KNIGHTS' CORNER

In the spirit of keeping the congregation informed, allow us to "backtrack" to Christmas, 2023, and share with you that YOUR Knights provided over 200 warm Winter coats, gloves, and hats for disadvantaged children in the Canutillo School district.

So, when we come to you requesting funds to support this yearly event please know it is a very worthwhile cause. Did you know that we also purchase wheelchairs for needy children and adolescents? If you are a male eighteen or older apply for Knighthood and share your time and talents to enhance our charity efforts!

Your Brothers in Christ,
Knights of Columbus, Council 12160, St. Luke

Why Worry About Trash in the Environment?

- Trash, including everything from plastic bags and paper to food waste, is generated daily by households, individuals, and businesses.
- Globally, the solid-waste management sector is usually one of the top three greenhouse gas emitters.
- Trash contributes about 5% of carbon dioxide emissions and up to 20% of methane emissions.
- Poor waste management can lead to disease transmission, respiratory problems, water and soil contamination, air pollution, and marine pollution.
- Worldwide, waste is increasing at an alarming rate, and its mismanagement is exacerbating the climate crisis.
- Some of the key sources of emissions from trash are carbon dioxide generated as waste decomposes and methane generated by the mismanagement of organic matter.
- When trash is safely isolated from the environment, the methane it generates can be captured.
- The mismanagement of waste also directly contributes to flooding and pollution. If it is not collected properly, it can block drains or canals and exacerbate flooding, which can aid the spread of diseases.
- Waste generation is rapidly increasing: by 2050 municipal waste is anticipated to outpace population growth by more than 200%.
- People in low-income countries generate one quarter of what high-income individuals generate daily.

Please join Care For Our Common Home for Earth Day on April 27 at 9:00 am to pick up trash around Franklin High School.

Become a member of the LAUDATO SI MOVEMENT – a ministry of prayer and action to engage Catholics in local parishes and people of good will in the community to work in ecological spirituality, sustainable lifestyles, and advocacy for climate and ecological justice. Animators work to put into practice the teachings of Pope Francis' LAUDATO SI and LAUDATE DEUM encyclicals on care for our common home. This online course begins on APRIL 19. Please, visit <https://laudatosianimators.org> to register and attend.
