

HURFORD'S FLOORING RANGE

www.hurfords.com.au

SOLID HARDWOOD FLOORING

A solid Hardwood Floor is an investment for a lifetime. It not only adds value to your home but makes a statement of timeless style all on its own.

SYDNEY BLUE GUM

Eucalyptus saligna

A popular species for its beautiful colour, straight grains, strong and hard natural attributes. Making it sought after for both domestic and commercial flooring projects.

THERMALLY ENHANCED SYDNEY BLUE GUM

Eucalyptus saligna

A process using a unique temperature schedule through the drying process to create a colour palette that reflects a more scarlet intensity.

RED IRONBARK

Eucalyptus sideroxylon

A lustful red, Red Ironbark combines an inspiring cathedral grain pattern with a deep dark rough colour.

TURPENTINE

Syncarpia glomulifera

With beautiful deep chocolate reddish brown colouring, Turpentine is a floor that matches well with contemporary interior styling.

BRUSHBOX

Lophostemon confertus

Brings warmth, displays appealing features and matches well with modern elegant spaces. Brush Box has an even texture with very tight interlocking grain.

GREY BOX

Eucalyptus macrocarpa

Grey Box offers a palette that is best described as a combination of dark nutty honey through to soft wheat colours, and has an interesting cathedral grain pattern.

GREY IRONBARK

Eucalyptus paniculata

Offering a large variety of colour from dark chocolate to nutty honey with some dark reddish brown. Recognised as an extremely hardwearing timber, perfect for high traffic areas.

THERMALLY ENHANCED GREY IRONBARK

Eucalyptus paniculata

A process using a unique temperature schedule through the drying process to create a colour palette that reflects a more scarlet intensity.

SPOTTED GUM

Corymbia maculata

Spotted Gum is a rich individual timber, desired by architects and designers the world over, particularly for its striking backsawn grain structure, attractive fiddleback and vibrant colour palette.

QLD SPOTTED GUM

Corymbia maculata

QLD Spotted Gum has a large variation in colour. Boards can appear from a light-dark brown to a deep red. It is a slightly darker flooring to Spotted Gum.

SILVERTOP

Eucalyptus laevopinea

Being a contemporary neutral colour, Silvertop compliments well with a large variety of modern interior decors.

TALLOWWOOD

Eucalyptus microcorys

A gold honey tone with a tinge of olive green. Tallowwood is also free of gum vein with an interlocking grain.

**NEW ENGLAND
BLACKBUTT**

Eucalyptus andrewsii

Straight grained timber with a warm nutty hue which will compliment a range of interior designs where a lighter neutral palette is required.

**WHIAN WHIAN
BLACKBUTT**

Eucalyptus pilularis

While similar to Blackbutt, Whian Whian Blackbutt is of lighter appearance in colour. The colour range is subtle and is excellent where the colour requirements is light and neutral. Characteristics are alike to Blackbutt.

BLACKBUTT

Eucalyptus pilularis

Blackbutt has a colour ranging from a golden yellow through to pale browns. The colour range is subtle and is excellent where the colour requirements is light and neutral.

CYPRESS PINE

Callitris columellaris

The colour tones often represent a pale yellow with some exceptions of darker browns and will have distinctively small, tight knots throughout.

ROASTED PEAT

A high temperature thermally modified hardwood is obtained by using a custom designed heating program to alter the wood's molecular structure. Roasted Peat ranges from natural dark earth hues to dark chocolate tones.

ROASTED CAYENNE

A high temperature thermally modified hardwood is obtained by using a custom designed heating program to alter the wood's molecular structure. Roasted Cayenne has an intimate reddish bronze palette

Grade: Prestige

Profile: Secret Nail, Tongue & Groove, End Matched

Coating: Uncoated (Sand and coat once installed)

Size: 130mm x 14mm
*Roasted Peat & Roasted Cayenne 128 x 14mm (Different widths available on request)

Length: 650mm
*Roasted Peat & Roasted Cayenne 640mm (Different lengths available on request)

Coverage: 1.014M²/box
*Roasted Peat & Roasted Cayenne 0.983 M²/box

Packaging: 12 pieces per box – Left and Right Box

Install Over: Wood, particle board, plywood & plywood over concrete

American Oak

American Oak is a popular species for flooring due to its interesting and pronounced grain pattern. American Oak is also a species that takes stain extremely well, meaning that a multitude of colours can be achieved with little fuss. Hurford's import raw American Oak feed stock, and the timber is re-dried, treated, machined and graded.

American Oak is grown predominantly on the East Coast of the United States. All the White Oak raw material that Hurford's source is from reputable sawmills that practice sustainable forestry.

| | |
|---------|---|
| Species | American Oak |
| Grade | Prestige or Rustic |
| Profile | Top Nail, Tongue & Groove (End Matched) |
| Size | 130x19mm, 155x19mm, 180x21mm, 205x21mm & 220x21mm |
| Lengths | 600mm – 4500mm |
| Colours | Golden honey browns, some boards can have hints of soft pink tones. |

Nothing quite captures the romance of a beautiful hardwood floor, like genuine French Oak.

From the base in Vermelles, France, our own staff source sawn French Oak boards from boutique French Sawmills, through a strict forestry scheme. The sawn French Oak boards are then dried to the rigorous Hurford's standard before the final production and quality assurance phase. Hurford's genuine French Oak Solid Hardwood Flooring is graded to capture all the character and charm of this extraordinary resource.

THE IMPORTANCE IN SELECTING THE RIGHT FINISH FOR YOUR FLOOR.

Choosing Hurford's high quality solid hardwood flooring is an important step to having a beautiful floor installed in your home, but choosing what finish is applied on top of it can make all the difference to the look and feel. Finish choices are developing at a rapid pace and products that give a more natural deep earthy tone are becoming popular.

Blue Gum with
Water Based Finish

Blue Gum with
Oil Based Finish

The above example shows 2 panels of Sydney Blue Gum Flooring with alternate finishes applied. A water based finish gives a lighter appearance whereas an oiled finish brings out a darker tone. These examples are only indicative however they show that a deeper red colour can be achieved depending upon the finish that is applied.

It is recommended to test different finishes on offcut flooring pieces to finalise your finish choice.

ENGINEERED FLOORING

Experience the natural beauty of real wood with the durability and versatility of modern engineering of Hurford's Engineered Flooring ranges for a stunning and long-lasting flooring solution.

SHOWCASE THE NATURAL BEAUTY OF OUR AUSTRALIAN SPECIES WITH OUR NEW UV LACQUER RANGE OF FLOORING.

The new 'Invisible' UV Lacquer finish helps to bring out the warm, gentle feel of our Blackbutt flooring while the addition of non-yellowing agents ensure that your floor will maintain a clear look throughout its lifetime.

The vibrant richness of colour found in Spotted Gum flooring lends itself to a traditional UV Lacquer finish which helps to accentuate the impressive spectrum of colours available in this timber.

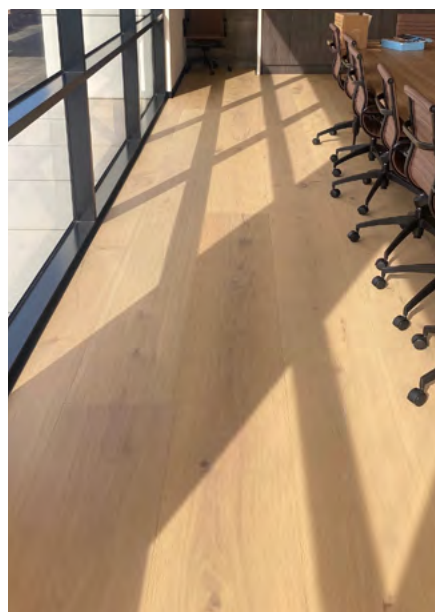

LUXURY IN ANY SPACE BRINGS THE FEELING OF STYLE AND SOPHISTICATION, AND STARTS FROM THE FLOOR UP.

First Floors is a premium engineered floor, with its slightly textured surface and modern matte oil finish it is the perfect choice for interiors of distinction. With the coastal golden rays of Blackbutt, the attractive wild warmth of Spotted Gum and the deep rich tones of Roasted Peat this boutique collection offers only the finest from our Australian species.

Roasted Peat, is an Australian Hardwood that has been through a thermal modification process that uses no chemicals to permanently alter the structure of the wood fibre. This process greatly increases the stability and density of the hardwood, as well as locking in the gorgeous deep earth to chocolate brown colour tones.

We use a stable hevea core along with native Australian hardwood lamellas to provide a consistent and sturdy construction in all our flooring.

Choose from one of our prefinished options for long lasting and easy-to-maintain protection or take advantage of the high degree of flexibility offered by our raw timber to perfectly match your floor to its surroundings.

Caring for your Engineered Floors

It is important that your floor is appropriately cared for and generally this just means some common sense precautions and using the right products and practices.

Cleaning your floor: Antistatic mops provide an effective means of collecting dust and grit for your daily cleaning. For a deeper clean, use a microfiber spray mop that is compatible and safe for timber floors. Steam mops must not be used. Never use excess amounts of water, oil, soap, wax or other household products to clean your floor, only use neutral pH cleaners. Loba is a company that provides suitable floor care products. Vacuum cleaners can also be used but with a need to ensure that the bristles are not worn to avoid scratches. If a spill or leak occurs, soak up the bulk of the liquid quickly so as to reduce the risk of staining.

Preventing scratches and indentations: To prevent dirt, sand, grit and other substances from being tracked onto your floor, use doormats outside each entrance to your home. As added protection floor mats can be placed inside at external doorways. However, ensure that these are not rubber-backed, latex-backed or coco fibre, which can stain the floor beneath.

Felt protectors are to be used under furniture legs and in particular moveable furniture that more easily cause scratches. In offices, casters (type W) and floor protection mats under chairs can be used to prevent the castors from marking the floor. Support larger furniture with wide-bearing, furniture floor protectors. Ideally, these protectors should be at least 25mm in diameter, made of non-pigmented hard plastic, and are to rest flat on the floor.

High heels and shoes with gravel and grit stuck on them can damage any floor. We suggest using rugs and runners in high traffic areas. Remember to shake out rugs and vacuum regularly. Your furry friends can also scratch your floors, so be sure to have your dog and cat toenails regularly clipped.

If you need to move heavy furniture and/or appliances across the floor, always use strips of wood or hardboard 'runways' to protect the floor. Use the 'runways', even if you have an appliance dolly or with heavy items that have their own wheels or rollers.

Care with substances: Some household substances can be very aggressive and damage the board coating. While damage from some products would seem more obvious, there are others that are much less obvious. Applied flea treatments for pets, drips from wall mounted air fresheners, insect repellents or concentrated insect sprays and ironing sprays, along with others can all damage the coating. Cleaning products must also be neutral pH and free of the likes of eucalyptus oil, which acts as a slow solvent. It is therefore important that correct cleaning products are used and that consideration is given to other products that may contact the floor.

If a substance contacts the floor which may be of concern it is important to attend to it as soon as possible, as with time greater damage often occurs. Dab the substance with an absorbent tissue or paper towel. Do not wipe it up, as this will spread it. Once absorbed wipe over with a wet paper towel containing a diluted mild detergent.

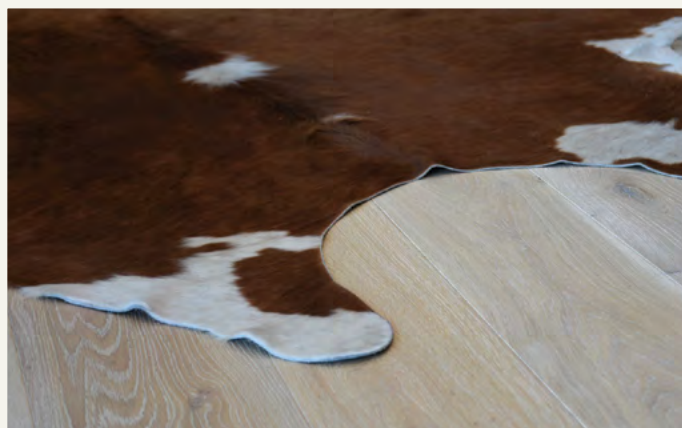

The internal environment: Changes in humidity cause floors to expand and contract. While floors can be expected to perform well in temperatures from 10°C to 32°C, and relative humidity levels between 40% and 70%, prolonged very dry or very humid weather can cause changes in the board's appearance (e.g. a crowned appearance, minor splits in the surface layer, end or edge joints becoming raised). When possible, during those times of more extreme weather conditions, protect your floor by controlling the heating and cooling, to create a comfortable living environment, maintained within the bounds outlined above

Intense sun exposure: Having your curtains and blinds closed during periods when floor areas would be subject to intense sunlight is also prudent to lessen the rate of colour change in the floor and to limit the development of minor surface splits (or checks). Window tinting and sun filter curtains are also good alternatives that help maintain an acceptable internal climate for your floor.

Note that both the timber and coatings change colour with time. We often see fading in fabrics with sun exposure and with timber floors there can be a similar effect. The change in colour is often not noticeable but when floor rugs are lifted there can be distinct colour tone differences. With new floors, the colour change is more rapid and the changes then slow with time. To lessen the effect, floor rugs should not be placed until three months after installation.

Repairs to damaged floors: Depending on the damage, there are options for repair and it is always beneficial to have a spare box of boards available in case there is a need for board replacement. Minor damage such as chips out of a board or larger indentation can often be repaired with a wax stick of a similar colour tone to your floor. Some companies also specialise in surface repairs and use a number of different

wax colours to blend the repair in. If damage is more extensive then boards can be replaced. The possibility of a recoat can also be considered which range from sacrificial polishes to two component water based polyurethane finishes. The preparation needed and process used will differ depending on the coating system and the engineered product, so it is necessary to discuss options with your flooring professional.

Warranties: Hurford's and quality go hand-in-hand. All of our engineered floorings come with a 25 year structural integrity warranty, as well as a 15 year domestic or 5 year commercial surface warranty. Full warranty details for your product can be accessed from Hurford's website. It is also important to remember, timber is a natural product with its own story. Individual boards will vary in colour, tone and features. This variation is what gives timber flooring its natural beauty and appeal.
