

# ZENITH

4 2.5 2

TRADITIONAL  
FACADE

Designed specifically with sloping blocks in mind, Zenith embraces the natural fall of your land to create a home that feels connected, considered and effortless to live in.

The clever split-level layout creates natural separation between living and private spaces, while making the most of the available footprint. With four bedrooms, multiple living areas, a dedicated office, workshop, generous kitchen, walk-in pantry and alfresco, Zenith is designed to adapt to busy family life.

Rather than fighting the slope, Zenith works with it – creating a home that maximises your block, adds character and makes every level count.
