2-YEAR WARRANTY

NEWS

NEW POWERTRAIN

Born from the expertise of the EM R&D department, the new powertrain represents a major step forward in the world of electric off-road riding.

On one side, the 3.8 kWh battery — developed for the X+ range — offers an exceptional weight-to-capacity ratio, eliminating compromises between range and agility.

Compact, lightweight and durable, it takes riders further, for longer, without ever limiting their freedom.

On the other side, the new motor redefines the feeling of electric riding. More control, enhanced feedback, and refined power management give riders a smoother, more progressive, and more precise bike when tackling obstacles.

With 40% more inertia, this new setup brings added smoothness, flexibility, and efficiency — all while preserving the raw performance of EM's motor.

NEW SWINGARM

The Epure Race, Epure FACTOR-e, and Escape R models are now equipped with the new swingarm.

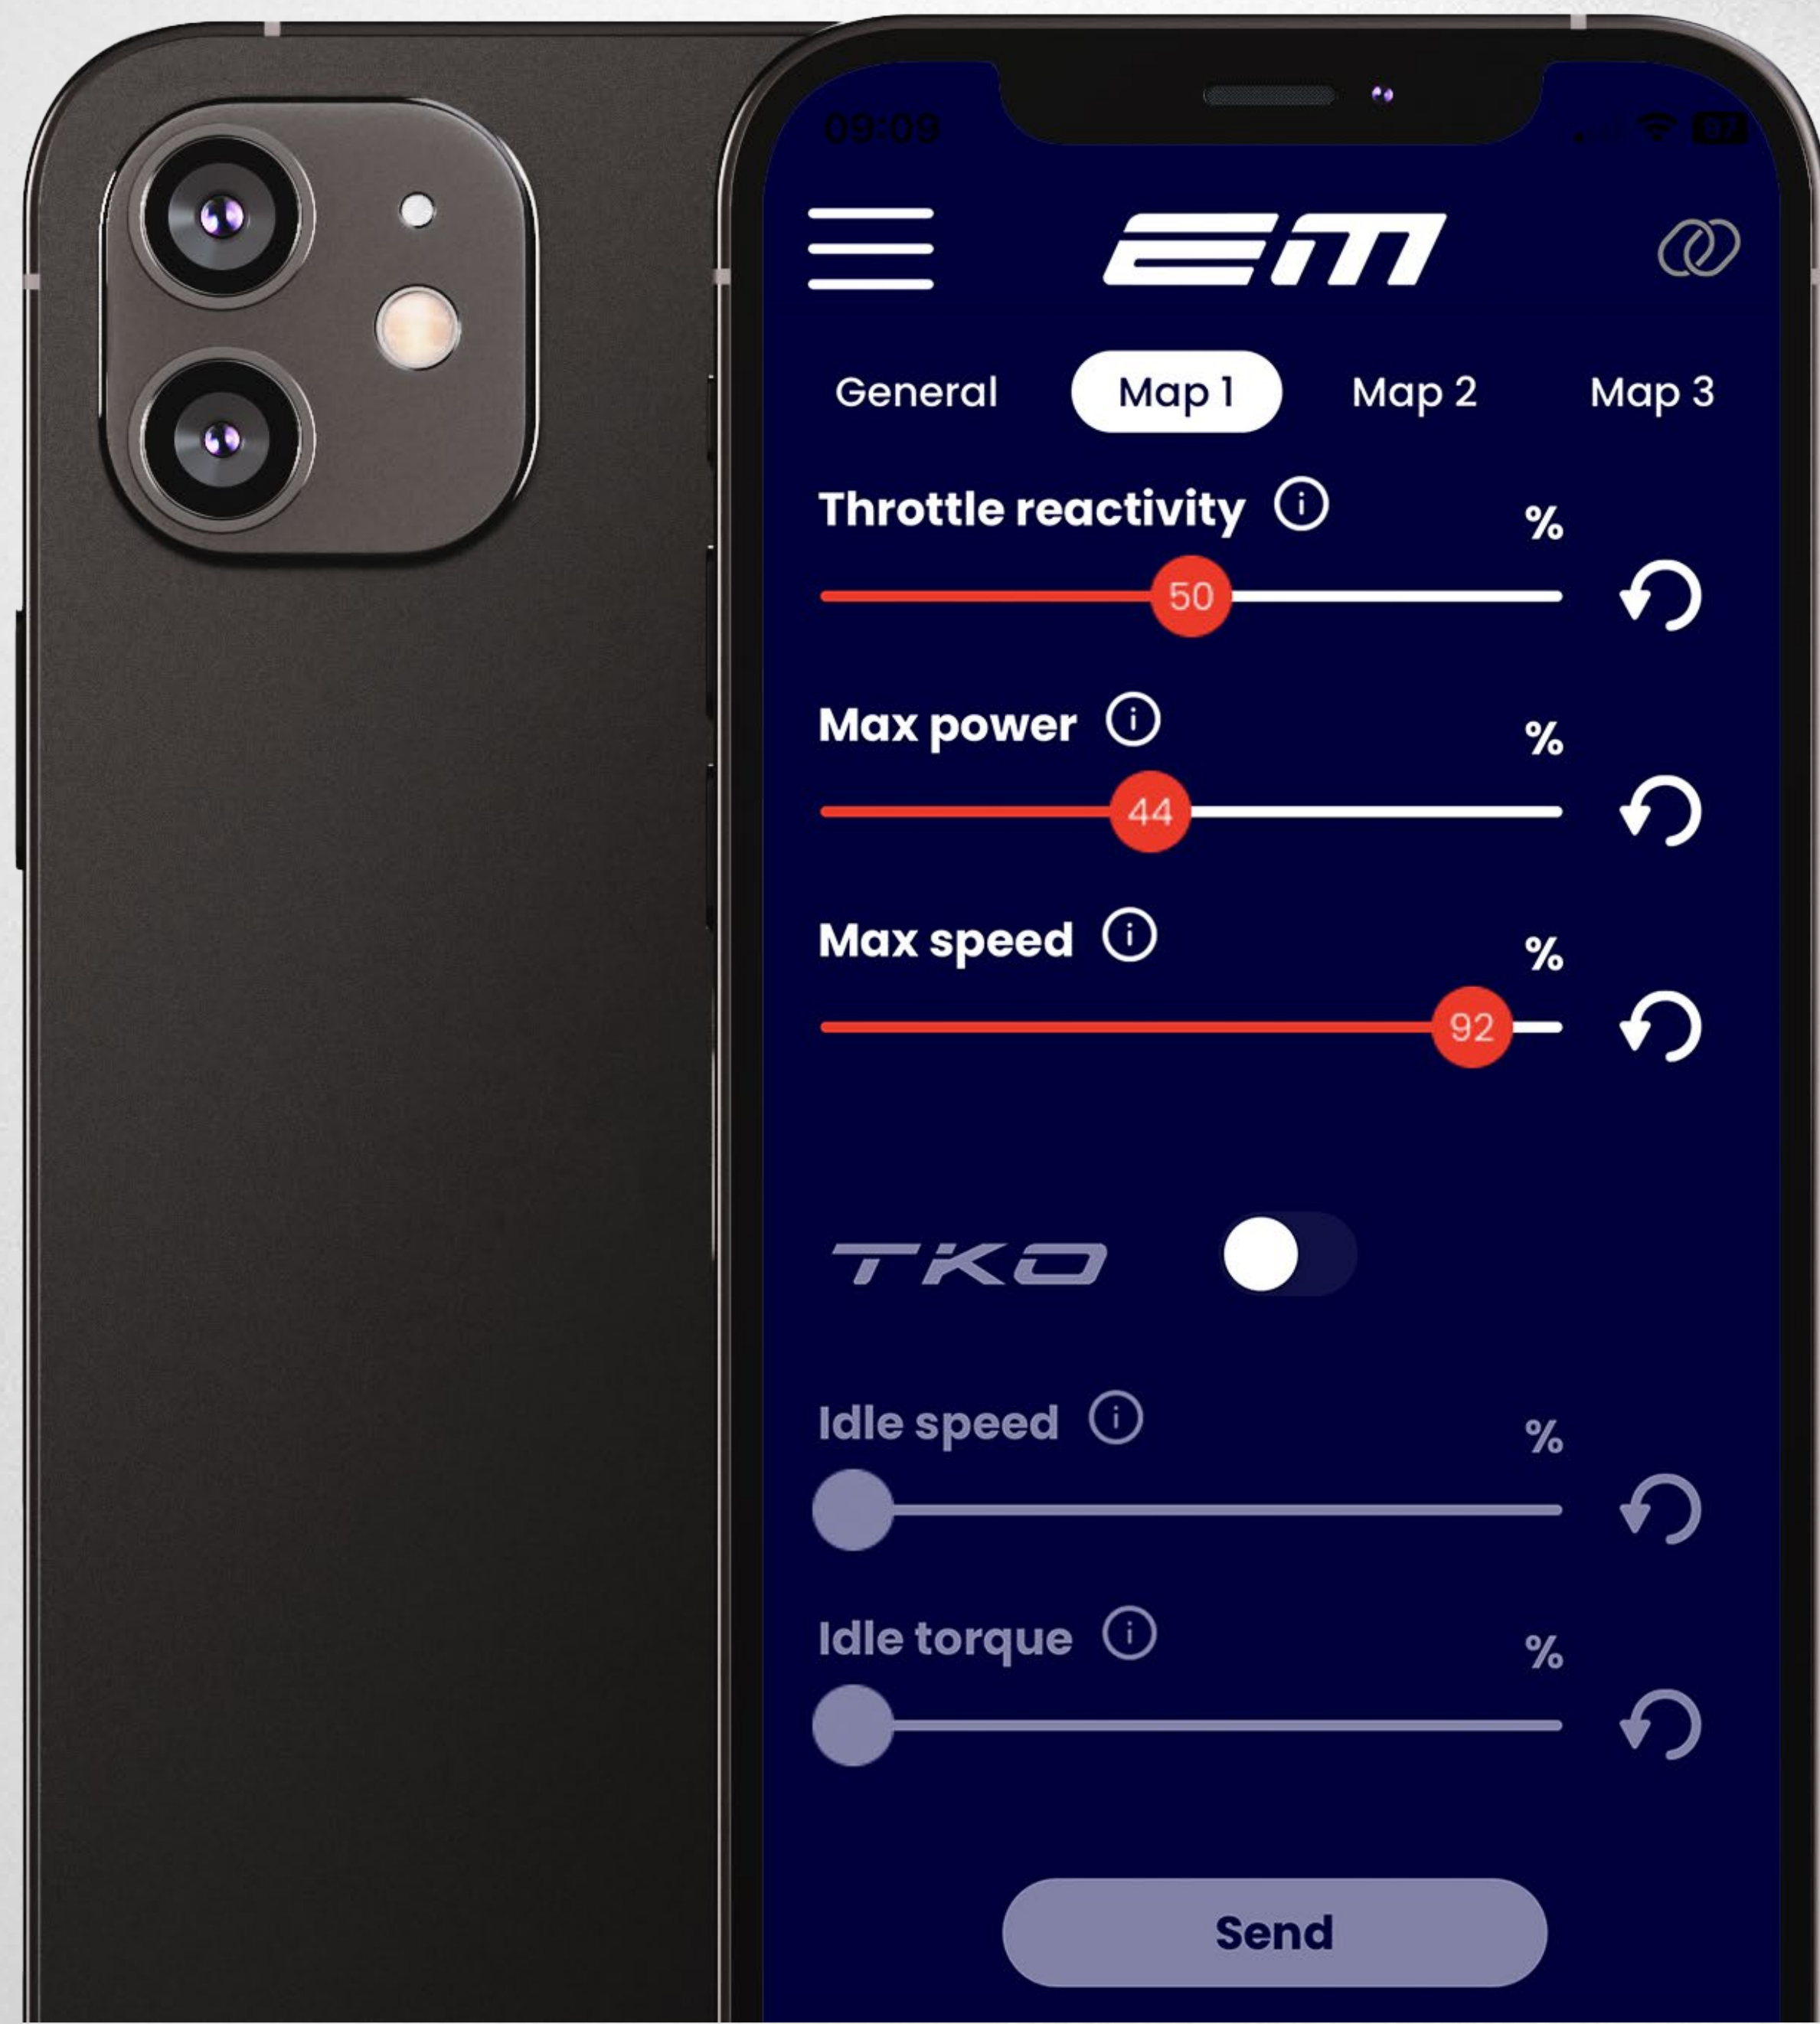

Developed by the EM engineering team, this brand-new swingarm is 300 grams lighter than the previous version, offering greater protection, improved robustness, enhanced traction, and an all-new adjustment system.

Finally, this new swingarm also features a redesigned kickstand, along with its lightweight, forged mount.

NEW DESIGN

More than ever, the design has been completely reworked for the 2026 range. Each model features a brand-new decal kit with exclusive colors for the year. The swingarm has been fully redesigned, along with the chain guide and sprocket cover, delivering a sharper look and even more refined finishes.

EM CONNECT

Simple and user-friendly, the EM Connect app is available on your phone (iOS & Android).

This feature opens the door to personalized and tailored settings. Multiple functions are available: power, responsiveness, lock & unlock, TKO management, and more.

Additionally, the EM Connect app provides a simple way to monitor your bike's status and communicate directly with EM and your official dealer.

Stay in control with EM Connect!
