Hair Regeneration

Stem Cells introduce a pathway to REGENERATIVE MEDICINE in the office setting utilizing cryopreserved amniotic fluid. PalinGen SportFlow is an allograft, that has been tested prior to and after processing to ensure a healthy, clean, safe cryopreserved product. Amniotic fluid is known to contain collagen substrates, growth factors, amnio acids, carbohydrates, and cytokines needed for hair follicles to repair and regenerate. This membrane is rich with basic components necessary for tissue repair, and provides an anti-microbial environment, anti-inflammatory characteristics, with anti-adhesion and anti-fibrotic properties.

What does Stem Cell & PRP Therapy Do?

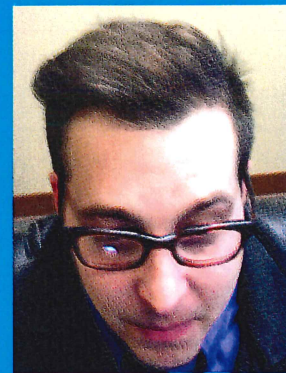

Platelet Rich Plasma (PRP) is a treatment used to regenerate hair growth. PRP is blood that has been concentrated with platelets. These concentrated platelets contain growth factors and proteins which help increase circulation to the hair follicles, stimulate the hair follicles to grow, and even thicken the hair shaft. Platelet Rich Plasma (PRP) has been used by cardiac and orthopedic surgeons for 30 years. In recent years PRP is being used to generate hair growth.

Before & After Photos

We use a Superior PRP Production System

We currently use the ClotMaster system to produce PRP. There are many benefits to the ClotMaster System:

- 10 minute Prep Time
- Less Pain and No Additives
- Slow Natural Release of Growth Factors
- Rich in Platelets
- Rich in Growth Factors

ClotMaster has the Highest Platelet Capture Rate

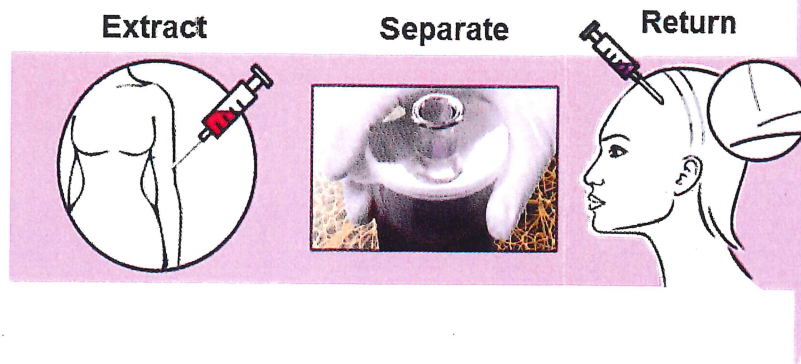

As Seen on the
National Television Show,
"Good Morning America"
on 10/8/15

What is the Process for Stem Cell & PRP Therapy?

- A small amount of blood is taken from the patient to produce PRP
- The scalp is cleaned and numbed with local anesthetic
- PRP and Stem Cells are injected via syringe.
- The PRP and Stem Cells then stimulate the growth of the follicles and create new blood vessels.

Results
Rejuvenate
and
Repair Hair
Follicle

Simple Non Surgical Procedure

**Stem Cell & PRP Therapy Offer the
Potential to Repair and Regenerate
Hair Follicles**

- Safe and Reliable Results
- Very Quick Recovery Period
- Beautiful & Natural Looking Results
- Innovative Quality Choice for Hair Restoration
- Restore Your Confidence and Take Back Control of Your Hair
