

## Ensure Peace of Mind with 365 days of pest coverage!!!

Ensure year-round protection for your home against unwanted pests with NexGen Pest & Wildlife Solutions. Our comprehensive service includes four quarterly exterior perimeter treatments, with interior treatments available upon request. Our skilled technicians prioritize applying residual barrier treatments to critical pest entry points, effectively controlling and preventing pests from infiltrating your home. We target key areas such as first-floor window frames, door frames, garage door frames, foundation gaps, utility junction entry points, soffit areas, eaves (under 15 feet), and any accessible potential pest entry point. Additionally, we perform a thorough barrier treatment encompassing up to 2 feet up and out around your home's perimeter. If you're unavailable during your scheduled exterior treatment appointment, rest assured that you can easily arrange an interior inspection by contacting our office. Should you observe an escalation in pest activity between scheduled treatments, our NexGen Annual Home Protection plan ensures unlimited re-services for pests covered under the program. Our team will promptly dispatch a service technician to address the issue at no extra cost. At NexGen Pest & Wildlife Solutions, our commitment is to deliver effective and efficient pest management programs year-round while fostering enduring relationships with our valued customers.
