

**Deutsche Schule
Jakarta** is one
of Indonesia's longest
established international
schools opening doors
to global study and
career paths.

The Education Advantage

What is the most important gift parents can give their child?
Most would say: **"The best education we can afford."**

Here are five key reasons why **Deutsche Schule Jakarta** may be the best choice for your child's educational journey:

01

> Educational Excellence

DSJ is a German government-supported school abroad (A-accredited SPK) offering world-class education – from Kindergarten to the German International Abitur (DIA), the university entrance qualification.

02

> Globally Recognized Curriculum

The German DIA curriculum (DIA) is your child's passport to study and career opportunities **anywhere in the world.**

03

> All Nationalities Welcome

We welcome students of all nationalities and language backgrounds, with a special International Program for children who start without prior German language skills.

04

> Germany's World-Class Universities

While the DIA is accepted worldwide, the opportunity to pursue **tuition-free study** at one of Germany's leading universities is a truly compelling choice.

05

> Fair School Fees

As a non-profit school supported by the German Government, DSJ is one of the most affordable and internationally recognized schools in Indonesia.

[01] The Foundation

The German International Abitur (DIA) provides a comprehensive foundation for any future field of study. It avoids early specialization, **giving students the freedom to keep all options open.**

Through our unique education path, highly qualified educators guide each child on a journey that engages mind, body, and senses. This holistic approach nurtures **curiosity, independence, and the development of strong life skills.**

[02] Made in Germany

German schools abroad stand for **academic excellence, rigorous standards, and strong values.**

This prestigious global network of 140 government-supported schools is known for high-quality education and international outlook. Its university entrance diploma – the **Deutsches Internationales Abitur** (DIA) – is globally recognized.

With the DIA, DSJ students gain direct access to universities worldwide, across all fields of study.

[03] Multicultural

As a **Begegnungsschule** – a school of encounter – we build bridges between cultures and promote international understanding.

We provide a friendly, multicultural environment that values and respects everyone's roots, traditions, and perspectives. The result: **confident, open-minded students prepared to thrive in tomorrow's global communities.**

Through our **International Program**, Indonesian and other non-German-speaking students can successfully complete the German DIA qualification.

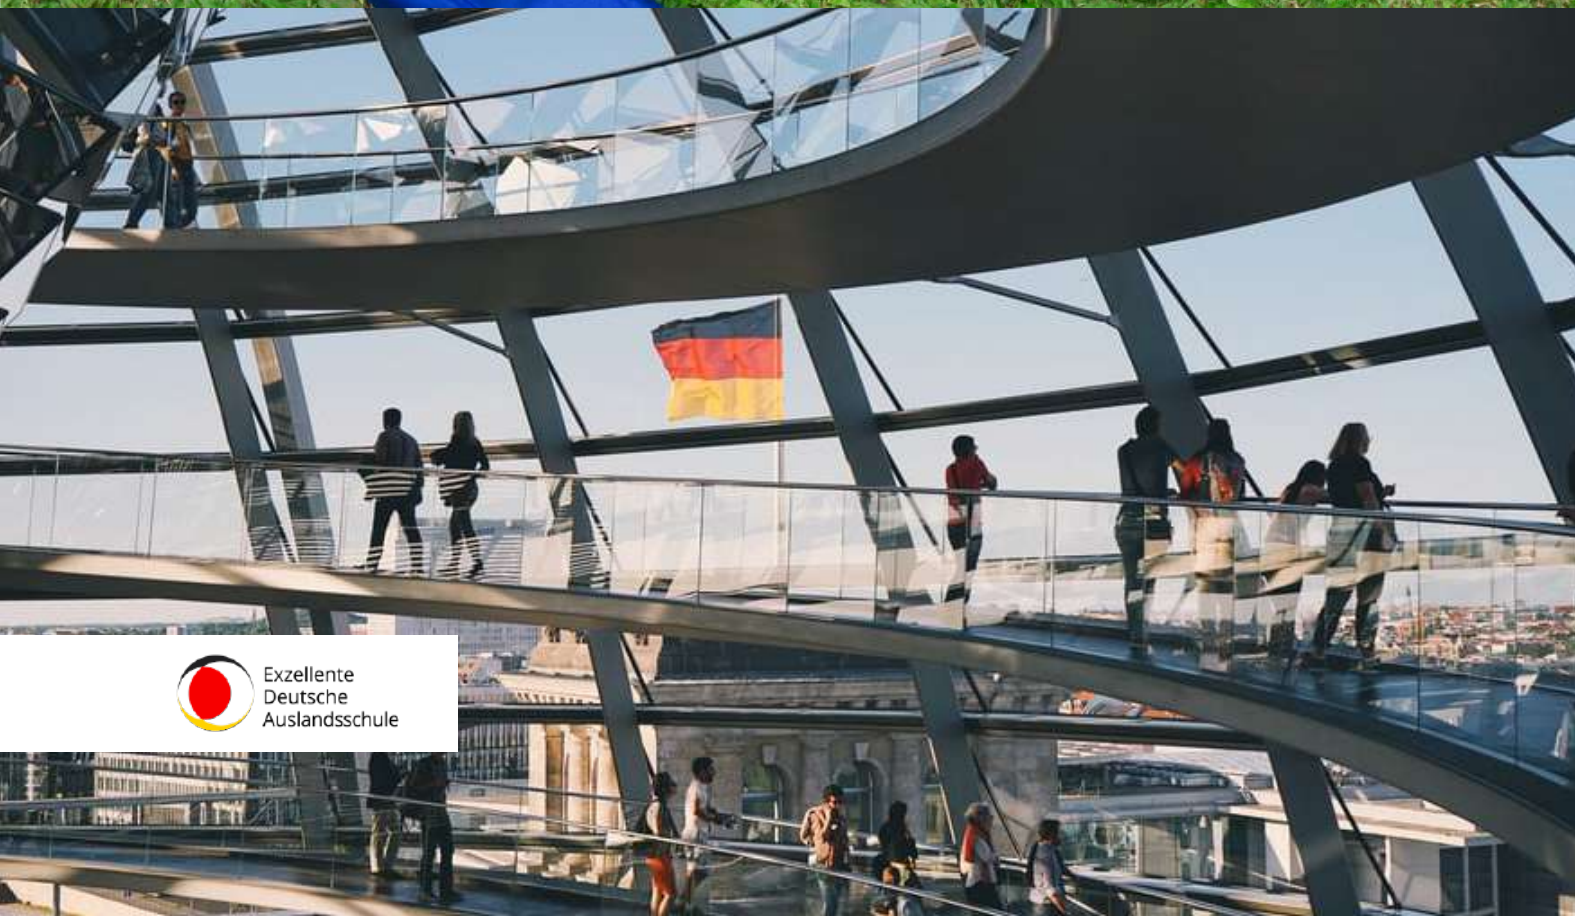

[04] Study for Free

Germany enjoys a stellar reputation in higher education, with over 400 world-class institutions.

In 2024, **21 German universities ranked in the top 200 worldwide** in the Times Higher Education rankings – placing Germany third globally.

Major draws for over 400,000 students annually include these outstanding institutions, the country's leadership in science and industry, diverse fields of study, and the fact that **public universities charge no tuition fees for local and foreign students.**

[05] Fair Fees

As a non-profit school, our focus is on students, not profits.

Good schooling has its price. And while DSJ provides highly qualified educators and outstanding learning facilities, our school fees remain significantly lower than those of other schools with a comparable offer.

Thanks to our non-profit nature and the financial support of the German Government, we are among **the most affordable, internationally recognized schools** in Indonesia.

[06] Green Campus

Since 1998, we have been strategically located in the heart of BSD, in a safe and green residential neighborhood.

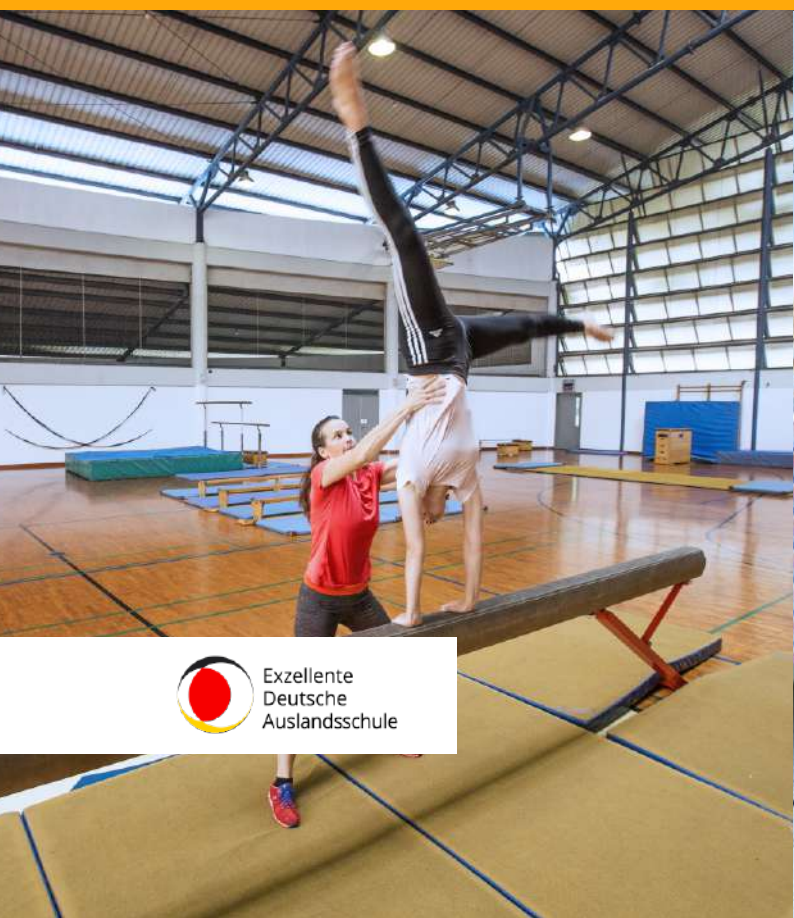

Our **42.000 m², park-like campus** is filled with large trees, open spaces, and outstanding facilities. These include a bright and spacious state-of-the-art school building with a **300-seat auditorium**, a modern **sports hall**, a **25-meter swimming pool**, **tennis courts**, and a full-sized **grass football field**.

Children also enjoy extensive playgrounds and the dedicated Kindergarten outdoor play park with its own **secure pool for the youngest learners**.

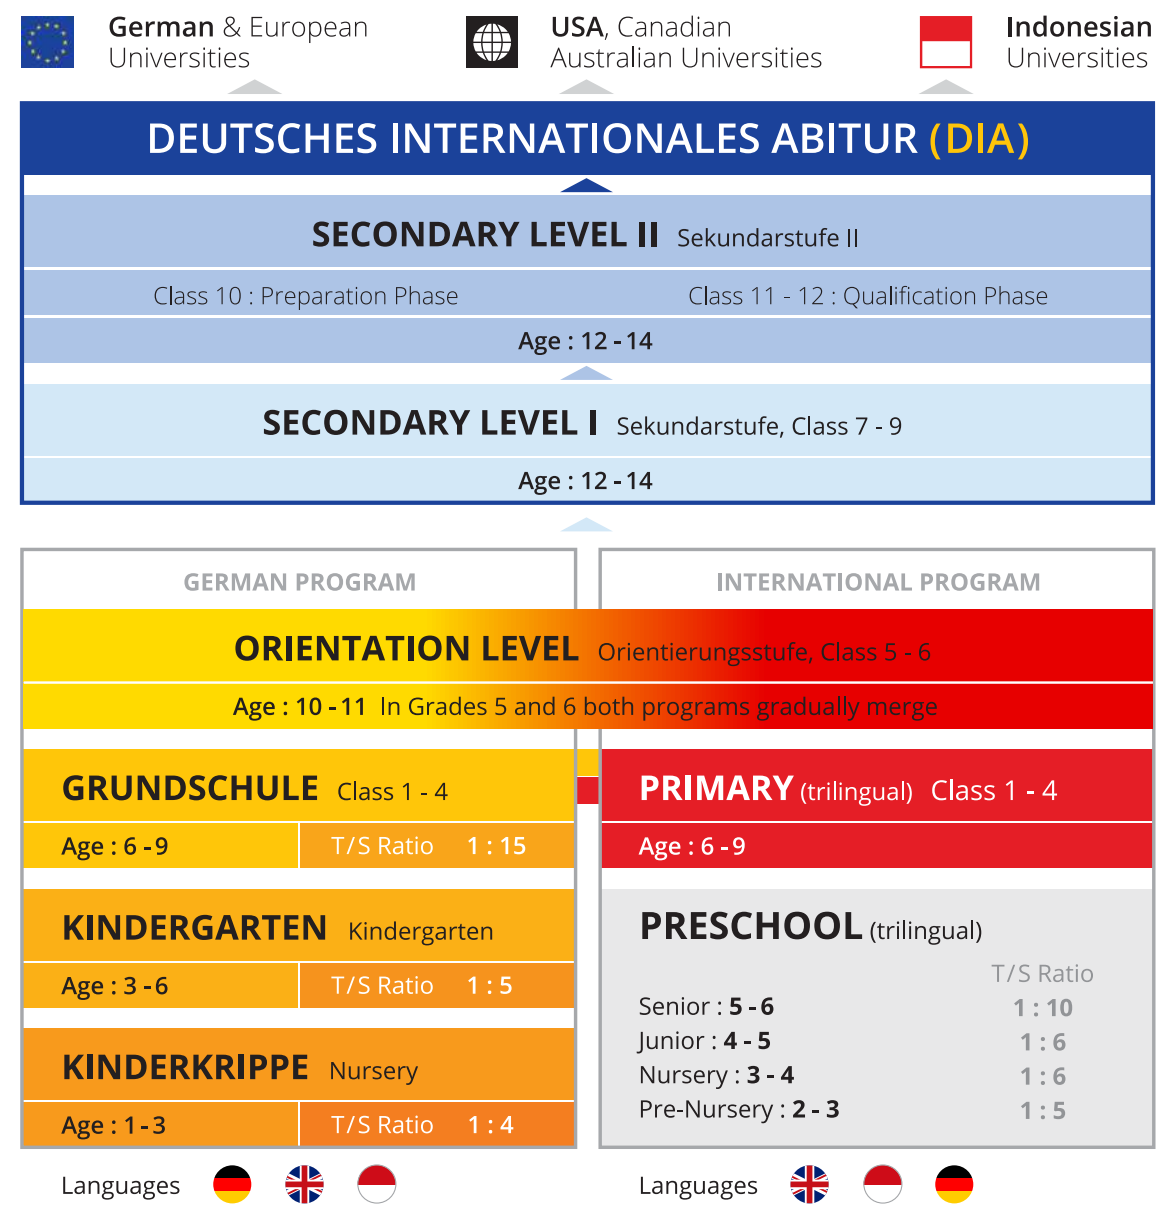

“This school does not only support the students in achieving academic success, it also teaches them how to adapt and survive regardless of where they are. Furthermore, their Abitur credentials are accepted at every well-known university.”

Ibu Shinta (Parent of former alumni)
