

Garment & Textile Labelling Solutions

Ideal for any environment where simple and fast identification of garments, linen or any other textile items is required.

- Instant printing , print one label or one thousand.
- No minimum quantities or waiting of labels to be posted.
- Labels are printed using our own software program, on our own labels that are wholly Australian made.
- Once printed, the label is heat sealed to the textile.
- Applied correctly the print and label itself will withstand hundreds of wash cycles .
- Our printer can be set up with its own keyboard as a stand alone unit, or intergrated to your computer system.
- Large range of label sizes available to suit your specific requirements.

- Coloured ink available, and coloured labels in some sizes.

- Thermal Printer
- Keyboard
- Roll of Labels

- Indelible Thermal Ink Ribbon
- Heat Seal Machine

Alternatively, you may have other uses for the sticky labels apart from textile marking, such as personal belongings.

Labels.

NLE's Unique Hybrid labels can stretch

and printed using a thermal printer fitted with a specially impregnated laundry thermal ink. Once printed, labels can

then be heat-sealed onto linen using a heat seal machine. The labels have an adhesive backing, allowing them to stay in the correct position without edge curling!

**1,700
Labels
Per
Roll**

New Thermal Printer

Benefits:

- Ultra compact size

RHINEHART·22 Heatsealer.

It's ideal for label or patch applications. The heat press has fully digital time and temperature controls and features auto release technology. Lock down head releases after preset time is reached.

- LED Display screen indicates temperature & time.
- Audible timer sounds and automatic release occurs when the press cycle is complete.

- Durable silicon pad
- Robust construction
- Voltage: 230 volt AC, Single phase mains supply (standard wall socket)
- Will turn off automatically after a period of no use.

N.B. A heatseal machine is the only way to guarantee permanent adhesion of labels.
