FALL 2025

BUILDING GREAT FUTURES

WORKFORCE READINESS CENTER UPDATE

We had a busy summer collaborating with our program partners to design spaces for our upcoming workforce center addition. Their expertise has been valuable, and we're excited to share that construction is on track to be completed this winter, with programming launching shortly after!

In anticipation of the building's opening, we've piloted a wide range of career exploration programs for members. This summer, over **250 members** participated in Career Camps and we're aiming to double that number next year!

As we prepare to go public with our campaign this fall, we need your help to spread the word. We're still actively raising funds to bring this initiative to life, and your support makes a big difference.

Enjoy the recent drone footage of the project by clicking on the "watch now" button above and see our "Kids In Construction" news highlight from the summer!
