## ACCESSORIES AVAILABLE

~ DON'T FORGET TO GRAB AN "ACCESSORIES" PRICE GUIDE ~

## BEFORE YOU BEGIN

Advance planning and careful layout will help ensure a successful project. Here are some items that you want to check before starting your project:

- Review the site plan to confirm lots, lines, locations and measurements
- Confirm the location of underground utilities. Call 811
- Seek all necessary building permits
- Prepare a drawing of the site
- Plan drainage to avoid erosion or buildup of water. Consider where water will drain and flow
- Be sure to use the right tools. Hand tools typically include a shovel, 4-foot level, dead-blow hammer, chisel, hand tamper, splitter and string line. Power tools may include a circular saw with a diamond blade and a plate compactor

- Always wear protective eye wear and gloves

**Permeable Paver FAQs**

**Do I need a contractor?**

We highly recommend hiring a landscape professional experienced with this type of installation.

**Can I install permeable pavers with the typical gravel and sand base?**

Yes and no. Yes you can do that, however the system is no longer considered permeable. The gravel bases and joint materials are required to meet required water flow rates.

**Do I need a drain?**

Drains are typically required. Consult your landscape professional to help you with a design for your particular project.

 There is a \$35 refundable pallet deposit on each pallet. Be sure to have your receipt!

### Helpful Hint

**Level sand the easy way!**

After leveling and grading the gravel base, place 3/4" PVC (which has an outside diameter of 1") in the area and spread your sand between. Drag a 2x4 over the sand using the PVC as a guide.
