Flake and Nugget Ice Makers

FLAKE & NUGGET ICE MAKERS

Our Flake and Nugget ice makers belong to the true allrounders of the Hoshizaki product line-up. These powerful, durable and sustainable machines are highly popular across different market segments, such as in food preparation/processing, as well as in hotels, bars, restaurants and catering businesses.

As the Flake and Nugget ice makers convert all water brought into the machine's evaporator to ice, the water consumed is equal to its ice production. The inner workings of the ice maker are designed to prevent unpleasant calcification and bacterial contamination. For example, the use of carbon graphite bushings instead of conventional ball bearings allows the machine to work entirely without grease.

FLAKE ICE

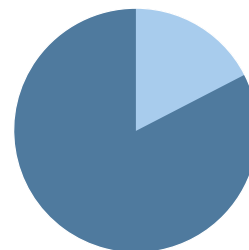

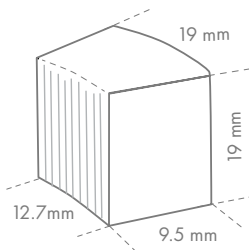

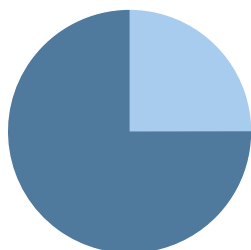

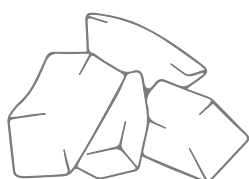

Hoshizaki's premium flaked ice stands out for its exceptional quality, making it suitable for specialised applications such as medical uses, including the transportation of organs.

The light texture flake ice, for example, has a quick cooling effect, creating an environment of uniform temperatures, without causing unpleasant freezer burn. This is why Hoshizaki Flake ice is considered the ideal material to prepare and layer hygienic and attractive food displays.

NUGGET ICE

Hoshizaki Nugget ice makers generate quality granular ice, such as nugget ice. In cocktails, the dry and hard ice nuggets are the ideal cooling agent, as they deliver just the right amount of dilution, especially for strong-spirited drinks, for example, Mojitos and Tiki Cocktails.

Hoshizaki nugget ice maker's are equipped with an extruding head which performs at high compression to yield firm, dry and distinct ice nuggets.

NUGGET ICE*

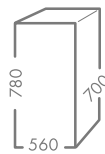

FM-150KE Flake

91000101
Production capacity/24h*: 130kg
Bin capacity: 26kg (Leveled)

FM-150KE-N Nugget

91000528
Production capacity/24h*: 120kg
Bin capacity: 32kg

FM-480KE Flake

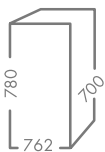

91000104
Production capacity/24h*: 425kg
Compatible Bins and Top Kits:
B-301, B-501+8D,
B-801+8D+18D, B-1300

FM-480AKE-N Nugget

91000529
Production capacity/24h*: 360kg
Compatible Bins and Top Kits:
B-301, B-501, B-801+18D, B-1300

*Shown with B-301 Bin

FM-750KE Flake

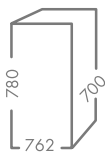

91000080
Production capacity/24h*: 650kg
Compatible Bins and Top Kits:
B-501, B-801+18D, B-1300

FM-750KE-N Nugget

91000530
Production capacity/24h*: 500kg
Compatible Bins and Top Kits:
B-501, B-801+18D, B-1300

*Shown with B-501 Bin

FM-1000KE Flake

91000081
Production capacity/24h*: 890kg
Compatible Bins and Top Kits:
B-301, B-501, B-801+18D, B-1300

FM-1000KE-N Nugget

91000531
Production capacity/24h*: 730kg
Compatible Bins and Top Kits:
B-301, B-501, B-801+18D, B-1300

*Shown with B-501 Bin
