“The Work of Greening the Chihuahuan Desert”

The Northern Chihuahuan Desert is changing. Rapid landscape shifts have triggered an alarming increase in dust activity and land degradation, with the frequency of dust storms in recent years rivaling the 1930s Dust Bowl.

In this upcoming presentation, Dr. Dhital breaks down why these storms are becoming more frequent and intense. Discover how we can move toward a more sustainable future through regional cooperation and innovative land management.
