

Traffic Engineer II

Wooster & Associates | Full-Time

Wooster & Associates is seeking a Civil / Traffic Engineer to support traffic engineering and transportation planning projects for our Pittsburgh Headquarters.

Responsibilities

- Prepare traffic studies, transportation impact studies, and safety evaluations
- Develop traffic signal, signing, and pavement marking plans
- Perform traffic operations and capacity analyses
- Assist with signal timing, phasing, and detection design
- Prepare maintenance and protection of traffic (MPT/MOT) plans
- Support permitting and agency coordination activities
- Assist with project management, scheduling, and client coordination

Qualifications

- B.S. in Civil Engineering
- EIT required; PE preferred
- 4-10 years of traffic engineering experience
- Experience with traffic analysis software and signal design
- Familiarity with MUTCD and PennDOT standards
- Strong analytical and communication skills
