Safety for people and goods

Fork lifts are used in almost all businesses to guarantee an optimum in-house material flow. The applications concerned place big demands on the chains used. The vehicles are expected to work indoors, outdoors and in all weathers. We collaborate closely with our users to ensure that our chains are not only configured to do the job required, but also to fulfil every safety requirement for your staff and your goods.

iwis antriebssysteme regards itself as a **development partner** and technology leader who can help you to meet the challenges facing you. **State-of-the-art simulation and configuration tools developed in-house** help our design engineers to decide on the right products at an early stage.

A comprehensive range of measures is in place to ensure that iwis chains are always manufactured to the highest quality standards.

Highlights

- iwis is a system supplier for chains, guide rollers and connecting material
- Quality assurance and documentation in accordance with Machine Directive 2006/42/EC
- Extremely high dimensional accuracy of external chain width and plate thickness
- Wide range of products
- Elongated workbenches
- Improved cost-benefit factor for higher profitability
- Local customer care by iwis staff
- Common chain types always in stock to ensure immediate availability
