

CREATE BEAUTIFUL GARDENS TO KEEP OUR WATERS CLEAN

DESIGN A NATIVE GARDEN

Native gardens are beautiful, save water, reduce need for fertilizer, and provide wildlife & pollinator habitat.

CREATE A RAINGARDEN

Raingardens filter storm water runoff from streets and rooftops before it enters streams, ponds, and lakes, keeping waterways clean!

STABILIZE SHORELINES

Native plants have long roots that reduce erosion, filter out pollutants, and discourage geese from gathering.

Join us for a **FREE Landscaping for Clean Water presentation!**

See dozens of beautiful, affordable garden designs, learn about the benefits they provide, and get an introduction to how you can get started on your own project.

After attending, you are eligible to attend a Design Course, where you'll receive expert 1-on-1 help to design your own project and apply for a grant of **\$400 & on-site assistance**.

The Introduction to Clean Water class begins at 6 p.m. (unless otherwise noted) and will be in-person or online via Zoom.
