

INVISIBLE LOUDSPEAKERS

AI 66 Series- invisible loudspeakers

The invisible loudspeakers ELAB AI 66 are the only flat loudspeakers really invisible! They are hemispherical diffusion transducers on a two way system. After being installed on the wall and/or ceiling they can be painted with any kind of water based paint, otherwise covered with light wall paper or light fabric, giving perfect integration with the surroundings. The designers guarantees complete invisibility together with insuperable sound distribution.

The AI66 serie is especially specific for 60x60cm panel false ceilings.

ELAB AI66	INVISIBLE LOUDSPEAKER
Power	75 Watt RMS
Sensitivity	90dB 1W@1Mt.
Frequency Response	40 Hz—19KHz
