

# August is National Immunization Awareness Month

During August we focus on the importance of routine vaccinations for all ages – particularly for childhood immunizations, flu and COVID-19. It is important to stay up to date on vaccines and boosters to help protect yourself, your family and your community's health.

Don't let your guard down - take charge of your health!  
Please call **(213) 536-5815** for more information  
about immunizations.

Providing God's spiritual  
healing through healthcare.
