CAPABILITIES STATEMENT

COMPANY OVERVIEW

URSA Operations is a vertern-owned security firm delivering integrated defense solutions across cyber, physical, and maritime domains. We support national security missions through scalable technologies, advanced analytics, and mission-ready personnel. We combine this expertise with in-house engineering and Ai development to create cost-effective tools for modern threat environments, supporting federal agencies, defense contractors, and partner-nation forces. Ursa is actively engaged in national and allied defense sectors, with capabilities spanning Ai-driven threat detection, supply chain security, cyber-physical protection, and field-ready mission support.

DIFFERENTIATORS

- Dual-domain defense and security firm with an emphasis on cyber security.
- Veteran-Led with TS-Cleared Staff: Our personnel bring experience from USCYBERCOM, MARFORCYBER, and tactical defense units equipped to operate in cleared or contested enviornements.
- Purpose-Built Technology Stacks: We build and deploy rugged edge systems with integrated analytics and AI agents to support real-time security operations.
- Multi-Domain Integration: On team across cyber, physical, and maritime threats, delivering consistent, cost-effective performance across sectors.
- Scalable Deployments: URSA systems are designed to flex form small-site support to regional and cross-theater mission sets.

NAICS CODES

- **561621**- Sec Systems Services
- **541715**- R&D in Physical, Engineering, and Life Sciences
- **541690**- Other Scientific and Technical Consulting
- **541512**- Computer Systems Design Services
- **928110**- National Security
- **334511**- Search, Detection, Navigation, Guidance, Aeronautical, and Nautical System and Instrument Manufacturing
- **541614**- Process, Physical Distribution, and Logistics Consulting

CORE COMPETENCIES

Defense Solutions & Mission Support

- URSA delivers integrated security solutions designed for today’s complex defense enviornment. Our capabilities span mission-critical support, tactical integration, risk-based planning, and rapid deployment of field-ready technologies, serving DoD clients, defense contractors, and allied governments.

AI in National Security Operations

- We engineer AI-driven systems to support operational decision-making red team simulations, targeting assistance, and automated risk analysis. URSA’s agents and analytics help warfighters and mission planners maintain a tactical edge across physical and cyber domains.

Supply Chain & Maritime Security

- URSA supports defense and commercial supply chains with integrate surveillance, hybrid security deployments, and maritime risk monitoring. From port infastructure to transit lanes, we help partners detect deter, and respond to piracy, illicit trafficking, and infastrucuture threats.

Cyber-Physical Integration

- URSA blends offensive and defensive cybersecurity with physical security services for end-to-end protection of sensitive facilities and networks. We provide penetration testing, threat simulations, endpoint protection, and hybrid solutions tailored for defense and national securirty use cases.
