In her wisdom, Dr. Maria Montessori studied and observed children in a variety of environments—from the slums of Italy to the streets of Calcutta, to the shores of the first Montessori school in the United States. She spoke of the Universal Child—how all children, regardless of culture or circumstance, go through similar developmental stages and possess an innate energy that we must aid in developing. She was among the first to demonstrate that early childhood is the right moment to begin the path of independence, self-actualization, and knowledge—to harness freedom and self-discipline through discovery. These are the foundational steps of human development.

A Montessori environment allows each child to develop at their own pace and rhythm. It is a place of exploration, where children discover the world around them and practice the practical skills that will serve them throughout life. It is a preparation for life, for knowledge, and for social engagement. Dr. Montessori spoke of altruism and reminded us that “no man is an island.” She observed that one human alone cannot accomplish what humanity has achieved for thousands of years—it takes all of us, working in cooperation, to achieve greatness.

Our Montessori environments are filled with these endeavors. They are incubators for greatness—spaces where the formation of character begins to thrive in an atmosphere of discovery, potential, and joy. Here, one can clearly observe those radiant “aha” moments that mark true learning.

My parents were early pioneers in Montessori education, creating a new school where children could thrive in Minnesota. Having experienced Montessori at an early age, I am proud to follow in their footsteps. My wish is for every child to experience a Montessori education so that they, too, can be prepared for life’s great adventure.

Early Childhood Coach
Juan St. Mane

Beyond the Classroom Highlights

UIC Gardeners- School Garden

For the past eight years, University of Illinois Extension Master Gardener Rosemary Wyche has been a cornerstone of The Montessori School of Englewood garden since 2019. Rosemary’s dedication has transformed our garden into a vibrant learning space and continues to inspire our students and community. Because of her dedication, our students experience the joy of planting, tending, and harvesting fresh food while learning valuable lessons about sustainability, health, and community care. Rosemary’s steady presence has grown our garden and cultivated a sense of pride and stewardship among our students.

After School Partnerships

TMSOE has the honor and privilege of expanding opportunities for its students by nurturing long-standing partnerships while also cultivating new experiences with new collaborators.

We are so grateful to continue our partnership with Joffrey Ballet. Along with afterschool classes, they offered two of our lower elementary students, Kennedy Green and Genesis Inga, an opportunity to participate in their Bridge Program, a free dance program on Saturdays that introduces students to the basic elements of ballet. Our students also qualify to participate in the Bridge Summer Intensive Program, which can lead to a full scholarship to the Grainer Academy of the Joffrey Ballet.

Next Wave Stem

One of our new partners, provided free Robotics classes (K-3rd and 4th-8th grade). Along with complimentary classes, they offered curricula and stipends for our teachers who were instructors. Our students built robots from scratch and learned how to code them. Thank you Next Wave STEM for bringing hands-on applications of science to Englewood.

Depave

Our forthcoming green schoolyard (created in partnership with Depave Chicago and Depave-Portland) pushed forward in four areas this past year.

- 1.CPS APPROVAL:** We successfully achieved a positive review and approval with CPS for the design and engineering of the 12,500-SF green schoolyard project. This is no small feat, as our project pushes the envelope for green schoolyard design on CPS property. Professional consultants Indigo Ecological Design (landscape architecture) and Geosyntec (civil engineer) completed the construction drawings and specifications, and after careful review with CPS, TMSOE was given the green light in December to proceed into bidding.
- 2.FUNDING:** During this time, our team has ramped up its fundraising efforts and applied for numerous grants and funding opportunities but without success thus far. The elimination of federal funding for climate and community infrastructure projects has certainly been part of our challenge. We are shifting our strategy to focus on corporate and private philanthropic sources of funding going forward. We will also be seeking support within our TMSOE networks and friends for financial support of the project.
- 3.2026 DEPAVE SUMMIT:** During this time, Depave Chicago and Depave (Portland) expanded the programming for the TMSOE Depave Event (tentatively planned for summer 2026) to include a weeklong series of environmental educational activities, inviting community-based depave organizations around the country to convene, participate and learn about depaving together. The planning of the summit expands TMSOE's project into a national hub for community transformation design. We'll be posting more about this momentous gathering later in the year.

4.DOCUMENTARY FILM:

We also welcomed Andrew Meriweather, a documentary filmmaker, to the partner team. Andrew contacted Depave Chicago with interest in the ways that Chicago is beating flooding issues across the city, including green infrastructure. His interest in flooding led him to Depave Chicago which led him to us and our project. Andrew has taken great interest in our mission at TMSOE, and we're delighted that TMSOE will be part of his documentary about environmentally transformative spaces and places for children and communities.

- 1.Garden entry
- 2.Eco-discovery pathways
- 3.Memorial garden
- 4.Outdoor classroom
- 5.Butterfly/habitat gardens
- 6.Biology rain-garden
- 7.Shady picnic grove, seating area
- 8.Playmounds with trees & play logs
- 9.Stone seating, mini-amphitheater
- 10.Shaded accessible pathway

Design for future TMSOE Nature Playground

Montessori Residency Chicago

Preparing the Next Generation of Educators

The Montessori Residency Chicago (TMRC), founded in 2017 out of The Montessori School of Englewood, continues to shine as a leading urban teacher education program. Built on the belief that excellent teaching transforms communities, TMRC prepares confident, credentialed, and culturally responsive educators ready to guide children in public Montessori classrooms.

Our two-year residency blends rigorous coursework with reflective coaching, creating a transformative experience for adult learners. Residents gain a deep understanding of Montessori philosophy, hands-on expertise with classroom materials, and—perhaps most importantly—a commitment to teaching through a culturally responsive lens. By the time they graduate, TMRC educators know the what, the why, and the how of Montessori, equipped to meet the developmental needs of every child.

Celebrating Our Graduates

In 2024, six new teachers completed their credentials through TMRC - four at TMSOE.

Congratulations to:

Ashley Matthews & Brittini Craft
Elementary I Credential

McCall Long & Ethel Nelson
Early Childhood Credential

Their achievement reflects their dedication and the strength of TMRC's model:
investing in adult learners through meaningful coursework, coaching, and mentorship.

Commitment to Excellence

This past year, TMRC continued to advance its standing among accrediting bodies:

- We remain in good standing with the Illinois Board of Higher Education (IBHE).
- We submitted our application for affiliation with the American Montessori Society (AMS), one of the most rigorous Montessori accrediting organizations.
- We entered our first renewal cycle with the Montessori Accreditation Council for Teacher Education (MACTE) for our Elementary program, with Early Childhood soon to follow.

These milestones demonstrate our unwavering commitment to delivering a high-quality, nationally recognized teacher education program.

Looking Ahead!

Each summer, TMRC welcomes new Residents at the Elementary and Early Childhood levels, building a pipeline of passionate educators grounded in Montessori philosophy and practice. Our credentialed instructors—many still active in classrooms at TMSOE—bring decades of combined experience and remain deeply invested in our mission. As we look forward, we remain inspired by our graduates. Their dedication to children, families, and communities exemplifies the heart of our Mission: **breaking barriers and shaping the next generation of change-makers.**

Financials

The Montessori School of Englewood, every dollar entrusted to us is stewarded with care to ensure maximum benefit for students and families. In school year 24-25, 88% of all spending went directly into teaching and learning, a reflection of our unwavering commitment to put children at the center of everything we do. From classroom instruction to materials, meals, and enrichment, resources are directed where they matter most—supporting students’ daily growth and success. This year, our school provided over \$8 million in educational value, much of it fueled by public grants, generous foundation support, and individual donors. These resources allowed us to invest in highly qualified teachers, deliver hands-on Montessori learning materials, and expand services that directly impact families. While we faced challenges with higher program costs, these investments ensured that children had consistent access to the teachers, resources, and supports they need to thrive. Behind these numbers is the story of a school community that makes a difference every day. Your support helps transform classrooms into spaces where curiosity is nurtured, resilience is built, and children develop the skills to succeed for life. Together, we are not only educating students—we are strengthening families and shaping the future of our community.

Dear Advocate,

Thank you for supporting The Montessori School of Englewood. Because of you, we can bring the richness of Montessori education into the public sector—ensuring that all children, regardless of background, can learn in an environment that fosters independence, creativity, and a lifelong love of learning.

Montessori is more than a teaching method; it is a philosophy that shapes the whole child. By cultivating critical thinking, compassion, and resilience, we prepare the next generation to lead, innovate, and contribute positively to their communities.

Your belief in this Mission makes all of this possible. We are grateful for your partnership in building a brighter, more equitable future for our students.
