

# LOUISVILLE PUBLIC NOTICE

## PUBLIC NOTICE TOWN OF LOUISVILLE -HYDRANT FLUSHING

Please be advised that the Town of Louisville Water Department will commence its annual hydrant flushing program beginning **Monday, May 11, 2026**, and continuing for approximately two (2) weeks.

This essential maintenance is conducted to ensure the proper functioning of fire hydrants and to maintain water quality throughout the distribution system.

During this period, residents may experience temporary discoloration of their water and a slight decrease in water pressure. While the discolored water is generally safe for consumption, it is recommended to avoid doing laundry during flushing hours to prevent staining. If you experience discolored water, please run your cold water tap until it clears.

We appreciate your patience and cooperation as we perform this important work to maintain our water infrastructure
