Custom Foam Products, Inc. is an innovative fabrication company specializing in foam materials for a broad range of applications and a variety of markets.

Since 1998, we have built a sound reputation for maintaining high quality standards as well as on-time delivery and competitive pricing.

We fabricate foam products in virtually every shape, size and configuration using expanded polystyrene (EPS), polyethylene, cross-link polyethylene, molded polyethylene, polypropylene, polyurethane, neoprene (chloroprene) rubber, anti-static foams, foam with PSA and plastic corrugated.

Custom Foam currently services the needs of the market in the following industries: automotive, medical, upholstery, electrical, consumer products, electronics, and many others.

Custom Design Solutions

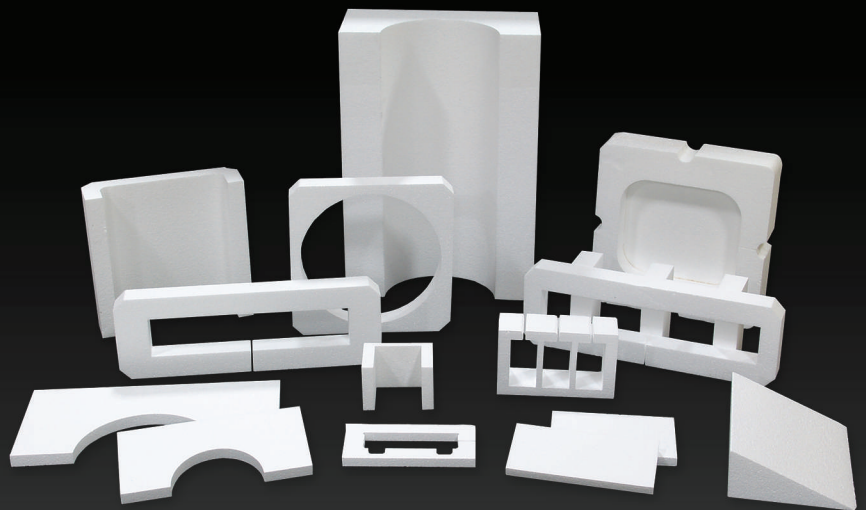

Custom Foam Products, Inc. offers complete design assistance from concept thru delivery. Support which includes evaluation of project requirements and goals, selection of materials, design and development of prototypes with cost analysis in mind, and customer satisfaction at a competitive price. Our engineering department operates under the latest version of CAD technology available for design and development. In addition, Custom Foam continually assesses new products, applications, and fabricating methods to ensure you are offered the most effective product and ideas on the market currently.

At Custom Foam Products, we are committed to providing exceptional customer service thru our team of office staff, skilled engineers, and craftspeople. With a state-of-the-art manufacturing facility, utilizing current technology and equipment, Custom Foam Products ensures our customers are receiving the quality and service they deserve at a competitive price. We look forward to assisting you with your foam fabrication requests.

Custom Foam Products is QS 9000 compliant and follows stringent quality control standards. We are dedicated to assuring that your specific product requirements are met and we certify products and parts, as required, according to your specifications. In addition, we document complete, detailed and accurate information on material specifications, such as density, grade and I.L.D.

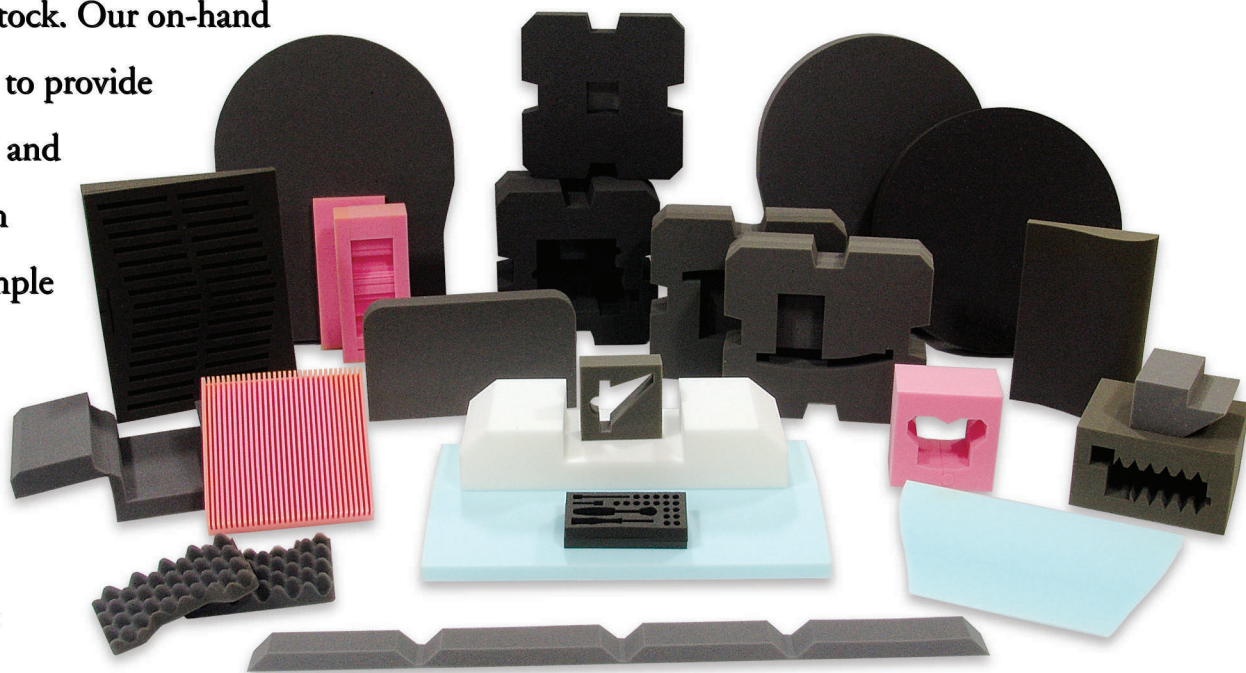

We offer a full line of versatile foam products for a wide range of applications and industries.

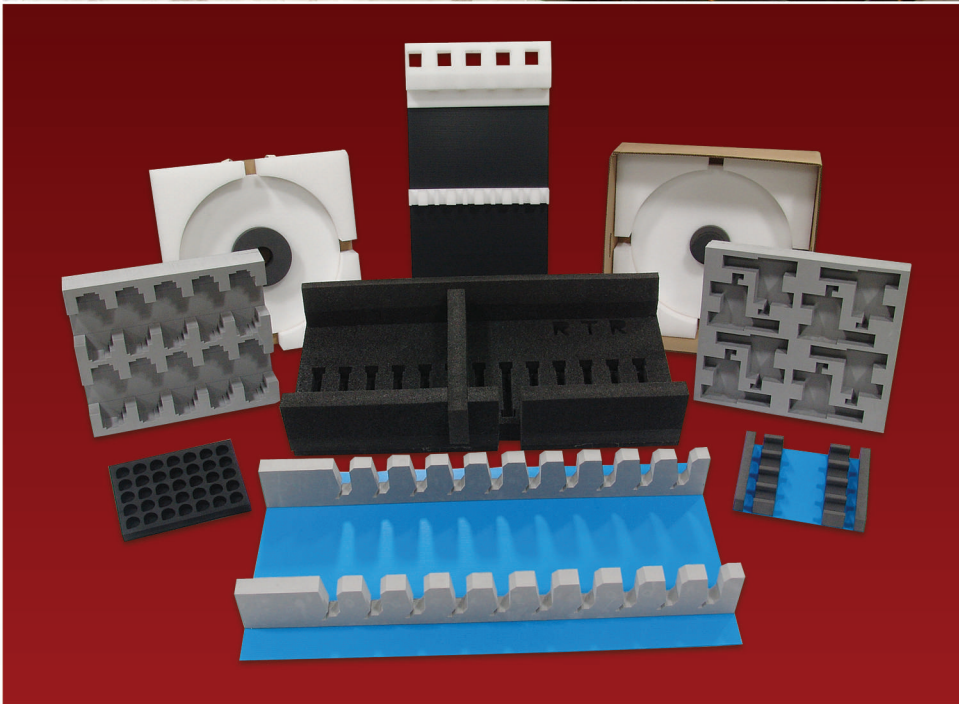

- Cross-Link Polyethylene
- Polyethylene
- Molded Polyethylene
- Expanded Polystyrene (EPS)
- Polyurethane
- Polypropylene
- Neoprene
- (Chloroprene) Rubber
- Anti-Static Foams
- Foam with PSA
- Plastic Corrugated
- UL Listed & Certified (File #E325191)

Manufacturing Facilities

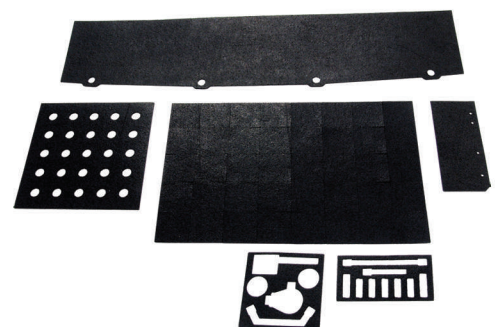

A key competitive advantage that allows us to offer the highest level of customer service is the warehousing capacity we have in our 48,000 square foot facility. We are able to keep large quantities of standard and special materials in stock. Our on-hand inventory enables us to provide quicker turnarounds and shorter lead times. In addition, we have ample space to accomplish any size project efficiently and effectively with the latest equipment in a clean work environment.

Fabrication

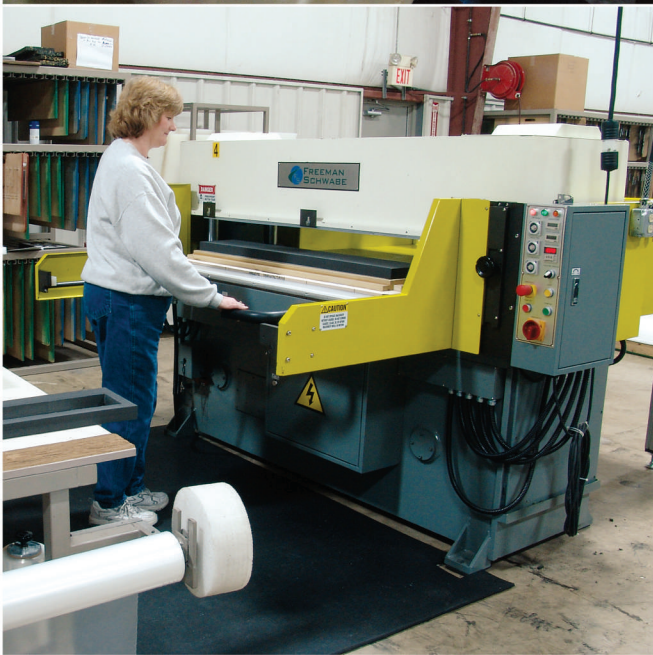

Our fabrication capabilities include sheeting, skiving, slitting, sawing, convoluting, contouring, profiling, and die cutting, while our assembly methods entail gluing (hot melt rollers and guns), urethane spray adhesive, and heat welding. Custom Foam is a UL Certified repackaging and Manufacturing facility UL File #E325191. Our capabilities are continually expanding to meet the highly specialized requirements of our customers' demand. Please call for more information.

Supplier for Almost Every Type of Industry

Delivery

Custom Foam Products provides value-added service of on-time delivery. With our dedicated drivers and company-owned delivery trucks, we provide a flexible service that saves time and money. With direct control of delivery, the result is customer satisfaction with a product delivered on time, every time.

We Recycle!

Custom Foam Products is doing its part to be "Green." We have a Bailer on-site that we use for our waste. The bailing process allows us to recycle discarded material, helping to reduce your cost and save on waste.
