

October is National Estate Planning Awareness Month

National Estate Planning Awareness Month is held every October to highlight the importance of planning for the future. The goal is to encourage Americans to create or update their estate plans to protect their loved ones and ensure their wishes are carried out.

An estate plan is a set of legal documents that outlines how your property and affairs should be managed in the event of your death or incapacitation. Without one, a court will decide what happens to your assets, a process that can be both costly and stressful for your family.

Did You Know?

- If you do not have an estate plan, the State of New Hampshire has one for you. If you die without a will, you are said to have died “intestate.” NH Statute RSA 561-1 dictates how your property will be distributed if you die intestate, and it may not be what you intend or expect.
- Only 32% of Americans have a will.
- Common estate planning documents are wills, trusts, powers of attorney, and healthcare directives. Do you have these in place?

Since the largest benefit of estate planning is peace of mind, GCSCC is providing the following program with our goal to provide possible sources for you to use to get the process going! Most of the options listed below are Free. We hope you will take advantage of these resources!
