DESDE 1976 LEVANDO A CULTURA DO CHURRASCO PARA O MUNDO!

Em 1976, Darci Viapiana começou a produção artesanal de churrasqueiras domésticas portáteis, em Caxias do Sul, no sul do Brasil.

A inovação esteve no DNA do negócio desde o início: um motor de limpador de para-brisas de um automóvel inspirou a introdução de uma novidade ao mercado e, desta forma, foi criado o sistema de espetos rotativos.

Nos anos seguintes, a empresa se manteve pesquisando e buscando o desenvolvimento de produtos cada vez melhores e mais eficientes. A fábrica cresceu, veio a participação em feiras de negócios, foram agregados representantes comerciais à equipe e a Scheer começou a atender também ao segmento de restaurantes e churrascarias.

A visão tecnológica representou a ampliação de mercado e o início das exportações com o ingresso nos Estados Unidos.

Atualmente, a Scheer Churrasqueiras e Parrillas é referência na produção de churrasqueiras e parrillas comerciais e residenciais, além de acessórios para churrasco, espalhando seu know-how para mais de 90 países, nos cinco continentes, com inovações patenteadas e certificações.

SINCE 1976 TAKING THE CULTURE OF BARBECUE TO THE WORLD!

In 1976, Darci Viapiana started the craft production of portable domestic barbecues, in Caxias do Sul, located in the south of Brazil.

Innovation has been in the business's DNA since the beginning: a car windshield wiper motor inspired this innovation to the market and, in this way, the skewers rotisserie system was created.

In the following years, the company kept researching and seeking the development of increasingly better and more efficient products. The factory grew, participation in trade fairs started, commercial representatives were added to the team and Scheer also began to attend the restaurants chain and steakhouses.

The technological vision represented the extension of the market and the beginning of exports with the first exports to the United States.

Nowadays, Scheer Churrasqueiras and Parrillas is a worldwide reference in the barbecues and parrillas market, present in more than 90 countries, on five continents, with patented innovations and certifications.
