1. Appeal from Decision of the Zoning Inspector: To hear and decide appeals where it is alleged there is an error in any order, requirement, decision, interpretation, or determination made by the Zoning Inspector.
2. Grant Variances: To authorize upon appeal, in specific cases, in their discretion, variances from the terms of the Resolution as will not be contrary to the public interest; where the applicant establishes “practical difficulties” when seeking an area variance, or “unnecessary hardship” when seeking a use variance, where owing to the special conditions, a literal enforcement of this Resolution will result in unnecessary hardship; and so that the spirit of this Resolution shall be observed and substantial justice done.
3. To grant Conditional Zoning Certificates: To authorize the use of land/buildings or structures under the conditions specified in this chapter, the district regulations and with such additional safeguards as will uphold the intent of this Resolution.

Appeals from any decision of the Board shall be to the courts as provided in Chapters 2505 and 2506 of the Ohio Revised Code. As provided in R.C. 2505.07, any such appeal shall be made within thirty (30) days of the Board's written decision.

4. Initiate or act upon suggested amendments to the Zoning Resolution text or official zoning district map;
5. Final action upon a suggested zoning amendment shall be undertaken at a public hearing;
6. Override a written recommendation of the Zoning Commission on a text or map amendment provided that such legislative action is passed by Township Trustees;
7. Determine the compensation of the Zoning Inspector, the Zoning Commission, and the Zoning Board of Appeals.

## **SECTION 206     APPEALS AND VARIANCES**

Appeals to the Zoning Board of Appeals concerning interpretation or administration of this Resolution by the Zoning Inspector may be taken by any person aggrieved or by any officer or bureau of the legislative authority of the Township affected. Such appeal shall be taken within thirty (30) days after the decision by filing with the Zoning Inspector, a notice of appeal specifying the order appealed from, the grounds upon which the appeal is being taken, and the applicable fee. The Zoning Inspector shall transmit to the Zoning Board of Appeals all the papers constituting the record upon which the action appealed from was taken. The BZA shall hold a hearing and determine whether the Zoning Inspector correctly applied the Zoning Regulation to the property under the circumstances.

The Zoning Board of Appeals may authorize on appeal in specific cases such variance from the terms of this Resolution as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of this Resolution would result in practical difficulties (for an area variance) or unnecessary hardship (for a use variance).

The current provisions of the Ohio Revised Code and applicable case law shall prevail over any conflicting provisions of this Zoning Resolution.

Application for a Variance: An application for a Variance shall be filed with the Zoning Inspector by the owner of the property for which the variance is sought (or other interested party with the consent of the owner), along with a site plan and the required application fee. At a minimum, the application shall contain the following information:

1. Name, address, and phone number of applicant(s);
2. Legal description of the property and a map of the property from the county auditor's website;
3. The required fee as established by the Board of Township Trustees in this Resolution;
4. List of adjoining property owners with addresses from current record
5. The specific variance(s) requested, including the specific provisions of the Zoning Regulations from which a variance is requested.
6. A narrative statement describing the reason the variance is requested, and the impact of the proposed variance upon adjoining property owners and the Township, considering the effect of such elements as noise, light, odor, vibration and traffic;
7. A description of the special conditions or circumstances giving rise to the need for a variance; and
8. A site plan drawn to an appropriate scale clearly showing the following:
  - a. The boundaries and dimensions of the property;
  - b. The dimensions and location of existing and proposed buildings and structures, including distances from the lot lines and neighboring buildings;
  - c. The use of all existing and proposed buildings and structures; and
  - d. The location of all buildings and structures on adjacent properties.

Consideration of an application for an Area Variance: An "area variance" is a variance which varies regulations pertaining to frontage, setbacks, yards, height and other dimensional requirements.

In *Kisil v. City of Sandusky*, 12 Ohio St. 3d 30 (1984), the Ohio Supreme Court held that an application for an area variance only needs to establish "practical difficulties." A property owner encounters "practical difficulties" when an area zoning requirement unreasonably deprives the owner from the use of the property. In *Duncan v. Middlefield*, 23 Ohio St.3d 83 (1986), the Supreme Court listed seven factors to be considered by the BZA in determining whether a property owner seeking an area variance has encountered "practical difficulties" in the use of his or her property:

1. whether the property in question will yield a reasonable return or whether there can be any beneficial use of the property without the variance;
2. whether the variance is substantial;
3. whether the essential character of the neighborhood would be substantially altered or whether adjoining properties would suffer a substantial detriment as a result of the variance;
4. whether the variance would adversely affect the delivery of governmental services (e.g., water, sewer, garbage);
5. whether the property owner purchased the property with knowledge of the zoning restriction;
6. whether the property owner's predicament feasibly can be obviated through some method other than a variance; and
7. whether the spirit and intent behind the zoning requirement would be observed and substantial justice done by granting the variance.

None of these factors are conclusive, and the property owner does not need to establish all of these factors. The BZA has the discretion to determine how to weigh and balance the factors. The ultimate standard the BZA applies in making a decision on an area variance is “whether the area zoning requirement, as applied to the property owner in question, is reasonable.” *Duncan* at 86.

Consideration of an application for a Use Variance: A use variance authorizes a landowner to establish a use which is otherwise not permitted under the Zoning Regulations, if the BZA determines that the strict application of the terms of the Regulations would create an unnecessary hardship. This standard is higher than the “practical difficulties” standard applied to area variances. An “unnecessary hardship” exists when it is not economically feasible to use the property as permitted under its zoning classification due to characteristics unique to the property. It is not proper to grant a use variance for a change in use so dramatic that it constitutes a change of zoning. Zone changes must go through the Zoning Commission and the Township Trustees.

In considering an application for a Use Variance, the Board of Zoning Appeals shall consider all relevant factors including, but not limited to, evidence which demonstrates the following:

1. The granting of the variance shall be in accord with the general purpose and intent of the regulations imposed by this Resolution or the district in which it is

located and shall not be injurious to the area or otherwise detrimental to the public welfare.

2. The granting of the variance will not permit the establishment of any use which is not otherwise permitted in the district.
3. There must exist special circumstances or conditions, as described in the findings, applicable to the land or buildings for which the variance is sought, which are peculiar to such land or buildings and do not apply generally to land or buildings in the area and which are such that the strict application of the provisions of this Resolution would deprive the applicant of the reasonable use of such land or building. Mere loss in value shall not justify a variance; there must be deprivation of beneficial use of land
4. There must be proof of hardship created by the strict application of this Resolution. It is not sufficient proof of hardship to show that greater profit would result if the variance were granted. Furthermore, the hardship complained of cannot be self-created; nor can it be established on this basis by one who purchases with or without knowledge of the restrictions; it must result from the application of this Resolution: it must be suffered directly by the property in question and evidence of variances granted under similar circumstances need not be considered.
5. The granting of the variance is necessary for the reasonable use of the land or building and the variance as granted is the minimum variance that will accomplish this purpose.
6. The proposed variance will not impair an adequate supply of light and air to adjacent property, substantially increase the congestion in the public streets, increase the danger of fire, endanger the public safety, or substantially diminish or impair property values of the adjacent area.
7. The granting of the variance requested will not confer on the applicant any special privilege that is denied by this regulation to other lands, structures, or buildings in the same district.

When granting any Variance request, the Board may further prescribe any conditions and safeguards that it deems necessary to ensure that the objectives of the regulations or provisions to which the variance applies will be met. Any violation of the variance as granted, or of any conditions and safeguards, when they have been made a part of the terms under which the variance has been granted, shall be deemed a punishable violation under this Resolution.

Hearings before the Board of Zoning Appeals: The Board of Zoning Appeals shall hold a public hearing within sixty (60) days after the receipt of a completed application for an appeal or variance or conditional use. Notice of the hearing shall be given in one or more newspapers of general circulation in the County at least ten (10) days before the date of said hearing. The notice shall set forth the time and place of the public hearing, the address of the property, and the nature of the proposed appeal or variance. Before conducting the public hearing written notice of such hearing shall be mailed by the Secretary of the Zoning Board of Appeals, by first class mail or in person, at least 20 days before the day of the hearing to all parties in interest. The notice shall contain the same information as required of notices published in newspapers. Failure to give any such notice shall not invalidate any decision of the Board of Zoning Appeals.

The hearing shall be public although the Board may enter into executive session to deliberate prior to issuing a decision. All witnesses must testify under oath. Formal rules of evidence shall not apply, but the Chairman of the Board can exclude irrelevant, immaterial, or repetitious evidence. The Board may adjourn and continue any hearing to a subsequent date.

The applicant, and those in opposition to the application, shall have the opportunity to appear and be heard in person, or by an attorney, in support of or in opposition to the application and:

1. Present their position, arguments and contentions;
2. Offer and examine witnesses and present evidence in support or opposition;
3. Cross-examine witnesses;
4. Offer evidence to refute evidence and testimony offered in opposition to his or her position;
5. Subpoena material witnesses, through the authority of the Board and under its discretion and control.

The Board shall keep minutes of its proceedings. Within sixty (60) days after the public hearing, the Zoning Board of Appeals shall either approve, approve with supplementary conditions, or disapprove the request for appeal or variance, unless an extension of time is agreed to in writing by both the applicant and the Board. The Zoning Board of Appeals shall issue findings of fact and conclusions of law if the decision is appealed to Court.

Other review processes shall follow the variance procedures for notice and action by the Zoning Board of Appeals unless otherwise indicated within this Resolution.

No order of the Zoning Board of Appeals granting a variance shall be valid for a period longer than twelve (12) months from the date of such order unless the building permit or zoning approval is obtained from the Zoning Inspector within such period and the erection or alteration of a building is started or the use is commenced within such period.

Variances may be granted as guided by the following:

1. To permit any yard or setback less than the yard or setback required by the applicable regulations.
2. To permit the use of a lot or lots for a use otherwise prohibited solely because of the insufficient area or width of the lot or lots but generally the respective area and width of the lot or lots should not be less than seventy-five percent (75%) of the required area and width.
3. To permit the same off-street parking facility to qualify as requirement facilities for
4. two or more uses, provided that substantial use of such facility by each user does not take place at approximately the same hours of the same days of the week.
5. To reduce the applicable off- street parking or loading facilities required, but generally by not more than twenty-five percent (25%) of required facilities.
6. To allow for the deferment of required parking facilities for a reasonable period of time, such period of time to be specified in the variance.
7. To increase the maximum distance that required parking spaces are permitted to be located from the use served, but generally not more than twenty-five percent (25%).
8. To increase the maximum allowable size or area of signs generally by not more than twenty-five percent (25%).
9. To increase the maximum gross floor area of any use so limited by applicable regulations, but generally not more than twenty-five percent (25%).
10. Similar modifications of the requirements of this Resolution as the Zoning Board of Appeals may deem necessary consistent with the purpose of variances and the intent of this Resolution.

## **CHAPTER 3 – DEVELOPMENT REVIEW PROCEDURES**

### **SECTION 300 PURPOSE**

The purpose of this section is to establish the procedures for site plan review, as well as provide general site planning guidelines in order to assure that all the elements required in this resolution are present in a site plan and that their design, location, and relationship to one another, to the site and to adjacent properties are appropriate to achieve the intent and goals of this resolution. These site planning guidelines are intended to benefit both the developer and the community. The site planning guidelines are not intended to dictate specific tastes and architectural styles but are intended to make sure that significant design elements are considered in future development.

### **SECTION 301 PROJECTS REQUIRING SITE PLAN REVIEW**

The Zoning Board of Appeals shall conduct site plan review for all projects to come before it, as set forth in this chapter and all other applicable sections of this zoning resolution. This includes site plan reviews for all conditionally permitted uses as specified in this resolution.

Site plan review shall be required for the following types of projects/developments:

## **SECTION 303     CONDITIONAL USE CERTIFICATES OR PERMITS**

In recent years, the characteristics and impacts of any ever-increasing number of new and unique uses, together with the broadening of numerous conventional uses, have fostered the development of more flexible regulations designed to accommodate these activities in a reasonable and equitable manner, while safeguarding both the property rights of all individuals and the health, safety, and general welfare of the community. Toward these ends, it is recognized that this resolution should provide for more detailed evaluation of each use conditionally permissible in a specific district with respect to such considerations as location, size, method of operation, intensity of use, public facilities requirements, and traffic generation. Accordingly, conditional zoning certificates or permits shall conform to the procedures and requirements of this Chapter and any other applicable regulations of this Resolution, and the provisions of this Chapter apply to the location and maintenance of any and all conditional uses.

Only one half of the width of the road or street right-of-way may be included in computing lot area if the lot owner holds title to the same.

#### **SECTION 404 CULVERT INSTALLATION AND PERMITS**

No zoning permit shall be granted to build any structure within the confines of the unincorporated area of the Township which has ingress or egress to the highway until the owner or occupier of such property has secured the permit from the State Department of Transportation, the County Engineer, or the proper Township Official (whichever has jurisdiction), for permission to install a culvert of the proper size and specifications required by said Governmental authority having jurisdiction and completed proper installation of such culvert.

Before a zoning permit is issued by the Zoning Inspector for new construction on township roads, the Zoning Inspector shall determine the necessity of requiring a culvert to be installed at the expense of the property owner. If the Zoning Inspector determines that a culvert shall be necessary, a permit shall be issued for the culvert which may be found on the same document as the zoning permit.

Minimum culvert size is 12" Diameter X 40' Length of double walled plastic pipe. Ingress and egress to the highway (driveway) shall be located at least 10' from any
