SCUBIC AQUAPURA

SCUBIC AQUAPURA uses predictive intelligence to anticipate variations in wastewater and optimize the operation of WWTPs, ensuring greater efficiency, stability, and environmental compliance.

Main Features

- Prediction of influent quality (BOD, COD, ammonia, etc.)
- Optimization of aeration, dosing, and flow
- Real-time monitoring of emissions and odors
- Predictive analysis and compliance reporting
- Intelligent resource management and sustainable operation

Customer Benefits

- Reduced chemical use and energy consumption
- More effective legal compliance
- Lower environmental and social impact (odors, gases)
- Anticipation of operational issues
- Cost savings and data-driven management
