# HANDLING COMPLEX AND HIGH-RISK PROJECTS

Some tree projects require advanced techniques and experience.

- Tree removal near homes and structures
- Work in tight or limited spaces
- Large tree dismantling using rigging systems
- Tree trimming near power lines and utilities
- Multi-tree and commercial property projects

We handle high-risk situations with precision and control to prevent damage and ensure safety.

# WHAT OUR CLIENTS SAY

## Don O'Neill

“Carlos and his JC Tree Service Team did a magnificent job on treating and trimming a variety of different trees on our property. He took the time to explain his approach and clearly explained in detail what they would do for each tree. “

## Sean Brown

“We've worked with Jose and Carlos now for two major projects at our home in the Santa Cruz Mountains. I highly recommend them for any scope of work. They're on time, professional, do great work, and are incredibly easy to work with.“

# WHAT OUR CLIENTS SAY

## Joe Dellamano

"Just had JC's tree service trim my trees and I could not be happier. I've used other tree services in the past and they would end up cutting a few branches and leave. JC's is not that way, they cut everything to exactly what they discussed with me and went way beyond my expectations."

## Keith Kozo

"Jose and the team have trimmed my trees twice. They did a great job and clean and efficient. I called them back because I trust their team to look after my property and take care when removing the cuttings. I highly recommend them."

# TREE CARE DONE THE RIGHT WAY

We believe tree care should go beyond cutting branches.

- Focus on long-term tree health
- Protect surrounding property and structures
- Educate clients on proper maintenance
- Use safe and proven techniques
- Deliver clean, professional results

Our goal is to help property owners make informed decisions while maintaining safe and healthy landscapes.
