

Laparoscopic Universal Smoke Evacuator

Legislative Wave Creating a New Standard of Care

Across the United States, surgical smoke evacuation legislation is being enacted to ensure a smoke-free environment for every patient and perioperative team member. **VIGeon provides an immediate solution to support compliance and enhance OR safety.**

A Cost-Effective, Surgeon-Friendly Product Solution

Captures Smoke at the Source

Proximal evacuation from the electrocautery tip improves surgical clarity and reduces exposure.

No Capital Equipment Required

Connects directly to your existing OR suction, no need to purchase large, dedicated machines.

Universal Compatibility

Adapts easily to all major energy-based surgical instruments.

Surgeon-Controlled Intensity

One-finger control design enables effortless real-time adjustment.

Ideal for Early Adopters & Policy Compliance

- Reduces smoke density by 86%
- Removes 99% of harmful VOCs
- Prepares your OR for upcoming legislation
- Supports internal policy improvements and staff safety initiatives
