

ONLINE LEADERSHIP COACHING FOR GROWING LEADERS

EXECUTIVE COACHING

Level-up your leadership skills and discover the power of individualized coaching with a leadership veteran!

Executive Coaching is a six or twelve-month program designed to equip any growing leader with insanely practical tools that will increase your credibility and influence as a leader.

Tailored Profile

The integrus360 Profile is a data-driven, proprietary, behavioral tool based on decades of research. Our profile is more robust than personality tests, which typically end up boxing leaders into unchangeable traits. While many assessments become static reference points to describe the way you lead, our profile empowers you with self-awareness for team alignment and mission acceleration.

Practical Growth Plan

Your executive coach will customize a growth plan for your season of leadership—we call this your Traction Plan. Your Traction Plan will be specific, actionable, and effective. You'll always know where you should focus your efforts and the exact next steps to take to accelerate toward your goals.

Experienced Coaches

Integrus coaches eat, sleep, and breathe leadership development. They have been in the trenches for decades and have a singular focus: strengthening you with insanely practical tools so that you can fulfill your God-given mission.
