

The remains of the Decedent do not contain any of the Devices described in #5 on the reverse side.

OR

(Initials) As Authorizing Agent, I instruct the Funeral Home to remove each Device listed above and to charge for its services in making or arranging for such removal. Unless indicated directly below, the Funeral Home is to dispose of all such Devices.

The Devices listed are to be removed and returned to the Authorizing Agent: _____

6. CASKET OR ALTERNATIVE CONTAINER (SEE #6 ON LAST PAGE.)

Casket or Alternative Container Selected: _____

7. WITNESSES (SEE #7 ON REVERSE SIDE.)

(Initials) No witnesses.

OR

(Initials) _____
(List of Witnesses)

8. THE CREMATION PROCESS (SEE #8 ON LAST PAGE)

9. AUTHORIZATION TO CREMATE, PROCESS AND PULVERIZE

(Initials) As Authorizing Agent, I have read and understand the description of the cremation process contained in # 8 on the reverse side and authorize the cremation, processing and pulverization of the remains of the Decedent. I further authorize the Funeral Home to deliver the Decedent's remains to the Crematory for the purpose of the cremation.

10. FINAL DISPOSITION (PLEASE INITIAL THIS OPTION SELECTED)

(Initials) The Crematory shall deliver the cremated remains of the Decedent to the Funeral Home.

11. PERSONAL PROPERTY

All personal property and effects delivered with the remains of the Decedent to the Crematory, including jewelry, clothes, hair pieces, dental bridgework, eyeglasses, and shoes, will be destroyed in the cremation process or otherwise discarded by the Crematory, in its sole discretion, unless specific instructions for delivery to Authorizing Agent are given below.

Items to be delivered to Authorizing Agent: _____

12. CERTIFICATION AND INDEMNIFICATION

The Authorizing Agent acknowledges that the Funeral Home and Crematory are relying upon the representations being made by the Authorizing Agent in this authorization. The Authorizing Agent certifies that all of the information and statements contained in the Authorization are accurate and no omissions of any material fact have been made. The Authorizing Agent agrees to indemnify and hold harmless the Funeral Home and the Crematory, their officers, directors, employees and agents from any and all claims, demands, actions, causes of action or suits of any kind or nature whatsoever, including, but not limited to, any legal fees arising out of or resulting from the Funeral Home's and the Crematory's reliance on or performance consistent with the directions, statements, representatives and agreements contained in the Authorization.

Executed at _____, this _____ day of _____, _____.

Signature of Authorizing Agent: _____

Relationship: _____

Funeral Home Witness: _____

5. PACEMAKERS, IMPLANTS, AND PROSTHESES

Pacemakers, radioactive, silicon or other implants, mechanical devices or prostheses may create a hazardous condition when placed in the cremation chamber and subjected to heat. As Authorizing Agent, I have listed in #5 on the reverse side all devices (including mechanical, prosthetic, implants, or materials), which may have been implanted in or attached to the Decedent.

6. CASKET OR ALTERNATIVE CONTAINER

The remains are to be cremated in a combustible casket or alternative container that is capable of being completely closed, is resistant to leakage or spillage, is sufficiently rigid to be handled easily, and provides protection for the health and safety of Crematory and Funeral Home personnel. The Crematory is authorized to inspect the casket or alternative container, including opening it if necessary. In the event that the casket or container does not meet the above requirements, the Crematory will notify the Authorizing Agent. Many caskets that are comprised primarily of combustible material also contain some exterior parts (decorative handles or rails) that are not combustible and that may cause damage to the cremation equipment. As Authorizing Agent, I authorize the Crematory, in its discretion, to remove and discard the non-combustible materials. I understand that some crematories will not accept metal or fiberglass caskets. I further understand that the casket or alternative container will be consumed as part of the cremation process.

7. WITNESSES

Witnessing a cremation can be an emotional experience. Witnesses are assuming the risks involved and fully release the Funeral Home and Crematory from any liability. To the extent permitted by the Crematory, the persons listed on the reverse side are authorized to be present at the cremation room prior to and during the cremation of the Decedent's remains and during the removal of the cremated remains from the cremation chamber. If you desire witnesses, you must initial #7 on the reverse side and list their names.

8. THE CREMATION PROCESS

The cremation of the Decedent's remains may take place before or after ceremonies to memorialize the Decedent. Cremation is performed to prepare the remains of the Decedent for final disposition. It is carried out by placing the Decedent's remains in the casket or alternative container, which is then placed into a cremation chamber or retort where they are subjected to intense heat and flame. All cremations are performed individually. During the cremation process, it may be necessary to open the cremation chamber and reposition the remains of the Decedent in order to facilitate a complete and thorough cremation. Through the use of suitable fuel, the incineration of the container and its contents is accomplished and all substances are consumed or driven off, except bone fragments (calcium compounds) and metal (including dental gold and silver and other non-human materials) as the temperature is not sufficient to consume them.

Due to the nature of the cremation process, any personal possessions or valuable materials, such as dental gold or jewelry (as well as any body prostheses or dental bridgework) that are left with the remains and not removed from the casket or container prior to cremation may be destroyed or if not destroyed, will be disposed of by the Crematory. The Authorizing Agent understands that arrangements must be made with the Funeral Home to remove any such possessions or valuables prior to the time that the remains of the Decedent are transported to the Crematory.

Following a cooling period, the cremated remains, which will normally weigh several pounds in the case of an average-size adult, are then swept or raked from the cremation chamber. Although the Crematory will take reasonable efforts to remove all of the cremated remains from the cremation chamber, it is impossible to remove all of them, as some dust and other residue from the process will be left behind. In addition, while every effort will be made to avoid commingling, inadvertent and incidental commingling of minute particles of cremated remains from the residues of previous cremations is a possibility, and the Authorizing Agent understands and accepts this fact.

After the cremated remains are removed from the cremation chamber, all non-combustible material (insofar as possible) such as dental bridgework and hinges, latches, and nails from the container will be separated and removed from the human bone fragments by visible or magnetic selection. The Crematory is authorized to dispose of these materials with similar materials from other cremations in a non-recoverable manner, so that only human bone fragments will remain.

When the cremated remains are removed from the cremation chamber, the skeletal remains often will contain recognizable bone fragments. Unless otherwise specified, after the bone fragments have been separated from the other material, they will be mechanically pulverized. The process of crushing or grinding may cause incidental commingling of the remains with the residue from the processing of previously cremated remains. These granulated particles of unidentifiable dimensions, which are virtually unrecognizable as human remains, will then be placed into a designated container.
