SCUBIC NEXUS

○ **SCUBIC NEXUS** centralizes all water network data, transforming it into strategic insights for global, integrated, and efficient water management.

Main Features

- Unified dashboard for all SCUBIC systems
- Integration of external data (SCADA, GIS, others)
- Customized creation of KPIs and alerts
- Secure access via cloud or mobile
- Multilingual and scalable interface

Customer Benefits

- Holistic view of the water network
- Strategic and proactive planning
- Enhanced operational efficiency
- Data-driven decision making
- Remote access and improved collaboration

SCUBIC NEXUS

This product uses the **Reports** and **Advanced Analytics** modules to improve productivity and reduce the time spent on report preparation. It can be customized according to client requirements.

Features:

- Increase productivity
- Standardize reports across all departments
- Assess energy, chemical, and water usage
- Benchmark similar assets
- Evaluate costs and consumption per system
- Create “what-if” scenario reports
- Export reports in PDF or Excel
