

SCUBIC REGEN

Green Energy Integration for
Water Systems

 scubic[®]

www.scubic.pt

SCUBIC REGEN

SCUBIC REGEN integrates renewable energies into water operations, optimizing the use of clean energy, reducing costs, and accelerating the path toward carbon neutrality.

Main Features

- Solar/wind forecasting for consumption planning
- Smart load management (pumping, desalination)
- Integration with batteries and the power grid
- Carbon footprint monitoring
- Reports and recommendations for emission reduction

Customer Benefits

- Significant reduction in energy costs
- Greater energy autonomy and resilience
- Lower environmental footprint (net-zero)
- Strengthened environmental reputation
- Operations aligned with ESG goals

SCUBIC REGEN

Features:

- Schedule operations based on renewable production
- Increase ROI of solar/wind farms
- Reduce carbon emissions
- Meet environmental goals
