**PLANNING YOUR PROJECT**

Advance planning and careful layout will help ensure a successful project. Here are some items that you want to check before starting your project:

- Review the site plan to confirm lots, lines, locations and measurements
- Confirm the location of underground utilities. Call 811
- Seek all necessary building permits
- Prepare a drawing of the site
- Plan drainage to avoid erosion or buildup of water. Consider where water will drain and flow
- Be sure to use the right tools. Hand tools typically include a shovel, 4-foot level, dead-blow hammer, chisel, hand tamper, splitter and string line. Power tools may include a circular saw with a diamond blade and a plate compactor
- Always wear protective eye wear and gloves
