

Comprehensive Downpipes

& Accessories

Downpipes & Accessories

KFC Roofing supplies an extensive range of Round Downpipes, complementing all types of gutter systems. Downpipes are available with a full range of standard accessories as well as fully customised fabrications.

Materials & Finishes

Refer to metals compatibility chart prior to selection. For COLORBOND ULTRA®, COLORBOND® is used, as interior coating is identical.

| Material | Gauge |
|------------------------------------|--------|
| ZINCALUME® Steel | 0.55mm |
| COLORBOND® Steel | 0.55mm |
| Galvanized Steel | 0.55mm |
| Stainless Steel 304 and 316 grades | 0.55mm |
| PREFA® Aluminium (Painted) | 0.70mm |
| Rheinzink Titanium Zinc | 0.70mm |
| Copper | 0.60mm |

Round Downpipes

Round downpipes can be supplied to match conventional and half round gutters. Combined with Half Round Gutters, Round Downpipes provide excellent performance and aesthetic properties.

For range, materials, and lengths, see page 3.

For heavy duty downpipes, see our heavy duty storm water downpipe brochure.

Accessories

KFC Roofing provides the widest range of imported and manufactured accessories including china hats, ventilation caps and more.

See pages 4, 5 & 6 for full range.

Astragals & Clamps

Astragals, downpipe clamps and downpipe straps can be supplied to match all stocked diameters of Round Downpipe.

For range and materials, see page 6 & 7.

Smooth Bends

With the largest range of Elbows and S Curves imported from Europe, KFC Roofing Supplies offers smooth transitions with a clean finish.

For availability and angles see page 8.

Elbows can be combined with downpipe sections to allow the offset distance to be infinitely customisable. Use the MASC downpipe expander to properly overlap pipes, or order double end expanded pipes.

Contact us to enquire about custom mitred offsets.

Adjustable Offsets

Adjustable offsets are an efficient offset solution, significantly reducing installation time, while also being great for optics. Adjustable offsets have a 72° anale.

For range and materials, see page 8.

Clip On Outlets

Clip-On Outlets provide up to 33% more water flow and are largely self cleaning. The use of Clip-On Outlets significantly reduces installation time, particularly when paired with European Bead Half Round Gutter. Furthermore, when combined with European Bead, no rivets are required and no scalloping of the downpipe is required.

For range and materials, see page 5.
