- Improve and tightening the appearance of vaginal skin
- Improve your intimate experience
- Boost your self-confidence
- Relieve dryness and enhance sensitivity
- Reduce urinary leaks and incontinence

Start the conversation with your provider today!

What is *It*?

TempSure® Vitalia is a gentle radio frequency based treatment which enables non-surgical vaginal rejuvenation by delivering therapeutic heat to internal and external vaginal tissue to increase circulation and decrease pain and muscle spasms. The procedure is delivered using a probe specifically designed for your most sensitive areas.

In-Office Treatment

<30 Minutes*

No Downtime

Little to
No Discomfort

**Depending on the area being treated.*

How Does *It Work?*

When women age or become pregnant, they often experience hormonal shifts, often resulting in vaginal laxity, vaginal dryness, decreased sexual pleasure and urinary incontinence. TempSure® Vitalia works by reversing some of those unwanted changes by inducing collagen synthesis and elastin cells in the vaginal canal. Increased collagen in the vaginal wall leads to increased tightening and hydration.

What Does The *Procedure Feel Like?*

During treatments, the Vitalia handpiece is inserted into the vagina. The handpiece was carefully designed with patients in mind. The entire experience is comfortable and therapeutic. Treatments usually last less than 30 minutes, making it convenient to schedule during the day. After your appointment, you will be able to return to your normal routine immediately.

What Areas Can I *Get Treated?*

Cedar Grove Medical Associates gives our patients a non-invasive option for vaginal rejuvenation.

How Long Is *The Procedure?*

Treatments usually last less than 30 minutes, making it convenient to schedule during the day. After your appointment, you will be able to return to your normal routine immediately.

Work with your provider to develop a procedure plan that is right for you.

How Many Treatments *Will I Need?*

A series of treatments is always recommended. Every patient is different, so the optimal number of treatments can vary.

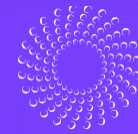

Work with your provider to develop a procedure plan that is right for you.

Is This Right *For Me?*

Every patient is different, when you come in for your consultation at Cedar Grove Medical Associates, your provider will create a custom treatment plan for you.
