

PEPP represents a complete source of prehospital medical information for the emergency care of infants and children. Developed by the American Academy of Pediatrics, PEPP is an exciting curriculum designed to teach prehospital professionals how to better assess and manage ill or injured children.

The 4th Edition BLS PEPP is a comprehensive, innovative, and highly visual course featuring case-based lectures, live-action video, hands-on skills stations, interactive games, and small-group simulation. Although the course targets EMRs and EMTs, all provider levels are welcome!

Upon successful completion of the course, the student will be awarded CAPCE CEUs that can be used for LCCR and ICCR

Pediatric Education for Prehospital Professionals BLS Course
