JULY 2025

GREAT FUTURES IN PROGRESS

WORKFORCE READINESS CENTER UPDATE

Construction is officially underway on the 16,560-square-foot addition to the Terry Erickson Club! This expansion will soon become our Life & Workforce Readiness Center, a space designed to empower members with career exploration opportunities.

Thanks to the incredible generosity of our community, we are making meaningful strides toward building brighter futures for youth in La Crosse County. **While we've made significant progress, we still need your support to reach our goal.**

Our new center, set to open in winter 2025, will provide members with hands-on opportunities to explore high-demand careers, develop real-world skills, and build valuable connections with local businesses. We can't wait to welcome our members into the new center and continue growing our impactful programming!

CAREER CAMPS

Even while under construction, our mission continues. This summer alone, **over 200 middle and high school members across our Clubs will participate in career camps** that engage them in hands-on projects in fields like healthcare, finance, trades, and more with local partners and field experts. These experiences are just a glimpse of what's to come!

"I didn't think I was interested in being an electrician until I got to install a light and see how it works." - Brenengen Club Teen

***"I learned I like to work with my hands and using power tools was AWESOME!"
- Mathy BGC Teen***

"The stock market was actually fun to learn about, especially when my team won the simulation." - Skogen BGC Teen
