**GENERAL INFORMATION:** RizonThrive is a formulation of potassium acetate, zinc, manganese, iron, fulvic acid and carbon energy source. It is designed to be foliar applied and is formulated as a usable plant food and energy source for improved crop safety and minimal corrosiveness. Zinc, manganese and iron are involved in the plant development and the regulation of sugars and starches throughout the plant. Estimated release pattern is 1 – 3 days after application. The fulvic acid will act as a safening agent to help minimize stress on the plant surface. The sugar source acts as an energy boost to the plant and will assist in maximize efficiency in utilizing nutrients.

**DIRECTIONS FOR USE: Foliar Application:** Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications for maximum performance. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. For field and row crops, apply foliar at a rate of 1 – 4 quarts per acre as the plant requires. Use in accordance with the recommendations of a qualified institution or individual.
