

REGULAR MEETING OF THE UTILITIES COMMISSION April 8, 2025, 3:30 P.M. ERMU Conference Room

AGENDA

1.0 GOVERNANCE

- 1.1 Call Meeting to Order
- 1.2 Pledge of Allegiance
- 1.3 Consider the Agenda
- 1.4 Resolution Recognizing 2025 Drinking Water Week
- 1.5 Resolution Recognizing 2025 Lineworker Appreciation Day
- 1.6 Recognition of Employee Longevity Mike Tietz, 8 years; Chris Sumstad, 24 years
- 1.7 Recognition APPA Certificate of Excellence in Reliability
- 2.0 CONSENT (Routine items. No discussion. Approved by one motion.)
- 2.1 Check Register March 2025
- 2.2 Regular Meeting Minutes March 11, 2025
- 2.3 Resolution Electing Not to Waive Statutory Tort Limits for Liability Insurance
- 2.4 Updated Travel Expense Guidelines
- 3.0 OPEN FORUM (Non-agenda items for discussion. No action.)
- 4.0 POLICY & COMPLIANCE (Policy review, policy development, and compliance monitoring.)
- 4.1 2024 Financial Audit
- 4.2 2024 Year End Reserve Balances
- 4.3 Utilities Performance Incentive Compensation Distribution
- 4.4 Commission Policy Review G.4a Succession of Leadership
- 4.5 Electric Vehicle Charger Discussion
- 5.0 BUSINESS ACTION (Current business action requests and performance monitoring reports.)
- 5.1 Financial Report February 2025
- 5.2 Annual Reliability Report
- 5.3 Water Service Line Ownership
- 5.4 Advaned Metering Infrastructure Update
- **6.0 BUSINESS DISCUSSION** (Future business planning, general updates, and informational reports.)
- 6.1 Staff Updates
- 6.2 City Council Update
- 6.3 Future Planning (Announce the next regular meeting, special meeting, or planned quorum.)
 - a. Regular Commission Meeting May 13, 2025
 - b. 2025 Governance Agenda
- 6.4 Other Business (Items added during agenda approval.)

7.0 ADJOURN REGULAR MEETING

UTILITIES COMMISSION MEETING

TO: FROM:		
ERMU Commission	Dave Ninow – Water Superintendent	
MEETING DATE: AGENDA ITEM NUMBER:		
April 8, 2025 1.4		
SUBJECT:		
Resolution Recognizing 2025 Drinking Water Week		
ACTION REQUESTED:		
Adopt Resolution 25-2 Recognizing Drinking Water Week, May 4-10, 2025		

BACKGROUND:

Drinking Water Week is an annual celebration organized by the American Water Works Association and its members. It is intended to raise awareness of the critical role that safe, sustainable, and affordable drinking water plays in our daily lives. Drinking Water Week is a chance for everyone to appreciate water as a finite resource that requires dedicated individuals, running well-maintained systems, to make it safe and easily available. This year's celebration will be May 4-10, 2025.

DISCUSSION:

The mission of Elk River Municipal Utilities is to provide our customers with safe, reliable, cost-effective, and quality long-term electric and water utility service. To communicate and educate our customers in the use of utility services, programs, policies, and future plans. These products and services will be provided in an environmentally and financially responsible manner.

Fulfilling that mission means a daily commitment to maintaining the systems that provide safe and reliable water. A domestic water system and other urban services like wastewater and electricity are the foundation of social and economic development. Our water system is an important part of why our community is what it is today.

ATTACHMENT:

Resolution No. 25-2 – Recognizing Drinking Water Week 2025

RESOLUTION NO. 25-2

BOARD OF COMMISSIONERS ELK RIVER MUNICIPAL UTILITIES

A RESOLUTION OF THE BOARD OF COMMISSIONERS OF ELK RIVER MUNICIPAL UTILITIES RECOGNIZING DRINKING WATER WEEK, MAY 4-10, 2025

WHEREAS, water is our most valuable natural resource; and

WHEREAS, only tap water delivers public health protection, fire protection, support for our economy and the quality of life we enjoy; and

WHEREAS, any measure of a successful society – low mortality rates, economic growth and diversity, productivity, and public safety – are in some way related to access to safe water; and

WHEREAS, we are all stewards of the water infrastructure upon which future generations depend; and

WHEREAS, each citizen of our community is called upon to help protect our source waters from pollution, to practice water conservation, and to get involved in local water issue; and

WHEREAS, the hard work and dedication towards providing safe and reliable drinking water by our water system professionals is truly appreciated by our community; and

WHEREAS, May 4-10, 2025, is set aside as time to enhance public awareness of the value of water and to encourage the public to continue using water wisely;

NOW, THEREFORE, BE IT RESOLVED THAT THE WEEK OF MAY 4, 2025, BE DESIGNATED AS DRINKING WATER WEEK.

This Resolution Passed and Adopted this 8th day of April 2025.

John J. Dietz,	Chair	
Mark Hanson	, Gener	al Manager

UTILITIES COMMISSION MEETING

TO: FROM:			
ERMU Commission	Chris Sumstad – Electric Superintendent		
MEETING DATE: AGENDA ITEM NUMBER:			
April 8, 2025 1.5			
SUBJECT:			
Resolution Recognizing 2025 Lineworker Appreciation Day			
ACTION REQUESTED:			
Adopt Resolution 25-3 Recognizing Lineworkers and Designating April 18, 2025, as Lineworker			
Appreciation Day.			

BACKGROUND:

On April 10, 2013, the U.S. Senate recognized a National Linemen Appreciation Day through resolution S Res 95. The resolution acknowledged the contributions of the brave men and women who protect public safety, and designated April 18, 2013, as National Lineman Appreciation Day. This is now an official holiday in the United States and is now commonly referred to as National Lineworker Appreciation Day.

DISCUSSION:

Our community would not be what it is today without electricity and other urban services like water and wastewater. Our community-owned electric utility has played a significant role in the growth and prosperity of the immediate area. At the heart of that growth has been our lineworkers. These are the individuals, like other emergency service professionals, who run towards the storm so that our customers have continued services. Our lineworkers have done such an excellent job "keeping the lights on" that electric services start to feel like a basic human right or entitlement, taking all their hard work for granted. But the truth is, the work that these professionals do is greatly appreciated.

ATTACHMENTS:

 Resolution No. 25-3 – Recognizing Lineworkers and Designating Lineworker Appreciation Day 2025

RESOLUTION NO. 25-3

BOARD OF COMMISSIONERS ELK RIVER MUNICIPAL UTILITIES

A RESOLUTION OF THE BOARD OF COMMISSIONERS OF ELK RIVER MUNICIPAL UTILITIES RECOGNIZING LINEWORKERS AND DESIGNATING APRIL 18, 2025, AS LINEWORKER APPRECIATION DAY

WHEREAS, the profession of lineworker is steeped in personal, family, and professional tradition;

WHEREAS, lineworkers are often first responders during storms and other catastrophic events, working to make the scene safe for other public safety heroes;

WHEREAS, lineworkers work with thousands of volts of electricity high atop power lines 24 hours a day, 365 days a year, to keep electricity flowing;

WHEREAS, lineworkers must often work under dangerous conditions far from their families to construct and maintain the energy infrastructure of the United States;

WHEREAS, lineworkers put their lives on the line every day with little recognition from the community regarding the danger of their work; and

WHEREAS, the Board of Commissioners of Elk River Municipal Utilities recognizes the efforts of lineworkers in keeping the power on and protecting public safety.

NOW, THEREFORE, BE IT RESOLVED THAT APRIL 18, 2025, BE DESIGNATED LINEWORKER APPRECIATION DAY.

This Resolution Passed and Adopted this 8th day of April, 2025.

John J. Dietz, Chair
Mark Hanson, General Manager

UTILITIES COMMISSION MEETING

TO: FROM:		
ERMU Commission	Mark Hanson – General Manager	
MEETING DATE: AGENDA ITEM NUMBER:		
April 8, 2025 1.6		
SUBJECT:		
Recognition of Employee Longevity – Mike Tietz, 8 years; Chris Sumstad, 24 years		
ACTION REQUESTED:		
Recognize staff for their service and award the respective Longevity Bonus paycheck		

BACKGROUND:

In September 2021, the Commission approved a Longevity Pay benefit to be paid to qualifying, eligible employees based on their years of service according to the schedule below.

\$1,550
\$2,025
\$2,100
\$2,125
\$2,300
\$3,000
\$3,000

DISCUSSION:

Mike Tietz has been an employee with ERMU since April 28, 2017, earning an 8-year longevity pay benefit. Chris Sumstad has been an employee with ERMU since April 30, 2001, earning a 24-year longevity pay benefit. We recognize Mike and Chris for their contributions to the success of ERMU.

UTILITIES COMMISSION MEETING

TO:	FROM:	
ERMU Commission	Mike Tietz – Technical Services Superintendent	
MEETING DATE:	AGENDA ITEM NUMBER:	
April 8, 2025	1.7	
SUBJECT:		
Recognition APPA Certificate of Excellence in Reliability		
ACTION REQUESTED:		
None		

BACKGROUND/DISCUSSION:

The American Public Power Association (APPA) recently honored 255 public power utilities with a "Certificate of Excellence in Reliability" for reliable performance. These utilities have significantly outperformed the electric industry nationwide averages as gathered by the Energy Information Administration. APPA collected data from public power utilities that subscribe to APPA's eReliability Tracker software to track their reliability data. Of those utilities, 350 were considered to have sound data that was included in the 2024 Annual Benchmarking Report.

The tracker performs calculations for System Average Interruption Duration Index (SAIDI) which measures the average outage time per customer on the system, System Average Interruption Frequency Index (SAIFI) which measures how often a customer on our system could expect to experience an outage, and Customer Average Interruption Duration Index (CAIDI) which measures averaged outage duration of all customers that actually experienced an outage. The report also includes calculations for Momentary Average Interruption Frequency Index (MAIFI) and Average Service Availability Index (ASAI) which helps utilities to compare, collect, categorize, and analyze their outage information.

For 2024, ERMU's SAIDI was only 42.083 minutes (excluding major events), compared to the industry average of 148 minutes (excluding major events). In simple terms, that means that averaged out over our 13,797 electric customers in 2024, each customer could expect to have a total outage time of about 42 minutes; that is 107 minutes shorter than the national average for outages among all utilities within the United States.

I would like to recognize the Elk River Municipal Utilities team for their continuous devotion to providing reliable electric service to all our customers throughout 2024. This national recognition is confirmation of the outstanding reliable service we provide each and every day.

ELK RIVER MUNICIPAL UTILITIES REGULAR MEETING OF THE UTILITIES COMMISSION HELD AT UTILITIES CONFERENCE ROOM

March 11, 2025

Members Present: Chair John Dietz, Vice Chair Mary Stewart, Commissioners, Paul Bell, and

Matt Westgaard

Remote Members: Commissioner Nick Zerwas participated in the meeting via interactive

television as he was out of the state at the time of the meeting.

ERMU Staff Present: Mark Hanson, General Manager

Sara Youngs, Administrations Director Melissa Karpinski, Finance Manager

Tony Mauren, Governance & Communications Manager

Tom Geiser, Operations Director

Mike Tietz, Technical Services Superintendent

Dave Ninow, Water Superintendent

Jenny Foss, Communications & Administrative Coordinator

Jon McLean, Locator

Others Present: Jared Shepherd, Attorney; Cal Portner, City Administrator; Tanju Gulati,

Director with Frontier Energy; Doug Eli, Energy Engineer with Frontier Energy; Alexandra Blair, Program Coordinator with Frontier Energy; Cindy McCleary, VP and Managing Principal with LEO A DALY; Julia Larson, Project Designer at

LEO A DALY; Isaac Karley, Project Manager at LEO A Daly

1.0 GOVERNANCE

1.1 Oath of Office – John Dietz & Mary Stewart

1.2 **Call Meeting to Order**

The regular meeting of the Utilities Commission was called to order at 3:30 p.m. by Chair Dietz.

1.3 Pledge of Allegiance

The Pledge of Allegiance was recited.

1.4 Consider the Agenda

Moved by Commissioner Westgaard and seconded by Commissioner Stewart to approve the March 11, 2025, agenda. Motion carried 5-0.

1.5 Recognition of Employee Longevity – Jon McLean, 8 years

Mr. Tietz commended Mr. McLean for his eight years of dedicated service as an underground utility locator, highlighting his strong work ethic, positive attitude, and commitment to exceeding expectations, which have earned him the respect of his colleagues.

Mr. McLean expressed his gratitude, followed by a round of applause.

1.6 **2025** Election of Officers – Chair and Vice Chair

Mr. Mauren conducted the election of officers for 2025. There was agreement among the Commission to maintain the officer appointments from the previous year.

Moved by Commissioner Westgaard and seconded by Commissioner Bell to reappoint Commissioner Dietz as Chair and reappoint Commissioner Stewart as the Vice Chair. Motion carried 5-0.

1.6 **2025 Committee Appointments**

The Commission discussed previous committee appointments and the chair positions. There was agreement among the Commission to maintain the committee appointments from the previous year.

Moved by Commissioner Bell and seconded by Commissioner Westgaard to make the following committee and chair appointments for 2025:

Reappoint Chair Dietz and Commissioner Stewart to the Wage and Benefits Committee with Chair Dietz to continue to serve as committee chair.

Reappoint Commissioner Westgaard and reappoint Commissioner Zerwas to the Financial Reserves and Investment Committee with Commissioner Westgaard to continue to serve as committee chair.

Reappoint Commissioner Stewart to the Information Security Committee.

Reappoint Commissioner Westgaard and Commissioner Bell to the Dispute Resolution Committee with Commissioner Westgaard to continue to serve as committee chair.

2.0 CONSENT AGENDA (Approved By One Motion)

Moved by Commissioner Stewart and seconded by Commissioner Bell to approve the Consent Agenda as follows:

2.1 Check Register – February 2025

2.2 Regular Meeting Minutes – February 11, 2025

2.3 2024 Fourth Quarter YTD Earned Sick and Safe Time Usage

Motion carried 5-0.

3.0 OPEN FORUM

No one appeared for open forum.

4.0 POLICY & COMPLIANCE

4.1 **Annual Commission Orientation**

Under Commission Policy G.2d, an annual orientation program for new and existing commission members was implemented in 2018. This year's orientation featured presentations from Frontier Energy and ERMU staff.

Frontier Energy representatives updated the Commission on ERMU's Conservation Improvement Program, emphasizing their efficiency in helping ERMU achieve its 2024 kWh savings goals while staying under budget.

Ms. Foss, ERMU's Communications & Administrative Coordinator, presented information about the department's communication efforts, covering planning, content creation, and community engagement.

4.2 Annual Commission Bylaw and Attendance Policy

Mr. Mauren presented the commission bylaws and conducted the annual attendance policy review requested by the City. No changes were proposed.

4.3 Commission Policy Review – G.4 – Corporate Limitations

Mr. Mauren presented his memo regarding G.4 – Corporate Limitations. There were no recommended changes from staff.

5.0 BUSINESS ACTION

5.1 **ERMU Power Plant Project Update**

Representatives from LEO A DALY presented architectural options for the decommissioned power plant, offering three use designs: child-centered, adult-centered, and a combined approach. They provided cost estimates and discussed funding options, noting the building's eligibility for the National Register due to its historical significance in community development and industry. The rough estimates for all-in costs ranged from \$4,860,000 to \$7,430,000.

The discussion included alternative options, such as demolition. Mr. Hanson noted that demolition and conversion to a parking lot would cost approximately \$600,000–\$700,000.

The Commission approved spending \$15,000 on plans to explore the combined child/adult use design. They emphasized their desire to minimize expenses while preserving the building's historical value.

5.2 Financial Report – January 2025

Ms. Karpinski presented the January 2025 financials, highlighting increased electric and water sales compared to the previous year, with expenses for both remaining under budget.

Moved by Commissioner Westgaard and seconded by Commissioner Bell to receive the January 2025 Financial Report. Motion carried 5-0.

5.2 Advanced Metering Infrastructure Update

Mr. Teitz reviewed his AMI Update memo, noting that 88% of residential water meter exchanges are complete. He stated that the installation contractor plans to exit the residential water meter portion of the project.

Chair Dietz asked if the remaining 500 residential water meters would become ERMU staff's responsibility, and Mr. Teitz confirmed this.

Ms. Youngs explained that residential water meter customers have received multiple notices informing them of an April 1 deadline to schedule their replacement appointment to avoid monthly service fees starting at \$50 per month for the first meter and \$10 per month for each additional meter.

There was discussion on how to handle non-responsive customers including potential shut-off measures.

Mr. Hanson explained that the existing meters will eventually become obsolete and must be replaced. Customers can request manual meter reading for the new meters, but this requires additional customer-purchased equipment installed at the residence.

Mr. Ninow clarified that this equipment allows readings by physically touching a device to it, rather than using a radio signal.

Chair Dietz asked if this means a technician must physically approach the meter to take a reading. Ms. Youngs confirmed, adding that the equipment is outside the home, so technicians won't need to enter the residence.

Mr. Tietz proceeded with his memo review.

6.0 BUSINESS DISCUSSION

6.1 **Staff Updates**

Mr. Hanson sought commission direction regarding the \$15-20K estimated cost for private property repair as a result of the water main break on Polk Avenue. He noted that the Minnesota League of Cities Insurance Trust denied the claim as it was determined there was no negligence and added that more than likely the resident's insurance would deny the claim as well.

The Commission recommended that Mr. Hanson inform the resident about the Dispute Resolution Committee to address the payment of expenses related to the water main break.

6.2 <u>City Council Update</u>

Chair Dietz provided a City Council update.

6.3 <u>American Public Power Association Legislative Rally Update - Verbal</u>

Mr. Hanson gave a verbal update on the American Public Power Association Legislative Rally in Washington, D.C. He was joined this year by Commissioner Zerwas, Commissioner Bell, and Mr. Mauren. During the rally, they met with Minnesota Senators Amy Klobuchar and Tina Smith, as well as House Majority Whip Tom Emmer. Discussions centered primarily on municipal bond tax exemptions and permitting reforms.

6.4 **Future Planning**

Chair Dietz announced the following:

- a. Regular Commission Meeting April 8, 2025
- b. 2025 Governance Agenda

6.5 Other Business

7.0 ADJOURN REGULAR MEETING

Moved by Commissioner Bell and seconded by Commissioner Stewart to adjourn the regular meeting of the Elk River Municipal Utilities Commission at 5:47 p.m. Motion carried 5-0.

Minutes prepared by Jenny Foss.
John J. Dietz, ERMU Commission Chair
Tina Allard, City Clerk

UTILITIES COMMISSION MEETING

TO:	FROM:
ERMU Commission	Melissa Karpinski – Finance Manager
MEETING DATE:	AGENDA ITEM NUMBER:
April 8, 2025	2.3
SUBJECT:	
Resolution Electing Not t	o Waive Statutory Tort Limits for Liability Insurance
ACTION REQUESTED:	
Adopt Resolution 25-4 El	ecting Not to Waive the Statutory Tort Limits for Liability Insurance

BACKGROUND:

The League of Minnesota Cities Insurance Trust (LMCIT) requires annual approval of the Utilities' intent to waive or not waive the statutory limits on tort liability as set forth in Minnesota Statutes.

DISCUSSION:

Attached is the Waiver form which also has information regarding making a decision on whether to elect not to waive, or to waive, the statutory limits. Last year we did not waive the limits, and neither did the City. The recommendation we have received from our insurance agent is not to waive the limits.

FINANCIAL IMPACT:

This limits our exposure to \$500,000 rather than \$2,000,000 for an individual claimant; and \$1,500,000 rather than \$2,000,000 for all claimants of a single occurrence.

ATTACHMENTS:

RESOLUTION NO. 25-4

BOARD OF COMMISSIONERS ELK RIVER MUNICIPAL UTILITIES

A RESOLUTION OF THE BOARD OF COMMISSIONERS OF ELK RIVER MUNICIPAL UTILITIES ELECTING NOT TO WAIVE THE STATUTORY TORT LIMITS FOR LIABILITY INSURANCE

WHEREAS, Elk River Municipal Utilities (Utilities) participate in the League of Minnesota Cities Insurance Trust (LMCIT) insurance program; and

WHEREAS, The LMCIT requires annual approval of the Utilities' intent to waive or not waive the statutory limits on tort liability as set forth in Minnesota Statutes;

WHEREAS, The Utility has evaluated whether to waive the limit of tort liability, and whether to purchase excess liability coverage from the LMCIT.

NOW, THEREFORE, BE IT RESOLVED that the Elk River Municipal Utilities of the City of Elk River elects to not waive the statutory tort liability limit established by Minnesota Statute 466.04.

This Resolution Passed and Adopted this 8	3 th day of April 2025.	
	John Dietz, Chair	

Mark Hanson, General Manager

LIABILITY COVERAGE WAIVER FORM

Members who obtain liability coverage through the League of Minnesota Cities Insurance Trust (LMCIT) must complete and return this form to LMCIT before their effective date of coverage. Email completed form to your city's underwriter, to pstech@lmc.org, or fax to 651.281.1298.

The decision to waive or not waive the statutory tort limits must be made annually by the member's governing body, in consultation with its attorney if necessary.

Members who obtain liability coverage from LMCIT must decide whether to waive the statutory tort liability limits to the extent of the coverage purchased. The decision has the following effects:

- If the member does not waive the statutory tort limits, an individual claimant could recover no more than \$500,000 on any claim to which the statutory tort limits apply. The total all claimants could recover for a single occurrence to which the statutory tort limits apply would be limited to \$1,500,000. These statutory tort limits would apply regardless of whether the member purchases the optional LMCIT excess liability coverage.
- If the member waives the statutory tort limits and does not purchase excess liability coverage, a single claimant could recover up to \$2,000,000 for a single occurrence (under the waive option, the tort cap liability limits are only waived to the extent of the member's liability coverage limits, and the LMCIT per occurrence limit is \$2,000,000). The total all claimants could recover for a single occurrence to which the statutory tort limits apply would also be limited to \$2,000,000, regardless of the number of claimants.
- If the member waives the statutory tort limits and purchases excess liability coverage, a single claimant could potentially recover an amount up to the limit of the coverage purchased. The total all claimants could recover for a single occurrence to which the statutory tort limits apply would also be limited to the amount of coverage purchased, regardless of the number of claimants.

Claims to which the statutory municipal tort limits do not apply are not affected by this decision.

UTILITIES COMMISSION MEETING

то:	FROM:	
ERMU Commission	Tony Mauren – Governance & Communications Manager	
MEETING DATE:	AGENDA ITEM NUMBER:	
April 8, 2025	2.4	
SUBJECT:		
Updated Travel Expense Guidelines		
ACTION REQUESTED:		
None		

BACKGROUND/ DISCUSSION:

For the commission orientation at the March meeting, staff presented updated reference guide materials for 2025, including travel expense guidelines. That document did not incorporate an updated Meals and Incidental Expenses rate (M&IE).

In order to avoid this issue in the future, staff rewrote the guidelines to provide commissioners with directions to find the most up-to-date M&IE and mileage rates online. Staff will make a point to include the current base M&IE and mileage rates in the annual orientation memo.

2025 Rates:

M&IE - \$68 standard daily rate (this amount can increase based on location) Mileage – 70 cents per mile

ATTACHMENTS:

Updated 2025 Travel Expense Guidelines for Commissioners

Travel Expense Guidelines for Commissioners

Meals

Food allowances are actual expenditures for meals and gratuity, excluding alcoholic beverages. When commissioners travel for ERMU activities and incur expenses for meals, the reimbursable total is based on the U.S. General Services Administration's (GSA) established rates. The maximum to be reimbursed can be found on the GSA website (www.GSA.gov). Rates can vary based on location and time of year. For example, the rate is higher in Washington, D.C. than it is in Elk River, MN. Staff is available to help commissioners confirm the appropriate rate prior to travel. **Itemized receipts must be submitted for reimbursement.**

When travelling for the entire day, the distribution is flexible, meaning the reimbursable funds do not need to be allotted in equal portions for each meal. If there are multiple days of travel, the distribution per day is also flexible, meaning the reimbursable funds do not need to be allotted in equal portions for each day.

If you are travelling for a partial day (i.e. only over the course of one or two meals), deduct one-third from the total reimbursable amount for each meal not occurring during travel.

If you are at an event where the meal is provided and included in the fee for the event, please have that meal unless there are extenuating circumstances such as allergies or dietary restrictions.

Mileage

The 2025 business mileage reimbursement will be based on the current IRS mileage rates (available at www.IRS.gov). In order to receive reimbursement, commissioners must submit an address for their destination and the mileage accrued.

Compensation

Members of the commission representing ERMU at meetings/conferences that are in addition to the commission meetings will receive a \$75 per day stipend.

SUBJECT:		
2024 Financial Audit		
ACTION REQUESTED:		
Receive and file the 2024 Annual Financial Report		

BACKGROUND:

Audit fieldwork was completed February 20 and 21 by our auditors, Abdo. Again, this year Abdo completed and compiled the enclosed audit report and issued an opinion letter. Elk River Municipal Utilities staff has reviewed for approval.

DISCUSSION:

Mr. Justin Nilson of Abdo will be at our meeting to present the 2024 audit and answer any questions you may have. There were two audit adjustments resulting from General Accounting Standards Board (GASB) reporting requirements related to Pensions and Leases. These adjustments are provided by Abdo. These items are discussed in Note 2 and 4 of the financials.

Management and Public Utilities Commission Elk River Municipal Utilities Elk River, Minnesota

We have audited the financial statements of the Elk River Municipal Utilities (the Utilities) of the City of Elk River, Minnesota, (the City) as of and for year ended December 31, 2024. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter dated December 6, 2024. Professional standards require that we provide you with the following information related to our audit.

Significant Audit Findings

In planning and performing our audit of the financial statements, we considered the Utilities internal control over financial reporting (internal control) as a basis for designing the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Utilities internal control. Accordingly, we do not express an opinion on the effectiveness of the Utilities internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance

As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of compliance with certain provisions of laws, regulations, contracts and grants, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under statutes set forth by the State of Minnesota.

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Utilities are described in Note 1 to the financial statements. The Utilities changed accounting policies during the year ended December 31, 2024 related to the accounting and financial reporting for compensated absences (GASB 101). We noted no transactions entered into by the Utilities during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were as follows:

- Management's estimate of depreciation is based on estimated useful lives of the assets. Depreciation is calculated using the straight-line method.
- Allocations of gross wages and payroll benefits are approved by the Commission within the Utilities' budget and
 are derived from each employee's estimated time to be spent servicing the respective functions of the Utilities.
 These allocations are also used in allocating accrued compensated absences payable.
- Management's estimate of its pension liability is based on several factors including, but not limited to, anticipated
 investment return rate, retirement age for active employees, life expectancy, salary increases and form of annuity
 payment upon retirement.
- Management's estimates of its lease receivable are based on several factors including, but not limited to, a
 discount rate based on the estimated incremental borrowing rate.

We evaluated the key factors and assumptions used to develop these accounting estimates in determining that it is reasonable in relation to the financial statements taken as a whole. The disclosures in the financial statements are neutral, consistent, and clear. Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. In addition, none of the misstatements detected as a result of audit procedures and corrected by management were material, either individually or in aggregate, to each opinion unit's financial statements taken as a whole.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated April 1, 2025.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the Utilities' auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Other Matters

We applied certain limited procedures to the required supplementary information (RSI) (Management's Discussion and Analysis, the Schedules of Employer's Share of the Net Pension Liability, the Schedules of Employer's Contributions, and the Schedule of Changes in Net Pension Liability (Asset) and Related Ratios), which is information that supplements the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on the supplementary information (Schedule of Operating Revenues and Expense), which accompany the financial statements but are not RSI. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

We were not engaged to report on the introductory section or statistical sections, which accompany the financial statements but are not RSI. We did not audit or perform other procedures on this other information, and we do not express an opinion or provide any assurance on them.

Future Accounting Standard Changes

The following Governmental Accounting Standards Board (GASB) Statements have been issued and may have an impact on future Utilities financial statements:

GASB Statement No. 102 – Certain Risk Disclosures Effective: 12/31/2025

GASB Statement No. 103 – Financial Reporting Model Improvements Effective: 12/31/2026

GASB Statement No. 104 – Disclosure of Certain Capital Assets

Effective: 12/31/2026

Further information on upcoming GASB pronouncements.

Restriction on Use

This communication is intended solely for the information and use of the Public Utilities Commission, City Council, management, and the Minnesota Office of the State Auditor and is not intended to be and should not be used by anyone other than these specified parties.

The comments and recommendations in this report are purely constructive in nature, and should be read in this context. Our audit would not necessarily disclose all weaknesses in the system because it was based on selected tests of accounting records and related data.

If you have any questions or wish to discuss any of the items contained in this letter, please feel free to contact us at your convenience. We wish to thank you for the opportunity to be of service and for the courtesy and cooperation extended to us by your staff.

INDEPENDENT AUDITOR'S REPORT

Public Utilities Commission Elk River Municipal Utilities Elk River, Minnesota

Report on the Financial Statements

Opinion

We have audited the accompanying financial statements of the Elk River Municipal Utilities (the Utilities) of the City of Elk River, Minnesota (the City), as of and for the year ended December 31, 2024, and the related notes to the financial statements, as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Utilities as of December 31, 2024, and the changes in financial position and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Utilities and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Utilities ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
 Utilities internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Utilities ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Emphasis of Matter

As discussed in Note 1B, the financial statements present only the Electric and Water enterprise funds and do not purport to, and do not present fairly the financial position of the Utilities as of December 31, 2024, the changes in its financial position, its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Change in Accounting Principle

The Utilities has adopted the provisions of Governmental Accounting Standard Board (GASB) Statement No. 101, Compensated Absences, for the year ended December 31, 2024. Adoption of the provisions of these statements results in significant change to the classifications of the components of the financial statements. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis Page 15 and the Schedule of Employer's Share of the Net Pension Liability, the Schedule of Employer's Contributions to be presented to supplement the basic financial statements. Such information, although not a part of the financial statements, is required by the Government Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Utilities' basic financial statements. The schedule of operating revenues and expenses is presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of operating revenues and expenses are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory section, summary of operations and unaudited statistics but does not include the basic financial statements and our auditor's report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Management's Discussion and Analysis

This section of the Elk River Municipal Utilities (the Utilities) of the City of Elk River, Minnesota annual financial report presents our analysis of the Utilities' financial performance during the fiscal year that ended December 31, 2024. Please read it in conjunction with the financial statements which follow this section.

Financial Highlights

- The assets and deferred outflows of resources of the Utilities exceeded its liabilities and deferred inflows of resources at the close of the most recent fiscal year by \$84,854,552 (net position). Net Position increased by \$3,153,304 or 3.9 percent. The increase is mainly due to revenues in excess of expenses during the year.
- The Utilities' cash balance at the close of the current fiscal year was \$24,755,146.
- Electric usage overall was down an average of 3.9 percent from the prior year. Residential usage decreased 4.0 percent, Commercial usage decreased 3.0 percent, and Industrial usage decreased 4.0 percent.
- Water usage overall was down an average of 16.3 percent from the prior year. Residential usage decreased 19.8 percent, and Commercial usage decreased 12.6 percent.

Overview of the Financial Statements

This annual report consists of three parts: Management's Discussion and Analysis, Financial Statements, and Supplementary Information. The Financial Statements also include notes that explain in more detail some of the information in the financial statements.

Required Financial Statements

The financial statements of the Utilities report information about the Utilities using accounting methods similar to those used by the private sector. These statements offer short-term and long-term financial information about its activities. The Statement of Net Position includes all of the Utilities' assets and liabilities and provides information about the nature and amounts of investments in resources (assets) and the obligations to Utilities' creditors (liabilities). It also provides the basis for computing rate of return, evaluating the capital structure of the Utilities and assessing the liquidity and financial flexibility of the Utilities. All of the current year's revenues and expenses are accounted for in the Statements of Revenues, Expenses and Changes in Net Position. This statement measures the success of the Utilities' operations over the past year and can be used to determine whether the Utilities has successfully recovered all its costs through its user fees and other charges, profitability, and credit worthiness. The final required financial statement is the Statements of Cash Flows. The primary purpose of this statement is to provide information about the Utilities' cash receipts and cash payments during the reporting period. The statement reports cash receipts, cash payments and net changes in cash resulting from operations, investing and financing activities and provides answers to such questions as where cash came from, what was cash used for and what was the change in the cash balance during the reporting period.

Financial Analysis of the Utilities

Our analysis of the Utilities begins on page 22 in the Financial Section. One of the most important questions asked about the Utilities' finances is "Is the Utilities as a whole better off or worse off as a result of this year's activities?" The Statement of Net Position, and the Statement of Revenues, Expenses and Changes in Net Position report information about the Utilities' activities in a way that will help answer this question. These two statements report the net position of the Utilities and changes in the net position. You can think of the Utilities' net position (the difference between assets and liabilities) as one way to measure financial health or financial position. Over time, increases or decreases in the Utilities' net position is one indicator of whether its financial health is improving or deteriorating. However, you will need to consider other non-financial factors such as changes in economic conditions, population growth, zoning, and new or changed government legislation.

Net Position. To begin our analysis, a summary of the Utilities' Statements of Net Position is presented in Table A-1. As can be seen from the Table, net position increased in fiscal 2024 from fiscal 2023.

Table A-1
Condensed Statement of Net Position

Assets	2024	2023	Increase (Decrease)
Current and other	\$ 29,660,285	\$ 31,866,563	\$ (2,206,278)

Unrestricted	16,109,361	18,818,984	(2,709,623)
Total Net Position	\$ 84,854,552	\$ 81,701,248	\$ 3,153,304
Net Position as a Percent of Total			
Net investment in capital assets	78.9 %	74.8	%
Restricted	2.1	2.2	
Unrestricted	19.0	23.0	
	100.0 %	100.0	%

Electric and Water Rates. Electric - The Utilities' electric rates had a zero-rate increase effective January 2025. The monthly base charges are based upon the type of service. The monthly charges are \$15.00 for residential, \$32.00 for non-demand, \$77.00 for demand and \$115.00 for large industrial demand customers. In addition to the base charges the residential rate is \$.1373/kWh for June-October usage, and \$.1255/kWh for November-May usage; the non-demand rate is \$.1330/kWh for June-October, and \$.1114/kWh for November-May; the demand rate is \$.0704/kWh energy charge year round with a demand charge of \$16.75/kW June-October, and \$11.75/kW for November-May; the large industrial demand rate is \$.0696/kWh energy charge year round with a demand charge of \$16.25/kW June-October, and \$11.25/kW November-May.

Water - The latest increase in the Utilities' water rates was effective January 2025. The monthly base charge for residential customers is \$10.23 per month. In addition to the base charge, the Utilities currently charges its residential customers \$2.04 per 1,000 gallons up to 9,000 gallons, \$3.64 per 1,000 gallons between 9,000 gallons and 15,000 gallons, and \$4.20 per 1,000 gallons for usage above 15,000 gallons. Commercial customer base charges are based upon meter size and range from \$12.27 to \$129.60. An irrigation meter is \$21.83 per month. There is also a charge per 1,000 gallons, the same tiers as the residential rates of \$2.04, \$3.64, and \$4.20, except the graduation from the lower tier to the higher tier(s) is calculated based on previous consumption.

The Utilities requires payment of all utility bills to be paid by the due date stated on the monthly bill. A ten percent penalty is assessed for payments not received by the due date. The Utilities may discontinue service of a customer not complying with the disconnect policy of the Utilities after receiving a written disconnect notice. Residential and Commercial/Industrial single phase electric customers that have their service discontinued will be charged a minimum of \$50.00 to have their service reconnected. Commercial/Industrial three phase electric customers that have their service discontinued will be charged a minimum of \$150.00 to have their service reconnected. Residential and Commercial/Industrial water customers that have their water shut-off will be charged a fee of \$100.00 to have their water turned on/reconnected. There are no reconnections after 3:30 pm and payments for reconnection/turn on are not accepted at the property site; payments must be made prior to dispatching reconnection. Customers can come into the office between the hours of 8:00 am and 4:30 pm to make payment by cash, money order or credit card; or pay online or by phone with a credit card. The Utilities abides by the Cold Weather Rules.

Deposit Policy. Per our Deposit Policy, the Utilities collects social security numbers from new accounts and utilizes a credit risk assessment tool called "Online Utility Exchange" to determine if a deposit is necessary as a proactive measure to try and reduce uncollectible accounts. The amount of the deposit required will depend on the risk identified with the customer. For residential customers, if there is above 90 percent probability of non-default and no negative history (no disconnection for non-payment or late payments two or more times within 12 months) there is no deposit required. If there is a lower than 90 percent probability of non-default, a deposit appropriate to the services supplied will be required before utility service will be extended. If the customer chooses not to provide a social security number, the deposit is automatically required. Residential deposit amounts are \$100 for apartments, \$100 for homes with water and sewer, \$150 for homes with electric only services, and \$250 for homes with all services (electric, water, and sewer).

For commercial and industrial customers, a service agreement would need to be signed. Generally, a deposit of 2 times the estimated highest monthly bill will be required, with a minimum deposit of \$250 for non-demand customers, and minimum deposit of \$1,000 for demand customers. The deposit shall be in the form of a cash deposit, or an irrevocable letter of credit. The irrevocable letter of credit will be renewed as required and failure to do so will result in a charge equal to the amount of the letter of credit applied to the monthly utility bill and held by the Utilities as a cash deposit.

Deposits will be retained until the account is closed. The deposit will be returned to the customer within 45 days of termination of service, provided that the customer has paid in full all amounts due on the account. The appropriate interest will be applied to the account per state statutes.

Statements of Revenues, Expenses and Changes in Net Position. While the Statements of Net Position show the change in financial assets/deferred outflows and liabilities/deferred inflows, the Statements of Revenues, Expenses and Changes in Net Position, provide answers as to the nature and source of these changes. As can be seen in Table A-2, revenues in excess of expenses were the main source of the increase in net position in fiscal 2024. A closer examination of the individual categories affecting the source of changes in net position is discussed below:

Table A-2 Condensed Statements of Revenues, Expenses and Changes in Net Position

	2024	2023	Increase (Decrease)
Revenues	\$ 46,082,215	\$ 47,834,738	\$ (1.752.523)
Operating	+,,		+ (:/: -=/-=-/
Nonoperating Total Revenues	<u>1,776,015</u> 47,858,230	1,625,170 49,459,908	<u>150,845</u> (1,601,678)

Expenses			
Operating	43,560,442	45,253,729	(1,693,287)
Nonoperating	807,697	847,654	(39,957)
Total Expenses	44,368,139	46,101,383	(1,733,244)
Income Before Contributions and Operating Transfers	3,490,091	3,358,525	131,566
Capital Contributions - Developer Infrastructure and Connection Fees	477,998	253,341	224,657
Contribution from Customers	712,844	489,452	223,392
Transfers from Other City Funds	-	1,348,943	(1,348,943)
Transfers to Other City Funds	(1,527,629)	(1,620,378)	92,749
Change in Net Position	3,153,304	3,829,883	(676,579)
Net Position, January 1	81,701,248	77,871,365	3,829,883
Net Position, December 31	\$ 84,854,552	\$ 81,701,248	\$ 3,153,304

Revenues. Table A-2 shows that operating revenue decreased by 3.7 percent in 2024 for the Electric and Water Departments combined.

Nonoperating revenue is comprised of transmission rebate revenue in the Electric Department, and water tower lease revenue in the Water Department. Regarding transmission rebates, in 2007 the Electric Department partnered with Midwest Municipal Transmission Group (MMTG) in order to have our transmission assets recognized in the Midwest Independent Transmission System Operator (MISO) market. In doing so, our transmission assets generate a revenue rebate, which in turn helps keep our rates down. In 2024, rebates received from our 2022 filings averaged approximately \$52,104 per month. The Water Department is receiving lease revenue from Sprint and Verizon for antennas on the water towers. In 2024 this amount was approximately \$398,737 and will continue for the duration of the multi-year contracts.

Total Expenses. In reviewing total expenses in Table A-2 you will notice that there was a decrease overall, with the electric department decreasing and the water department increasing from the prior year. Purchased Power is the biggest electric department expense, and it decreased 8.5 percent.

Capital Assets and Debt Administration

Capital Assets. The Utilities' investment in capital assets for its business-type activities as of December 31, 2024 is shown below (net of accumulated depreciation). This investment in capital assets includes land, buildings, improvements, and equipment. A table summarizing the balances by fund follows:

	2024	2023	Increase (Decrease)
Land	\$ 898,5	84 \$ 898,584	\$ -
Intangible	24,540,93	31 24,262,932	277,999
Land Improvements	8,0	79 9,307	(1,228)
Buildings	15,236,0	51 14,957,145	278,906
Machinery and Equipment	2,343,9	54 2,609,644	(265,690)
Infrastructure	53,368,2	73 46,892,112	6,476,161
Construction in Progress	325,9	98 2,310,731	(1,984,733)
Total Percent increase (decrease)	\$ 96,721,8	91,940,455	\$ 4,781,415

The Utilities' investment in capital assets for the current fiscal year increased in total.

Major capital asset events during the current fiscal year included the following:

- The Electric Department makes a loss of revenue payment as part of the cost of the territory acquisition increasing Intangibles.
- Completion of the new field services facility was built for both the Electric and Water Department which makes up the majority of the increase in Buildings.
- The Electric and Water Departments completed a portion of an Advanced Metering Infrastructure project that contributed to the increase in Infrastructure.

Additional information on the Utilities' capital assets can be found in Note 2C starting on page 38 of this report.

Long-term Debt. At year end, the Utilities had \$29,755,695 in long-term debt which decreased from fiscal 2023. More detailed information about the Utilities' long-term liabilities can be found in Note 2D starting on page 39 and below:

	2024	2023	Increase (Decrease)
G.O. Revenue Bonds Revenue Bonds Unamortized Premium on Bonds	\$ 1,445,000 27,005,000 1,305,695	\$ 1,505,000 27,960,000 1,372,207	\$ (60,000) (955,000) (66,512)
Total Percent increase (decrease)	\$ 29,755,695	\$ 30,837,207	\$ (1,081,512) (3.5%)

Economic Factors and Next Year's Budgets and Rates

The increased emphasis toward renewable energy and away from coal-based energy, the challenge to reduce energy and water consumption while still maintaining the existing infrastructure and the smart grid developments are all factors that point to potential increased cost in the coming years. It is the Utilities' goal to not have to rely on increasing rates to meet those increases but continue to look for ways to increase efficiency and reduce costs, while providing excellent customer service. Elk River Municipal Utilities' mission is to provide safe, cost-effective, reliable, quality utilities in an environmentally and financially responsible manner. We have met that mission in our customer service delivery and our successful financial results and will continue to strive to meet that mission in the future.

Contacting the Utilities Finance Manager

This financial report is designed to provide our citizens, customers, investors, and creditors with a general overview of the Utilities' finances and to demonstrate the Utilities' accountability for the money it receives. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to Melissa Karpinski, Elk River Municipal Utilities, PO Box 430, Elk River, Minnesota 55330-0430 or at 13069 Orono Parkway in Elk River, MN.

Note 1: Summary of Significant Accounting Policies

A. Nature of the Business

The Elk River Municipal Utilities (the Utilities) is a municipal utility established by action of the City of Elk River (the City) pursuant to Minnesota statute 412.321 and consequently it's Electric and Water funds are enterprise funds of the City. The Public Utilities Commission (the Commission) members are appointed by the City Council. The Commission determines all matters of policy. The Commission appoints personnel responsible for the proper administration of all affairs relating to the Utilities. The Utilities distribute electricity to the residents and businesses of Elk River and parts of Dayton, Big Lake Township and Otsego, Minnesota. The Utilities distributes water to the residents and businesses of Elk River, Minnesota.

The Utilities has considered all potential units for which it is financially accountable, and other organizations for which the nature and significance of their relationship with the Utilities are such that exclusion would cause the Utilities' financial statements to be misleading or incomplete. The Governmental Accounting Standards Board (GASB) has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body, and (1) the ability of the primary government to impose its will on that organization or (2) the potential for the organization to provide specific benefits to or impose specific financial burdens on the primary government. There are no component units.

B. Measurement Focus, Basis of Accounting and Basis of Presentation

The accounts of the Utilities are organized and operated on the basis of funds. A fund is an independent fiscal and accounting entity with a self-balancing set of accounts. Fund accounting segregates funds according to their intended purpose and is used to aid management in demonstrating compliance with finance-related legal and contractual provisions. The minimum number of funds is maintained consistently with legal and managerial requirements.

Revenue resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on an accrual basis when the exchange takes place.

Non-exchange transactions, in which the Utilities receives value without directly giving equal value in return, include grants, entitlements and donations. Revenue from grants, entitlements and donations is recognized in the year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the year when use is first permitted, matching requirements, in which the Utilities must provide local resources to be used for a specified purpose, and expenditure requirements, in which the resources are provided to the Utilities on a reimbursement basis.

Grants and entitlements received before eligibility requirements are met are also recorded as unearned revenue.

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Proprietary funds are accounted for on the flow of economic resources measurement focus and use the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded at the time liabilities are incurred. Proprietary funds include the following fund type:

Enterprise funds account for those operations that are financed and operated in a manner similar to private business or where the Utilities has decided that the determination of revenues earned, costs incurred and/or net income is necessary for management accountability.

Note 1: Summary of Significant Accounting Policies (Continued)

The Utilities reports the following major proprietary funds:

The *Electric fund* accounts for the electric distribution operations.

The Water fund accounts for the water distribution operations.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Electric and Water enterprise funds are charges to customers for sales and service. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

C. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources and Net Position

Cash and Cash Equivalents

The Utilities' cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of acquisition. The proprietary funds' portion in the government-wide cash and temporary investments pool is considered to be cash and cash equivalents for purposes of the statements of cash flows.

Cash balances from all funds are pooled and invested, to the extent available, in certificates of deposit and other authorized investments. Earnings from such investments are allocated on the basis of applicable participation by each of the funds.

The Utilities may also invest idle funds as authorized by Minnesota statutes, as follows:

- 1. Direct obligations or obligations guaranteed by the United States or its agencies.
- 2. Shares of investment companies registered under the Federal Investment Company Act of 1940 and received the highest credit rating, rated in one of the two highest rating categories by a statistical rating agency, and have a final maturity of thirteen months or less.
- 3. General obligations of a state or local government with taxing powers rated "A" or better; revenue obligations rated "AA" or better.
- 4. General obligations of the Minnesota Housing Finance Agency rated "A" or better.
- 5. Obligation of a school district with an original maturity not exceeding 13 months and (i) rated in the highest category by a national bond rating service or (ii) enrolled in the credit enhancement program pursuant to statute section 126C.55.
- 6. Bankers' acceptances of United States banks eligible for purchase by the Federal Reserve System.
- 7. Commercial paper issued by United States banks corporations or their Canadian subsidiaries of highest quality category by at least two nationally recognized rating agencies and maturing in 270 days or less.
- 8. Repurchase or reverse repurchase agreements and securities lending agreements with financial institutions qualified as a "depository" by the government entity, with banks that are members of the Federal Reserve System with capitalization exceeding \$10,000,000, a primary reporting dealer in U.S. government securities to the Federal Reserve Bank of New York, or certain Minnesota securities broker-dealers.

Note 1: Summary of Significant Accounting Policies (Continued)

9. Guaranteed Investment Contracts (GIC's) issued or guaranteed by a United States commercial bank, a domestic branch of a foreign bank, a United States insurance company, or its Canadian subsidiary, whose similar debt obligations were rated in one of the top two rating categories by a nationally recognized rating agency.

Broker money market funds operate in accordance with appropriate state laws and regulations. The reported value of the pool is the same as the fair value of the shares. The Utilities categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The Utilities' recurring fair value measurements are listed in detail on page 36 and are valued using a matrix pricing model (Level 2 inputs).

The Utilities has the following recurring fair value measurements as of December 31, 2024:

- Negotiable certificates of deposit of \$3,603,115 are valued using a matrix pricing model (Level 2 inputs).
- Asset backed securities of \$2,486,378 are valued using a matrix pricing model (Level 2 inputs).

Restricted Assets

The amounts in the restricted cash account are set aside in accordance with the issuing resolution for specific bond issues. They will be used for future debt service.

Accounts Receivable

Accounts receivable include amounts billed for services provided before year end. The Utilities has established a reserve for uncollectible accounts which is adjusted annually based on the receivable activity. No substantial losses from present receivable balances are anticipated. A summary of the uncollectible account balances at December 31, 2024 is as follows:

Electric	\$ \$ 25,355
Water	 250
Total	 \$ 25,605

Interfund Receivables and Payables

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "interfund receivables/payables" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds".

Inventories and Prepaid items

Inventories of materials and supplies are recorded at average cost, using the first-in, first-out (FIFO) method.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items.

Note 1: Summary of Significant Accounting Policies (Continued)

Lease Receivable

The Utilities' lease receivable is measured at the present value of lease payments expected to be received during the lease term. Under the lease agreement, the Utilities may receive variable lease payments that are dependent upon the lessee's revenue. The variable payments are recorded as an inflow of resources in the period the payment is received.

A deferred inflow of resources is recorded for the lease. The deferred inflow of resources is recorded at the initiation of the lease in an amount equal to the initial recording of the lease receivable. The deferred inflow of resources is amortized on a straight-line basis over the term of the lease.

Capital Assets

Capital assets are stated at cost. Capital assets are defined by the Utilities as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of two years. Expenditures for maintenance and repairs are charged to operations and expenditures that extend the useful life of the asset are capitalized and depreciated. When assets are retired or sold, the related cost and accumulated depreciation are removed from the accounts and any gain or loss on disposition is included as non-operating revenues or expenses. Donated capital assets are recorded at acquisition value at the date of donation.

Major expenditures for improvements or capital asset projects are capitalized as projects are constructed.

The Utilities follow the policy of providing depreciation on the straight-line method over the estimated useful lives of the assets, which are as follows:

	Lives II	n Years
Description	Electric	Water
Production	4 - 20	25 - 50
Transmission	30	0
Distribution	10 - 33	25 - 50
General	10 - 50	10 - 50
Machinery, Tools and Equipment	5 - 10	5 - 10
Automobiles	3 - 8	3 - 8

Deferred Outflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Utilities has one item, deferred pension resources, which qualifies for reporting in this category. Deferred pension resources result from actuarial calculation and current year pension contributions subsequent to the measurement date.

Compensated Absences

Vacation: All vacation benefits can carry over from year to year and will be payable upon termination or retirement. Upon retirement, vacation can also be converted to cash and deposited into their Post Employment Health Care Savings Plan account. Unused vacation carryover is limited to the number of hours accrued during the previous year.

Note 1: Summary of Significant Accounting Policies (Continued)

Sick Leave: Sick leave can accumulate to a maximum of 960 hours from year to year. Upon termination employees will have 50 percent of unused sick leave, up to a maximum of 960 hours, converted to cash and deposited into their Post Employment Health Care Savings Plan account. Upon retirement employees will have 50-100 percent of unused sick leave, up to a maximum of 960 hours, converted to cash and deposited into their Post Employment Health Care Savings Plan account.

The liability for vacation and sick pay is reported as a liability in the respective funds at year end.

Postemployment Benefits other than Pensions

Under Minnesota statute 471.61, subdivision 2b., public employers must allow retirees and their dependents to continue coverage indefinitely in an employer-sponsored health care plan, under the following conditions: 1) Retirees must be receiving (or eligible to receive) an annuity from a Minnesota public pension plan, 2) Coverage must continue in group plan until age 65, and retirees must pay no more than the group premium, and 3) Retirees may obtain dependent coverage immediately before retirement. Elk River Utilities has switched to age-based medical premiums and no longer has an Other Post-Employment Benefits liability. Since medical premiums are age-based, the premiums are equal to the expected true cost of retiree coverage. As a result, there is no implicit subsidy for these benefits. There is also no explicit subsidy, since retirees must pay the full premium to remain covered during retirement.

Pensions

For purposes of measuring the net pension liability, deferred outflows/inflows of resources, and pension expense, information about the fiduciary net position of the Public Employees Retirement Association (PERA) and additions to/deductions from PERA's fiduciary net position have been determined on the same basis as they are reported by PERA except that PERA's fiscal year end is June 30. For this purpose, plan contributions are recognized as of employer payroll paid dates and benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

The total pension expense for all plans recognized by the Utilities for the year ended December 31, 2024 was \$140,028. The components of pension expense are noted in the plan summaries in Note 4.

Long-term Obligations

Long-term debt is reflected as a liability in the fund issuing the obligation. Bond premiums and discounts are amortized over the life of the bonds using the straight-line method. Bond issuance costs are reported as an expense in the period incurred.

Performance Metrics and Incentive Compensation

Through the Utilities Performance Metric-based Incentive Compensation system (UPMIC) the Utilities employees will have an opportunity, as a group, to each earn a maximum of 3 percent of their total gross wage paid during the Measurement Period. The percentage of UMPIC is calculated using a Score Card. The Score Card has three categories: Safety, Reliability and Quality of Utility Services which are divided into various weighted factors. This incentive was created to help the Utilities to become more efficient and successful in meeting strategic goals and mission and deliver improved value to the Utilities customers. The liability at year end is recorded as part of accrued wages.

Note 1: Summary of Significant Accounting Policies (Continued)

Deferred Inflows of Resources

In addition to liabilities, the statement of net position and fund financial statements will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Utilities has two types of items which qualify for reporting in this category. The items, deferred pension resources and deferred lease resources, are reported in the statement of net position and results from actuarial calculations and future lease receipts.

Net Position

Net position represents the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. Net position is displayed in three components:

- a. Net investment in capital assets Consists of capital assets, net of accumulated depreciation reduced by any outstanding debt attributable to acquired capital assets.
- b. Restricted net position Consists of net position restricted when there are limitations imposed on their use through external restrictions imposed by creditors, grantors, laws or regulations of other governments.
- c. Unrestricted net position All other net positions that do not meet the definition of "restricted" or "net investment in capital assets".

When both restricted and unrestricted resources are available for use, it is the Utilities' policy to use restricted resources first, then unrestricted resources as they are needed.

Note 2: Detailed Notes on All Funds

A. Deposits and Investments

Custodial credit risk for deposits and investments is the risk that in the event of a bank failure, the Utilities' deposits and investments may not be returned or the Utilities will not be able to recover collateral securities in the possession of an outside party. In accordance with Minnesota statutes and as authorized by the Commission, the Utilities maintains deposits at those depository banks, all of which are members of the Federal Reserve System.

Minnesota statutes require that all Utilities deposits be protected by insurance, surety bond or collateral. The fair value of collateral pledged must equal 110 percent of the deposits not covered by insurance or bonds, with the exception of irrevocable standby letters of credit issued by Federal Home Loan Banks as this type of collateral only requires collateral pledged equal to 100 percent of the deposits not covered by insurance or bonds.

Note 2: Detailed Notes on All Funds (Continued)

Authorized collateral in lieu of a corporate surety bond includes:

- United States government Treasury bills, Treasury notes, Treasury bonds;
- Issues of United States government agencies and instrumentalities as quoted by a recognized industry quotation service available to the government entity;
- General obligation securities of any state or local government with taxing powers which is rated "A" or better by a national bond rating service, or revenue obligation securities of any state or local government with taxing powers which is rated "AA" or better by a national bond rating service;
- General obligation securities of a local government with taxing powers may be pledged as collateral against funds deposited by that same local government entity;
- Irrevocable standby letters of credit issued by Federal Home Loan Banks to a municipality accompanied by
 written evidence that the bank's public debt is rated "AA" or better by Moody's Investors Service, Inc., or Standard
 & Poor's Corporation; and
- Time deposits that are fully insured by any federal agency.

Minnesota statutes require that all collateral shall be placed in safekeeping in a restricted account at a Federal Reserve Bank, or in an account at a trust department of a commercial bank or other financial institution that is not owned or controlled by the financial institution furnishing the collateral. The selection should be approved by the government entity.

At December 31, 2024, the Utilities' carrying amount of deposits, bank balance, FDIC coverage and pledged collateral are shown in the chart below.

Carrying amount of deposits	\$ 13,578,803
Bank Balance Covered by FDIC	\$ 13,459,228 (379,784)
Collateralized with securities pledged in the Utilities' name	\$ 13,079,444

Note 2: Detailed Notes on All Funds (Continued)

Investments

The Utilities' investment balances were as follows for December 31, 2024:

	Credit Quality/	Segmented Time		Fair V	alue Measuremen	t Using
Types of Investments	Ratings (1)	Distribution (2)	Amount	Level 1	Level 2	Level 3
Pooled Investments						
Broker Money Markets	N/A	less than 1 year	\$ 5,086,050	\$ -	\$ -	\$ -
Non-pooled Investments						
Negotiable certificates of deposits	N/A	less than 1 year	954,262	-	954,262	-
Negotiable certificates of deposits	N/A	1 - 5 years	2,648,853	-	2,648,853	-
Asset backed securities	N/A	1 - 5 years	2,247,693	-	2,247,693	-
Asset backed securities	N/A	more than 5 years	238,685	-	238,685	-
Total Non-pooled Investments		•	6,089,493		6,089,493	
Total Investments			\$ 11,175,543	\$ -	\$ 6,089,493	\$ -

- (1) Ratings were provided by various credit rating agencies where applicable to indicate associated credit risk.
- (2) Interest rate risk is disclosed using the segmented time distribution method.
- N/A Indicates not applicable.

A reconciliation of cash and temporary investments as shown in the financial statements for the Utilities follows:

	2024
Deposits Investments Cash on Hand	\$ 13,578,803 11,175,543 800
Total	<u>\$ 24,755,146</u>
Cash and Temporary Investments Unrestricted Restricted	\$ 22,976,130 1,779,016
Total	\$ 24,755,146

Note 2: Detailed Notes on All Funds (Continued)

The investments of the Utilities are subject to the following risks:

- Credit Risk. Is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. Ratings
 are provided by various credit rating agencies and where applicable, indicate associated credit risk. Minnesota
 statutes and the Utilities' investment policy limit the Utilities' investments to the list on page 30 of the notes.
- Custodial Credit Risk. The custodial credit risk for investments is the risk that, in the event of the failure of the
 counterparty to a transaction, a government will not be able to recover the value of investment or collateral
 securities that are in the possession of an outside party. According to their investment policy the Utilities'
 portfolio maturities shall be staggered to avoid undue concentration of assets with one broker-dealer or financial
 institution.
- Concentration of Credit Risk. Is the risk of loss attributed to the magnitude of a government's investment in a single issuer. According to their investment policy the Utilities' portfolio maturities shall be staggered to avoid undue concentration of assets in any one type of instrument. As of December 31, 2024 the Utilities has no individual issuers invested in 5.0 percent or more of its total investment portfolio.
- Interest Rate Risk. Is the risk that changes in interest rates will adversely affect the fair value of an investment. According to their investment policy the Utilities' will stagger maturities to avoid undue concentration of assets at a specific maturity sector.

B. Lease Receivable

The Utilities has multiple leases with Sprint and Verizon that allows them to place antennas on water towers. The lease payments increase yearly. As of December 31, 2024, the Utilities' lease and interest receivable balance was \$4,772,914. The lease receivable is partially offset with deferred inflow of lease resources.

Description	Authorized and Issued	Interes Rate	t	Issue Date	Maturity Date	В	Lease eceivable alance at 'ear End	Rec	terest eivable at ear End	_	Balance at Year End

Total Depreciation Expense - Business-type Activities	\$ 4,540,862

D. Long-term Debt

General Obligation Revenue Bonds

The City of Elk River issues general obligation bonds to provide funds for the acquisition and construction of major capital facilities. The following bonds are to be paid out of Utilities' revenues and are backed by the full faith and credit of the City.

Description	Authorized and Issued	Interest Rate	Issue Date	Maturity Date	Balance at Year End
G.O. Water Revenue Bonds, Series 2021C	1,615,000	2.00 - 4.00 %	06/10/21	08/01/41	\$ 1,445,000

The annual debt service requirements to maturity for the general obligation revenue bonds are as follows:

Year Ending December 31,		rincipal		nterest		Total
2025	\$	65,000	\$	39,200	ć	104,200
2025	Ş	70,000	Ą	39,200 36,600	\$	104,200
2027		70,000		33,800		103,800
2028		75,000		31,000		106,000
2029		75,000		28,000		103,000
2030 - 2034		420,000		97,500		517,500
2035 - 2039		470,000		48,700		518,700
2040 - 2041		200,000		6,000		206,000
Total	\$	1,445,000	Ś	320,800	Ś	1,765,800
iotai	<u> </u>	1,770,000	<u> </u>	320,000	<u> </u>	1,700,000

In 2024, annual principal and interest payment on the bonds required about 3.5 percent of revenues from the Water fund. The principal and interest paid and total customer revenues for the Water fund were \$101,600 and \$2,907,113, respectively.

Note 2: Detailed Notes on All Funds (Continued)

Revenue Bonds

The revenue bonds were issued to facilitate the membership buy-in with MMPA and construction of major capital facilities and are to be repaid from future revenue pledged from the Electric fund. They will be retired from net revenues of the fund.

Description	Authorized and Issued	Interest Rate	Issue Date	Maturity Date	Balance at Year End
Electric Revenue Bonds, Series 2016A Electric Revenue Bonds, Series 2018A	\$ 9,755,000 10.000.000	2.00 - 4.00 % 3.50 - 5.00	07/14/16 09/26/18	02/01/36 08/01/48	\$ 7,020,000 8,815,000

2050 - 2051	1,090,000)	36,900	1,126,900
Total	\$ 27,005,000	\$ 9,8	355,311	\$ 36,860,311

In 2024, annual principal and interest payment on the bonds required about 4.2 percent of revenues from the Electric fund. The principal and interest paid and total customer revenues for the Electric fund were \$1,804,381 and \$43,175,102, respectively.

Note 2: Detailed Notes on All Funds (Continued)

Changes in Long-term Liabilities

Long-term liability activity for the year ended December 31, 2024 was as follows:

	Beginning Balance	Increases Decreases		Ending Balance	Due Within One Year
Business-type Activities					
Bonds Payable					
General obligation					
revenue bonds	\$ 1,505,000	\$ -	\$ (60,000)	\$ 1,445,000	\$ 65,000
Revenue bonds	27,960,000	-	(955,000)	27,005,000	990,000
Unamortized premium					
on bonds	1,372,207		(66,512)	1,305,695	<u> </u>
Total Bonds Payable, Net	30,837,207		(1,081,512)	29,755,695	1,055,000
Compensated					
Absences Payable	522,112	981,478	(536,226)	967,364	967,364
Business-type Activity Long-term					
Liabilities	\$ 31,359,319	\$ 981,478	\$ (1,617,738)	\$ 30,723,059	\$ 2,022,364

Note 2: Detailed Notes on All Funds (Continued)

Transfers

During the year ended December 31, 2024, the Utilities made the following transfers:

Transfer to Other City Funds

Electric

\$ 1,527,629

• The transfer out of the Electric fund was the annual transfer of 4 percent of 2024 Elk River revenues to City funds.

Note 3: Other Information

A. Territorial Acquisition Agreement

In 2015, the Utilities entered into an agreement to transfer ownership of electric plants and electric service to customers in eight designated areas receiving service from Connexus Energy. Specific payment terms have been negotiated for 5 years, and if any of the eight areas are not acquired within this timeframe, the payment terms may be renegotiated. In 2019, the Utilities acquired the final service areas.

The agreed cost of property purchased from Connexus Energy is net book value, integration expenses, and a loss of revenue payment. The loss of revenue payment for each area acquired is based on a formula outlined in the agreement, payable for the subsequent ten years after initial purchase.

The Utilities acquired designated service area 1 in 2015 for \$877,807, service area 2 in 2016 for \$663,586, service areas 3 and 4 in 2017 for \$276,776, service areas 5 and 6 in 2018 for \$298,736, and service areas 7 and 8 in 2019 for \$78,457. The loss of revenue payments made were \$411,157 in 2017, \$570,725 in 2018, \$751,860 in 2019, \$834,185 in 2020, \$857,538 in 2021, \$924,187 in 2022, \$940,467 in 2023, \$933,159 in 2024, and \$946,133 in 2025. All amounts paid are included in property and equipment, and loss of revenue payments are included in intangible assets.

B. Risk Management

The Utilities are exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters for which the Utilities carries commercial insurance. The Utilities obtain insurance through participation in the League of Minnesota Cities Insurance Trust (LMCIT), which is a risk sharing pool with approximately 800 other governmental units. The Utilities pays an annual premium to LMCIT for its workers compensation and property and casualty insurance. The LMCIT is self-sustaining through member premiums and will reinsure for claims above a prescribed dollar amount for each insurance event. Settled claims have not exceeded the Utilities' coverage in any of the past three fiscal years.

Liabilities are reported when it is probable that a loss has occurred, and the amount of the loss can be reasonably estimated. Liabilities, if any, include an amount for claims that have been incurred but not reported (IBNRs). The Utilities' management is not aware of any incurred but not reported claims.

Note 3: Other Information (Continued)

C. Commitments

The Utilities entered into an agreement in 2007 with Central Minnesota Municipal Power Agency (CMMPA) to acquire an interest in the CAPX Initiative Brookings Project, a power transmission line in Minnesota. The project is a 250-mile, 345 kV AC transmission line with a rating of 2,300 MW, between Brookings, South Dakota, and the Southeast Twin Cities. In 2011 there was increased opportunity for investment, and subsequent agreements provide the Utilities with an ownership share of \$5.6 million or 18.89 percent. Revenues have been less than originally projected due to the decrease in Rate of Return (ROE) issued by FERC. The original ROE 12.38% has been reduced to 10.48%. The current return of 10.48% on this investment through CMMPA is designed to provide approximately \$80K annually over the 40-year project life. With majority of the distribution once the bonds are paid off. The projected under recovery in 2024 is estimated to be \$146K. The bond obligations are satisfied first, distribution to participants is directly affected by under recovery. The under recovery is rolled forward under the true up. However, the under recovery in 2024 (approximately \$146K) would be included in the revenue requirements in 2026. The transmission payments for 2024 were \$0.

Note 4: Defined Benefit Pension Plans - Statewide

A. Plan Description

The Utilities participates in the following cost-sharing multiple-employer defined benefit pension plans administered by the Public Employees Retirement Association of Minnesota (PERA). These plan provisions are established and administered according to Minnesota Statutes chapters 353, 353D, 353E, 353G, and 356. Minnesota Statutes chapter 356 defines each plan's financial reporting requirements. PERA's defined benefit pension plans are tax qualified plans under Section 401(a) of the Internal Revenue Code.

General Employees Retirement Plan (General Plan)

Membership in the General Plan includes employees of counties, cities, townships, schools in non-certified positions, and other governmental entities whose revenues are derived from taxation, fees, or assessments. Plan membership is required for any employee who is expected to earn more than \$425 in a month, unless the employee meets exclusion criteria.

B. Benefits Provided

PERA provides retirement, disability, and death benefits. Benefit provisions are established by state statute and can only be modified by the state Legislature. Vested, terminated employees who are entitled to benefits, but are not receiving them yet, are bound by the provisions in effect at the time they last terminated their public service. When a member is "vested," they have earned enough service credit to receive a lifetime monthly benefit after leaving public service and reaching an eligible retirement age. Members who retire at or over their Social Security full retirement age with at least one year of service qualify for a retirement benefit.

General Employees Plan Benefits

General Employees Plan requires three years of service to vest. Benefits are based on a member's highest average salary for any five successive years of allowable service, age, and years of credit at termination of service. Two methods are used to compute benefits for General Plan members. Members hired prior to July 1, 1989, receive the higher of the Step or Level formulas. Only the Level formula is used for members hired after June 30, 1989. Under the Step formula, General Plan members receive 1.2 percent of the highest average salary for each of the first 10 years of service and 1.7 percent for each additional year. Under the Level formula, General Plan members receive 1.7 percent of highest average salary for all years of service. For members hired prior to July 1, 1989 a full retirement benefit is available when age plus years of service equal 90 and normal retirement age is 65. Members can receive a reduced requirement benefit as early as age 55 if they have three or more years of service. Early retirement benefits are reduced by .25 percent for each month under age 65. Members with 30 or more years of service can retire at any age with a reduction of 0.25 percent for each month the member is younger than age 62. The Level formula allows General Plan members to receive a full retirement benefit at age 65 if they were first hired before July 1, 1989 or at age 66 if they were hired on or after July 1, 1989. Early retirement begins at age 55 with an actuarial reduction applied to the benefit.

Benefit increases are provided to benefit recipients each January. The postretirement increase is equal to 50 percent of the cost-of-living adjustment (COLA) announced by the SSA, with a minimum increase of at least 1 percent and a maximum of 1.5 percent. The 2024 annual increase was 1.5 percent. Recipients that have been receiving the annuity or benefit for at least a full year as of the June 30 before the effective date of the increase will receive the full increase. Recipients receiving the annuity or benefit for at least one month but less than a full year as of the June 30 before the effective date of the increase will receive a prorated increase.

Note 4: Defined Benefit Pension Plans - Statewide (Continued)

C. Contributions

Minnesota Statutes chapters 353, 353E, 353G, and 356 set the rates for employer and employee contributions. Contribution rates can only be modified by the state Legislature.

General Employees Fund Contributions

General Plan members were required to contribute 6.50 percent of their annual covered salary in fiscal year 2024 and the Utilities was required to contribute 7.50 percent for General Plan members. The Utilities' contributions to the General Employees Fund for the years ending December 31, 2024, 2023 and 2022, were \$349,758, \$339,650 and \$333,178, respectively. The Utilities' contributions were equal to the required contributions for each year as set by state statute.

D. Pension Costs

General Employees Fund Pension Costs

At December 31, 2024, the Utilities reported a liability of \$2,037,020 for its proportionate share of the General Employees Fund's net pension liability. The Utilities' net pension liability reflected a reduction due to the State of Minnesota's contribution of \$16 million. The State of Minnesota is considered a non-employer contributing entity and the state's contribution meets the definition of a special funding situation. The State of Minnesota's proportionate share of the net pension liability associated with the Utilities totaled \$52,673.

Utilities' Proportionate Share of the Net Pension Liability State of Minnesota's Proportionate Share of the Net Pension	\$ 2,037,020
Liability Associated with the Utilities	52,673
Total	\$ 2,089,693

The net pension liability was measured as of June 30, 2024, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Utilities's proportion of the net pension liability was based on the Utilities's contributions received by PERA during the measurement period for employer payroll paid dates from July 1, 2023 through June 30, 2024, relative to the total employer contributions received from all of PERA's participating employers. The Utilities's proportionate share was 0.0551 percent at the end of the measurement period and 0.0576 percent for the beginning of the period.

For the year ended December 31, 2024, the Utilities recognized pension expense of \$47,314 for its proportionate share of the General Employees Plan's pension expense. In addition, the Utilities recognized an additional negative \$1,011 as pension expense (and grant revenue) for its proportionate share of the State of Minnesota's contribution of \$16 million to the General Employees Fund.

During the plan year ended June 30, 2024, the State of Minnesota contributed \$170.1 million to the General Employees Fund. The State of Minnesota is not included as a non-employer contributing entity in the General Employees Plan pension allocation schedules for the \$170.1 million in direct state aid because this contribution was not considered to meet the definition of a special funding situation. The Utilities recognized \$93,722 for the year ended December 31, 2024 as revenue and an offsetting reduction of net pension liability for its proportionate share of the State of Minnesota's on-behalf contributions to the General Employees Fund.

Note 4: Defined Benefit Pension Plans - Statewide (Continued)

At December 31, 2024, the Utilities reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Ö	Deferred Outflows Resources	Deferred Inflows of Resources		
Differences between expected and actual economic experience	\$	194,277	\$	_	
Changes in actuarial assumptions		10,289		796,520	
Net difference between projected and actual investment earnings					
on pension plan investments		-		572,406	
Changes in proportion		11,880		69,889	
Employer contributions paid to PERA subsequent to the					
measurement date		167,155			
Total	\$	383,601	\$	1,438,815	

The \$167,155 reported as deferred outflows of resources related to pensions resulting from the Utilities' employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2025. Other amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

2025	\$ (666,852)
2026	(146,780)
2027	(252,612)
2028	(156,125)

E. Long-term Expected Return on Investment

The State Board of Investment, which manages the investments of PERA, prepares an analysis of the reasonableness on a regular basis of the long-term expected rate of return using a building-block method in which best-estimate ranges of expected future rates of return are developed for each major asset class. These ranges are combined to produce an expected long-term rate of return by weighting the expected future rates of return by the target asset allocation percentages. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Return on Investment
Domestic Equity	33.5 %	5.10 %
International Equity	16.5	5.30
Fixed Income	25.0	0.75
Private Markets	25.0	5.90
Total	100.0_%	

Note 4: Defined Benefit Pension Plans - Statewide (Continued)

F. Actuarial Methods and Assumptions

The total pension liability for each of the cost-sharing defined benefit plans was determined by an actuarial valuation as of June 30, 2024, using the entry age normal actuarial cost method. The long-term rate of return on pension plan investments used to determine the total liability is 7%. The 7% assumption is based on a review of inflation and investment return assumptions from a number of national investment consulting firms. The review provided a range of investment return rates considered reasonable by the actuary. An investment return of 7% is within that range.

Inflation is assumed to be 2.25% for the General Employees Plan. Benefit increases after retirement are assumed to be 1.25% for the General Employees Plan.

Salary growth assumptions in the General Employees Plan range in annual increments from 10.25% after one year of service to 3% after 27 years of service. Mortality rates for the General Employees Plan are based on the Pub-2010 General Employee Mortality Table.

Actuarial assumptions for the General Employees Plan are reviewed every four years. The General Employees Plan was last reviewed in 2022. The assumption changes were adopted by the board and became effective with the July 1, 2023 actuarial valuation.

The following changes in actuarial assumptions and plan provisions occurred in 2024:

General Employees Fund

Changes in Actuarial Assumptions:

- Rates of merit and seniority were adjusted, resulting in slightly higher rates.
- Assumed rates of retirement were adjusted as follows: increase the rate of assumed unreduced retirements, slight adjustments to Rule of 90 retirement rates, and slight adjustments to early retirement rates for Tier 1 and Tier 2 members.
- · Minor increase in assumed withdrawals for males and females.
- · Lower rates of disability.
- Continued use of Pub-2010 general mortality table with slight rate adjustments as recommended in the most recent experience study.
- Minor changes to form of payment assumptions for male and female retirees.
- Minor changes to assumptions made with respect to missing participant data.

Changes in Plan Provisions:

•The workers' compensation offset for disability benefits was eliminated. The actuarial equivalent factors updated to reflect the changes in assumptions.

Note 4: Defined Benefit Pension Plans - Statewide (Continued)

G. Discount Rate

The discount rate used to measure the total pension liability in 2024 was 7.0 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and employers will be made at rates set in Minnesota Statutes. Based on these assumptions, the fiduciary net position of the General Employees Plans were projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

H. Pension Liability Sensitivity

The following presents the Utilities's proportionate share of the net pension liability for all plans it participates in, calculated using the discount rate disclosed in the preceding paragraph, as well as what the Utilities' proportionate share of the net pension liability would be if it were calculated using a discount rate one percentage point lower or one percentage point higher than the current discount rate:

	1	1 Percent	1 Percent				
	Dec	rease (6.0%)	Cu	rrent (7.0%)	Increase (8.0%)		
General Employees Fund	\$	4,449,179	\$	2,037,020	\$	52,799	

I. Pension Plan Fiduciary Net Position

Detailed information about each pension plan's fiduciary net position is available in a separately issued PERA financial report that includes financial statements and required supplementary information. That report may be obtained on the Internet at www.mnpera.org.

Elk River Municipal Utilities

Elk River, Minnesota Required Supplementary Information (Continued) For the Year Ended December 31, 2024

Notes to the Required Supplementary Information - General Employees Fund

Changes in Actuarial Assumptions

2024 - The following changes in assumptions are effective with the July 1, 2024 valuation, as recommended in the most recent experience study (dated June 29, 2023): Rates of merit and seniority were adjusted, resulting in slightly higher rates. Assumed rates of retirement were adjusted as follows: increase the rate of assumed unreduced retirements, slight adjustments to Rule of 90 retirement rates, and slight adjustments to early retirement rates for Tier 1 and Tier 2 members. Minor increase in assumed withdrawals for males and females. Lower rates of disability. Continued use of Pub-2010 general mortality table with slight rate adjustments as recommended in the most recent experience study. Minor changes to form of payment assumptions for male and female retirees. Minor changes to assumptions made with respect to missing participant data.

- 2023 The investment return assumption and single discount rate were changed from 6.5 percent to 7.00 percent.
- 2022 The mortality improvement scale was changed from Scale MP-2020 to Scale MP-2021.
- 2021 The investment return and single discount rates were changed from 7.50 percent to 6.50 percent, for financial reporting purposes. The mortality improvement scale was changed from Scale MP-2019 to Scale MP-2020.
- 2020 The price inflation assumption was decreased from 2.50% to 2.25%. The payroll growth assumption was decreased from 3.25% to 3.00%. Assumed salary increase rates were changed as recommended in the June 30, 2019 experience study. The net effect is assumed rates that average 0.25% less than previous rates. Assumed rates of retirement were changed as recommended in the June 30, 2019 experience study. The changes result in more unreduced (normal) retirements and slightly fewer Rule of 90 and early retirements. Assumed rates of termination were changed as recommended in the June 30, 2019 experience study. The new rates are based on service and are generally lower than the previous rates for years 2-5 and slightly higher thereafter. Assumed rates of disability were changed as recommended in the June 30, 2019 experience study. The change results in fewer predicted disability retirements for males and females. The base mortality table for healthy annuitants and employees was changed from the RP-2014 table to the Pub-2010 General Mortality table, with adjustments. The base mortality table for disabled annuitants was changed from the RP-2014 disabled annuitant mortality table to the PUB-2010 General/Teacher disabled annuitant mortality table, with adjustments. The mortality improvement scale was changed from Scale MP-2018 to Scale MP-2019. The assumed spouse age difference was changed from two years older for females to one year older. The assumed number of married male new retirees electing the 100% Joint & Survivor option changed from 35% to 45%. The assumed number of married female new retirees electing the 100% Joint & Survivor option changed from 15% to 30%. The corresponding number of married new retirees electing the Life annuity option was adjusted accordingly.
- 2019 The mortality projection scale was changed from MP-2017 to MP-2018.
- 2018 The morality projection scale was changed from MP-2015 to MP-2017. The assumed benefit increase was changed from 1.00 percent per year through 2044 and 2.50 percent per year thereafter to 1.25 percent per year.
- 2017 The Combined Service Annuity (CSA) loads were changed from 0.8 percent for active members and 60 percent for vested and non-vested deferred members. The revised CSA loads are now 0.0 percent for active member liability, 15.0 percent for vested deferred member liability and 3.0 percent for non-vested deferred member liability. The assumed post-retirement benefit increase rate was changed from 1.0 percent per year for all years to 1.0 percent per year through 2044 and 2.5 percent per year thereafter.
- 2016 The assumed post-retirement benefit increase rate was changed from 1.0 percent per year through 2035 and 2.5 percent per year thereafter to 1.0 percent per year for all future years. The assumed investment return was changed from 7.9 percent to 7.5 percent. The single discount rate was changed from 7.9 percent to 7.5 percent. Other assumptions were changed pursuant to the experience study dated June 30, 2015. The assumed future salary increases, payroll growth and inflation were decreased by 0.25 percent to 3.25 percent for payroll growth and 2.50 percent for inflation.

Elk River Municipal Utilities

Elk River, Minnesota Required Supplementary Information (Continued) For the Year Ended December 31, 2024

Notes to the Required Supplementary Information - General Employees Fund (Continued)

Changes in Actuarial Assumptions (Continued)

2015 - The assumed post-retirement benefit increase rate was changed from 1.0 percent per year through 2030 and 2.5 percent per year thereafter to 1.0 percent per year through 2035 and 2.5 percent per year thereafter.

Changes in Plan Provisions

- 2024 The workers' compensation offset for disability benefits was eliminated. The actuarial equivalent factors updated to reflect the changes in assumptions.
- 2023 An additional one-time direct state aid contribution of \$170.1 million will be contributed to the Plan on October 1, 2023. The vesting period of those hired after June 30, 2010, was changed from five years of allowable service to three years of allowable service. The benefit increase delay for early retirements on or after January 1, 2024, was eliminated. A one-time, non-compounding benefit increase of 2.5 percent minus the actual 2024 adjustment will be payable in a lump sum for calendar year 2024 by March 31, 2024.
- 2022 There were no changes in plan provisions since the previous valuation.
- 2021 There were no changes in plan provisions since the previous valuation.
- 2020 Augmentation for current privatized members was reduced to 2.0% for the period July 1, 2020 through December 31, 2023 and 0.0% after. Augmentation was eliminated for privatizations occurring after June 30, 2020.
- 2019 The employer supplemental contribution was changed prospectively, decreasing from \$31.0 million to \$21.0 million per year. The state's special funding contribution was changed prospectively, requiring \$16.0 million due per year through 2031.
- 2018 The augmentation adjustment in early retirement factors is eliminated over a five-year period starting July 1, 2019, resulting in actuarial equivalence after June 30, 2024. Interest credited on member contributions decreased from 4.00 percent to 3.00 percent, beginning July 1, 2018. Deferred augmentation was changed to 0.00 percent, effective January 1, 2019. Augmentation that has already accrued for deferred members will still apply. Contribution stabilizer provisions were repealed. Postretirement benefit increases were changed from 1.00 percent per year with a provision to increase to 2.50 percent upon attainment of 90.00 percent funding ratio to 50.00 percent of the Social Security Cost of Living Adjustment, not less than 1.00 percent and not more than 1.50 percent, beginning January 1, 2019. For retirements on or after January 1, 2024, the first benefit increase is delayed until the retiree reaches normal retirement age; does not apply to Rule of 90 retirees, disability benefit recipients, or survivors. Actuarial equivalent factors were updated to reflect revised mortality and interest assumptions.
- 2017 The State's contribution for the Minneapolis Employees Retirement Fund equals \$16,000,000 in 2017 and 2018, and \$6,000,000 thereafter. The Employer Supplemental Contribution for the Minneapolis Employees Retirement Fund changed from \$21,000,000 to \$31,000,000 in calendar years 2019 to 2031. The state's contribution changed from \$16,000,000 to \$6,000,000 in calendar years 2019 to 2031.
- 2016 There were no changes in plan provisions since the previous valuation.
- 2015 On January 1, 2015, the Minneapolis Employees Retirement Fund was merged into the General Employees Fund, which increased the total pension liability by \$1.1 billion and increased the fiduciary plan net position by \$892 million. Upon consolidation, state and employer contributions were revised; the State's contribution of \$6 million, which meets the special funding situation definition, was due September 2015.

ELK RIVER MUNICIPAL UTILITIES ELK RIVER, MINNESOTA

FOR THE YEAR ENDED DECEMBER 31, 2024

THIS PAGE IS LEFT BLANK INTENTIONALLY

INDEPENDENT AUDITOR'S REPORT ON MINNESOTA LEGAL COMPLIANCE

Public Utilities Commission Elk River Municipal Utilities Elk River, Minnesota

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Elk River Municipal Utilities (the Utilities) of the City of Elk River, Minnesota (the City) as of and for the year ended December 31, 2024, and the related notes to the financial statements which collectively comprises the Utilities basic financial statements, and have issued our report thereon dated April 1, 2025.

In connection with our audit, nothing came to our attention that caused us to believe that the Utilities failed to comply with the provisions of the contracting and bidding, deposits and investments, conflicts of interest, public indebtedness, claims and disbursements, and miscellaneous provisions sections of the *Minnesota Legal Compliance Audit Guide for Cities*, promulgated by the State Auditor pursuant to Minn. Stat. § 6.65, insofar as they relate to accounting matters. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance. Accordingly, had we performed additional procedures, other matters may have come to our attention regarding the Utilities' noncompliance with the above referenced provisions, insofar as they relate to accounting matters.

This report is intended solely for the information and use of those charged with governance and management of the Public Utilities Commission, and the State Auditor and is not intended to be, and should not be, used by anyone other than these specified parties.

Abdo Minneapolis, Minnesota April 1, 2025

UTILITIES COMMISSION MEETING

TO:	FROM:					
ERMU Commission	Melissa Karpinski – Finance Manager					
MEETING DATE:	AGENDA ITEM NUMBER:					
April 8, 2025	4.2					
SUBJECT:						
2024 Year End Reserve Balance						
ACTION REQUESTED:						
Designate unrestricted r	Designate unrestricted reserve balances above target levels for Electric and Water funds					

BACKGROUND:

The purpose for reserves to a public utility is to meet bond covenants and provide a financial buffer to mitigate unforeseen or volatile operational costs. In 2010, the Commission adopted a financial reserves policy that defined the structure and formula on how financial reserves will be calculated for the Electric Utility and Water Utility funds. This provides transparency to the public on the purpose and levels of utility reserves. Additionally, this policy is consistent with Governance Policy G.4i2 Financial Reserves which was adopted by the Commission in 2017.

DISCUSSION:

As defined by policy, the year-end reserve balances are to be reviewed after the completion of the audit. These balances, if above their target levels, shall be unrestricted with a defaulting designation as working capital. The Commission shall then consider optimal use of these unrestricted reserves.

Staff recommends that unrestricted reserve balances above target levels for the Electric Utility fund be designated for electric service territory transfer costs, and capital infrastructure costs; and for the Water Utility fund to be designated for capital infrastructure costs (current and future).

FINANCIAL IMPACT:

None

MANAGEMENT POLICY

Section:	Category:
Management	Administration Policies
Policy Reference:	Policy Title:
_	
A.10	Financial Reserves Policy

1.0 Purpose and Summary

In order to maintain stable rates and provide reliable services, Elk River Municipal Utilities (ERMU) requires financial buffers in the form of reserves to mitigate changes in costs or operational performance. For ERMU there are two utility funds, the Electric Utility and the Water Utility. These funds shall have separate reserves. Their reserve balances shall be classified as either *Restricted for Debt Service* or *Unrestricted Designated Reserve*.

The target levels for these reserves shall be determined by the criteria herein. These target levels and target criteria will be reviewed annually, modified by Utilities Commission to support the long-term goals of ERMU, and adopted with the annual budget. Unless otherwise specified by bond covenants, these reserve balances shall be invested consistent with ERMU's Management Investment Policy.

2.0 Electric Utility Reserve Classifications

<u>Restricted for Debt Service</u>: This reserve is established to maintain compliance with bond covenants.

The target level for this reserve shall be set at the level specified by bond covenants.

<u>Unrestricted Designated Reserve</u>: This reserve is established to address the short-term financial variability inherent in operating an Electric Utility. Potential sources of this variability include but are not limited to: risks associated with natural disasters, reduction in overall customer usage, changes in total system load resulting from the actions of large customers, failure to achieve budgeted levels of net income, changes in cost of purchased power, changes in interest income, and general operational exposures.

The target level for this reserve shall be set at the sum of 6 months operating expenditures less depreciation and less purchase power costs, plus the sum of next year's total principal and

interest payments, plus one month budgeted average purchase power cost. The balance above this target level shall be unrestricted.

3.0 Water Utility Reserve Classifications

<u>Restricted for Debt Service</u>: This reserve is established to maintain compliance with bond covenants.

The target level for this reserve shall be set at the level specified by bond covenants.

<u>Unrestricted Designated Reserve</u>: This reserve is established to address the short-term financial variability inherent in operating a Water Utility. Potential sources of this variability include but are not limited to: risks associated with natural disasters, reduction in overall customer usage, changes in total system usage resulting from the actions of large customers, failure to achieve budgeted levels of net income, changes in interest income, and general operational exposures.

The target level for this reserve shall be set at the sum of 6 months operating expenditures less depreciation plus the sum of next year's total principal and interest payments. The balance above this target level shall be unrestricted.

4.0 Year-end Reserve Balances

If the year-end reserve balances are above their target levels after the completion of the year-end audit, these balances shall be unrestricted with a defaulting designation as working capital. The Utilities Commission shall then consider optimal uses of these unrestricted reserves through any of the following but not limited to: working capital, designated for power costs (electric fund only), debt reduction, retention for reserve fund growth for future needs, or use for rate stabilization or reduction.

If the year-end reserve balances are below their target levels after the completion of the year-end audit, the Utilities Commission shall consider the balances and plan for their replenishment to target levels in a timely manner.

POLICY HISTORY:

Adopted May 11, 2010 Revised May 10, 2011 *Moved November 12, 2019 Revised July 14, 2020

^{*}As part of the Policy Manual Initiative, authority of this Financial Reserves Policy was delegated to management on November 12, 2019, and the policy was moved to the Management Policy Manual.

COMMISSION POLICY

Section:	Category:
Governance	Delegation to Management Policies
Policy Reference:	Policy Title:
G.4i2	Financial Reserves

PURPOSE:

With this policy, the Commission sets forth its expectations for the General Manager concerning the maintenance of ERMU's financial reserves.

POLICY:

The General Manager shall ensure that ERMU maintains cash reserves for its electric and water utility enterprises that are reasonable, prudent and necessary to:

- 1. Meet or exceed the requirements of all bond covenants
- 2. Demonstrate to rating agencies and investors that ERMU's utility enterprises are credit worthy
- 3. Provide liquidity that is adequate, along with other risk-management measures, to ensure ongoing operation of the utility systems
- 4. Stabilize revenue requirements and customer rates
- 5. Manage the level of debt by funding a portion of the capital investments

In addition, the General Manager shall implement a Management Financial Reserves Policy that sets forth the designated reserve funds to be maintained, along with their purposes and methods for determining appropriate target levels and requirements for internal controls, monitoring and reporting. Designated reserve funds may include, but are not limited to reserves restricted for debt service and unrestricted designated reserves.

UTILITIES COMMISSION MEETING

TO:	FROM:						
ERMU Commission	Melissa Karpinski – Finance Manager						
MEETING DATE:	AGENDA ITEM NUMBER:						
April 8, 2025	4.3						
SUBJECT:	SUBJECT:						
2024 Utilities Performan	2024 Utilities Performance Incentive Compensation Distribution						
ACTION REQUESTED:							
Award the Performance Metrics and Compensation Distribution of 3.0% to qualifying							
employees per the terms of the policy.							

BACKGROUND:

The Commission adopted a Performance Metrics program in December 2012, for implementation January 1, 2013, and revised in December 2023. This program was based on the American Public Power Association's Reliable Public Power Provider (RP3) program with the addition of financial goals. As defined by policy, this company performance based program is designed to incentivize employee commitment towards the company's success. "The successful performance of ERMU is measured in terms of the Utilities' ability to meet our strategic goals and mission. By improving our efficiency and level of performance in meeting our strategic goals and mission we can improve the delivery of value to our customers." Divided into categories representing core values of the company and again into sub-categories that are quantifiable, this program is designed to track goals that require the companywide support of employees to continually achieve. When the employees work together as a team to achieve these goals, the company recognizes a corresponding increase in value to our customers.

DISCUSSION:

The performance metrics were tracked and communicated to the employees and the Commission quarterly throughout the year. The program has functioned as intended, with employee motivation and efforts aligning to enhance company performance. Attached are the final results of the score card showing that employees have successfully met all company performance targets. In accordance with the policy, a multiplier of 100% will be applied, and qualifying employees will be eligible for a 3.0% distribution.

FINANCIAL IMPACT:

COMMISSION POLICY

Section:	Category:
Governance	Delegation to Management Policies
Policy Reference:	Policy Title:
G.4g1	Performance Metrics and Incentive Compensation

1.0 PURPOSE AND SUMMARY

The successful performance of the ERMU is measured in terms of the Utilities' ability to meet our strategic goals and mission. By improving our efficiency and level of performance in meeting our strategic goals and mission we can improve the delivery of value to our customers.

To create incentives for employees to take personal responsibility for accomplishment of the Utilities' strategic goals and mission, the Utilities has established a Utilities Performance Metrics-based Incentive Compensation system ("UPMIC"). Through UPMIC the employees of ERMU will have an opportunity, as a group, to earn annual incentive compensation for each qualifying employee by contributing individually to the overall success of ERMU on a daily basis.

Under UPMIC, either all qualifying employees will earn an incentive compensation distribution in a given year, or none will. And not only will incentive compensation under UPMIC in that sense be an all or nothing proposition each year, but there will be an equal percentage share basis for all on which the incentive compensation will be paid out if earned. This appropriately reflects the reality that we all succeed, or fall short, together as a team.

To administer the UPMIC and measure objectively the level of performance that must be achieved for qualifying employees to earn incentive compensation, the attached UMPIC Performance Metrics Policy Scorecard ("Scorecard") has been created. The Scorecard will be subject to revision annually based on the performance metrics adopted by the Commission annually for the coming year ("Performance Metrics"). By tracking and measuring the Performance Metrics and creating incentive for employees to achieve the goals the Metrics embody, the Utilities believes it will be better able to focus efforts and resources on becoming more efficient and successful in meeting our strategic goals and mission and delivering improved value to our customers.

2.0 UTILITIES PERFORMANCE METRICS SCORECARD

As reflected on the Scorecard, the Performance Metrics are divided into the following three categories: Safety, Reliability and Quality of Utility Services; Workforce Development; and Financial Goals. These categories are used to characterize the overall strategic goals and mission of ERMU.

Under the Performance Metrics, these three main categories are then divided into various weighted factors, or sub-categories. These sub-categories, their percentage weight, and the goal or target for each, shall be established by the Utilities Commission annually. The Performance Metrics as adopted are reflected in the attached Scorecard. As discussed above, the Performance Metrics and thus the Scorecard are subject to modification and adoption by the Commission annually, which will normally occur during the Utilities' budgeting process.

3.0 UTILITIES PERFORMANCE INCENTIVE COMPENSATION DISTRIBUTION CRITERIA

Under the UPMIC a Performance-Based Compensation Incentive, if earned, will be distributed to Qualifying Employees annually. The total amount available to be earned by Utilities employees as a Performance Based Compensation Incentive each year will be an amount up to 3% of the Utilities' total gross wages paid to Qualifying Employees during the Measurement Period.

The measuring period used to calculate how much, if any, of the Performance-Based Compensation Incentive the Utilities employees have earned will be the calendar year (the "Measurement Period"). After the Measurement Period is complete and the Commission has received its audit in the spring of the year following the Measurement Period, the Performance Metrics will be applied to determine whether the Performance-Based Compensation Incentive has been earned for the Measurement Period. In doing so, the performance of the Utilities in each sub-category will be reviewed. If the sub-category performance meets or exceeds the established goal, the sub-category will be scored with the designated percentage that will contribute to a total Performance Metrics Multiplier to be used as a factor in calculating the distribution earned, if any, as shown in the Scorecard ("Multiplier"). The Multiplier has a maximum factoring effect of 100%. The Multiplier is used to determine how much, if any, of the amount established by the Commission for the UPMIC Performance-Based Compensation Incentive has been earned in the Measurement Period. (For example if the Multiplier equals 100%, the distribution would equal 3%. If the Multiplier equals 75%, the distribution would equal 2.25%.) In other words, the amount established by the Commission may be earned on an annual basis by the group of Qualifying Employees (as defined below in Section 4.0) in whole, in part, or not at all.

After the Multiplier is calculated on the Scorecard, the Performance Based Compensation Incentive earned, if any, will be distributed to Qualifying Employees. The total amount to be distributed as the Performance Based Compensation Incentive will be the product of: a) the Multiplier; and b) 3% of the Utilities' total gross wages paid to Qualifying Employees during the Measurement Period.

The percentage of the Performance Based Compensation Incentive awarded to each Qualifying Employee will be based on the gross wages of each Qualifying Employee during the Measurement Period. To each Qualifying Employee, the distribution would be allocated in a lump sum equal to the product of: a) the Multiplier; and b) 3% of that employee's gross wages paid during the Measurement Period. (For example, if a Qualifying Employee's gross wages earned during the Measurement Period were equal to \$50,000 and the Multiplier was equal to 100%, the total distribution to that employee would be equal to: \$50,000 x 3% x 100% = \$1,500.)

If the Utilities' margins are negative due to sudden and unforeseen material changes to the industry or customer base, the Commission reserves the right to withhold distribution of the Performance Based Compensation Incentive in any given year.

4.0 EMPLOYEE QUALIFICATIONS AND DISTRIBUTION OF THE INCENTIVE COMPENSATION

An employee of the Utilities will be eligible for participation in the Performance Metrics Incentive Compensation distribution if the employee meets the following eligibility requirements and is therefore a "Qualifying Employee" for purposes of this policy.

- a. The employee is in good standing with the Utilities. An employee would not be eligible while on disciplinary probation or a performance improvement action plan.
- b. The employee was a Full Time or Part Time employee during the Measurement Period. Seasonal, and Temporary employees are not eligible.

The UPMIC Performance Based Compensation Incentive distribution will be made to Qualifying Employees on the first payroll date after the thirty day period following the date on which the Commission formally receives its annual auditor's report in an open meeting.

UTILITIES COMMISSION MEETING

то:	FROM:					
ERMU Commission	Tony Mauren – Governance & Communications Manager					
MEETING DATE:	AGENDA ITEM NUMBER:					
April 8, 2025	4.4					
SUBJECT:						
Commission Policy Review – 0	Commission Policy Review – G.4a – Succession of Leadership					
ACTION REQUESTED:						
Approve recommended upda	tes					

BACKGROUND/DISCUSSION:

This month commissioners are reviewing policy G.4a – Succession of Leadership to make comments, ask questions, or recommend updates. With policy G.4a, the Commission intends to ensure ERMU's continuity of leadership, both long-term and short-term.

Staff's recommended updates allow policy to address the need for an Acting General Manager Job Description by stating it would effectively be the General Manager Job Description until the Commission Chair can convene a special meeting to confirm the appointment of the Acting General Manager and either confirm or modify the job description for the duration of the appointment.

The general manager has established the operations director as the primary successor and the administrations director as the secondary successor.

There are also slight wording changes aiming for gender neutrality.

ATTACHMENTS:

• ERMU Policy – G.4a – Succession of Leadership

COMMISSION POLICY

Section:	Category:
Governance	Delegation to Management Policies
Policy Reference:	Policy Title:
G.4a	Succession of Leadership

PURPOSE:

With this policy, the Commission intends to ensure ERMU's continuity of leadership, both long-term and short-term. More specifically, the Commission intends to protect ERMU from the sudden loss of services by the General Manager, other executive managers, and any employee who performs functions that are critical to the organization. The Commission also intends to prepare employees at all levels of the organization for increasing leadership responsibilities.

POLICY:

The General Manager shall establish, and at all times maintain current, a short-term plan for executive leadership and critical function succession under which two or more of his/her direct reports are designated and prepared to temporarily assume the responsibilities of Acting General Manager on short notice.

Consistent with this general statement, the General Manager shall:

- Keep the Commission informed about the content of <u>theirhis/her</u> short-term plan for executive leadership and critical function succession. The General Manager's plan for executive leadership succession shall include the designation of a primary and secondary successor, both of whom are acceptable to the Commission, and <u>will fulfill the duties of the</u> <u>general manager a written</u> position description <u>asfor</u> Acting General Manager
- 2. Keep the Commission informed about his/hertheir availability to perform the duties of the General Manager.
- 3. Not be absent from ERMU's offices and/or otherwise unavailable for communication with the Commission and other management employees for more than three (3) consecutive business days without first having designated a temporary successor and informing both the Commission and management employees of that designation.

4. Not allow the General Manager and both his/hertheir primary and secondary designated successors to travel together in the same vehicle or other public or commercial form of conveyance.

The primary successor shall immediately assume the responsibilities of Acting General Manager upon receiving information that the General Manager is unable to fulfill his/hertheir responsibilities or has been absent from corporate headquarters and/or otherwise unavailable for more than three (3) consecutive business days without having designated his-her-a-temporary successor. In such event, the Acting General Manager shall formally notify the Commission of his/hertheir assumption of responsibilities, after which the Commission President shall convene a special meeting to confirm the appointment of the Acting General Manager and to either confirm or modify the General Manager position description for Acting General Manager and to either confirm or modify the General Manager position description for Acting General Manager the duration of the appointment.

Additionally, the General Manager shall establish, and at all times maintain current, and effectively implement a long-term plan for leadership succession that is intended to:

- 1. Prepare all employees to grow in their leadership capabilities and responsibilities.
- 2. Ensure that the loss of services from any one employee does not impair the performance of the organization's critical functions.
- 3. Identify capable and willing people for future critical leadership positions and intentionally develop them in their leadership competencies and responsibilities.
- 4. Identify and communicate to the Commission any critical human resource needs of the organization that are not adequately met with available resources, along with steps that he/she isthey are taking to meet those needs.

POLICY HISTORY:

Adopted June 13, 2017 Revised April 8, 2025

UTILITIES COMMISSION MEETING

TO:	FROM:				
ERMU Commission	Sara Youngs				
MEETING DATE:	AGENDA ITEM NUMBER:				
April 8, 2025	4.5				
SUBJECT:					
Electric Vehicle Charger Discussion					
ACTION REQUESTED:					
Recommend direction o	Recommend direction on public electric vehicle charging stations				

BACKGROUND:

In 2017, ERMU received a grant from the American Public Power Association to implement an electric vehicle (EV) charging program, focusing on new and innovative technologies for both public and home charging. From 2017 to November 2023, ERMU operated four public charging stations, three managed by ERMU and one as part of an initiative from our power provider, Minnesota Municipal Power Agency (MMPA). In November 2023, ERMU removed the fast charger at Coborn's parking lot, as it was no longer supported by ChargePoint. Currently, 84 residential homes qualify for ERMU's electric vehicle time-of-use charging rates.

DISCUSSION:

Staff is seeking commission direction on whether Elk River Municipal Utilities (ERMU) should continue operating public electric vehicle charging stations within its service territory. Currently, ERMU operates two public charging stations: one downtown in the public parking lot and one at City Hall. Previous discussions with the city's Economic Development Authority (EDA) about transferring to the downtown station were unsuccessful due to challenges with ChargePoint.

ERMU's subscription with ChargePoint expires on May 25, 2025. The estimated cost to renew the three-year subscription is approximately \$2,080 per charger. This cloud-based service allows EV drivers to locate public charging stations, provides for a method of payment, and provides ERMU with a dashboard for monitoring station data.

In addition, MMPA has a charging station in Otsego at Rockwood's. MMPA has decided to transfer its charging station assets to the respective city utilities, as the chargers have lost connectivity, meaning drivers are not being charged for their sessions.

- 1. Should ERMU continue operating public charging stations?
 - If yes, should a fee remain in place for the stations, or should they be offered free of charge?

•	If no, staff will work with the EDA or local businesses to determine if there is interest in taking over the charging stations. If no interest is found, the stations will be removed.
2. The pub offer free	olic charging station at City Hall will remain as is, unless the Commission decides to charging.

UTILITIES COMMISSION MEETING

TO: FROM:							
ERMU Commission Melissa Karpinski – Finance Manager							
MEETING DATE: AGENDA ITEM NUMBER:							
April 8, 2025 5.1							
SUBJECT:							
Financial Report – Febru	ary 2025						
ACTION REQUESTED:							
Receive the February 20	25 Financial Report						

DISCUSSION:

Please note that these are the preliminary *unaudited* financial statements.

Electric

February year to date (YTD) electric kWh sales are up 6% from the prior year. For further breakdown:

- Residential usage is up 10%
- Small Commercial usage is up 9%
- Large Commercial usage is up 4%

For February 2025, the Electric Department overall is ahead of prior YTD and favorable to budget YTD. Additional variance analysis can be found on the Summary Electric Statement of Revenues, Expenses and Changes in Net Position attachment.

Water

February YTD gallons of water sold are up 4% from the prior year. For further breakdown:

- Residential use is up 3%
- Commercial use is up 5%

For February 2025, the Water Department overall is behind prior YTD but favorable to budget YTD. Additional variance analysis can be found on the Summary Water Statement of Revenues, Expenses and Changes in Net Position attachment.

ATTACHMENTS:

- Balance Sheet 2.2025
- Electric Balance Sheet 2.2025
- Water Balance Sheet 2.2025
- Summary Electric Statement of Revenues, Expenses and Changes in Net Position 2.2025
- Summary Water Statement of Revenues, Expenses and Changes in Net Position 2.2025
- Graphs Prior Year and YTD 2025
- Detailed Electric Statement of Revenues, Expenses and Changes in Net Position 2.2025

•	Detailed Water Statement of Revenues, Expenses and Changes in Net Position 2.2025 Budget vs Actual Graphs – Electric and Water 2.2025
•	Budget vs Actual Graphs - Liectric and water 2.2025

Item Variance of +/- \$25,000 and +/- 15%

⁽¹⁾ PYTD variance is mainly due to more funds being invested with UBS and change in Fair Market Value.

⁽²⁾ PYTD variance due to large a large connection agreement in January 2024.

⁽³⁾ YTD budget and PTYD variance is mainly due to Contributions from Customers having a large SOWs for transformer for additional service and/or upgrade.

⁽⁴⁾ YTD budget variance is mainly due to less tree trimming expense than planned and less labor on mtce of substation equipment.

⁽⁵⁾ YTD budget variance is mainly due to timing of commercial rebates and having budget be an even spread.

Item Variance of +/- \$15,000 and +/- 15%

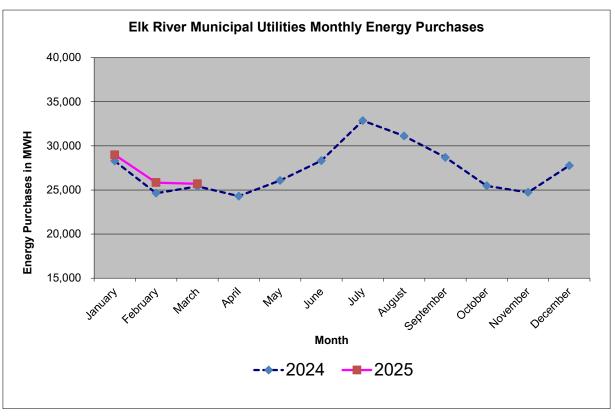

⁽¹⁾ PYTD variance due to a couple of large connection agreements in 2024.

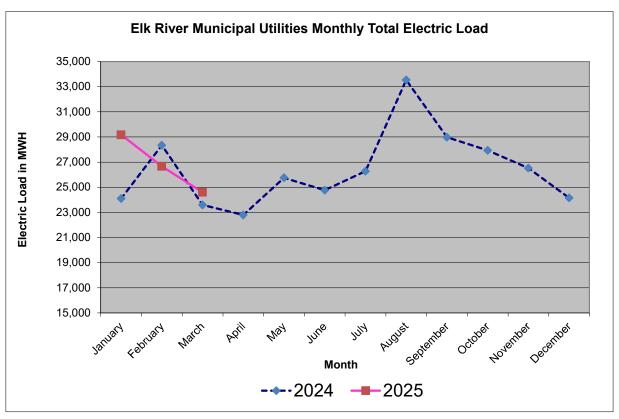

⁽²⁾ PYTD variance is mainly due to higher gas usage in 2025.

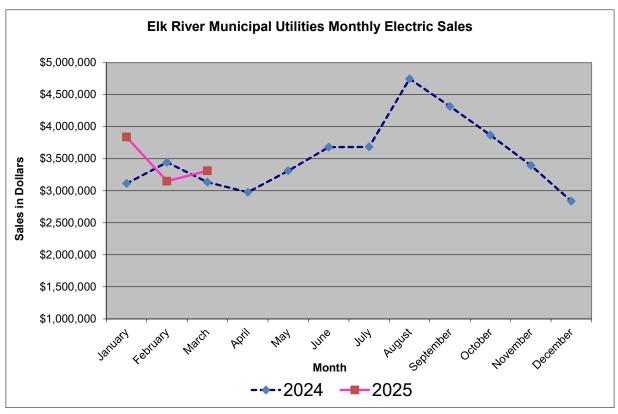

⁽³⁾ YTD budget variance is due to an even spread in mtce of water mains. PYTD variance is mainly due to water meter service costs for AMI project.

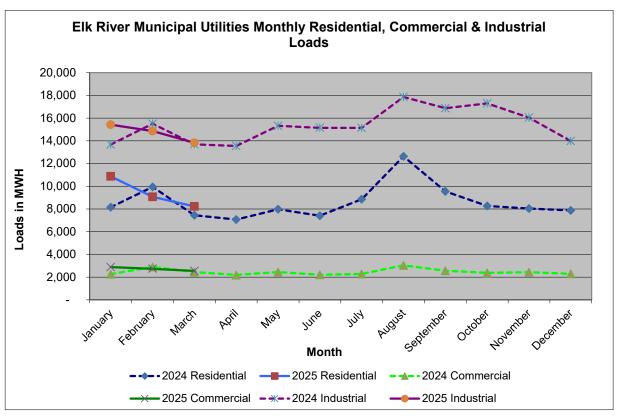

⁽⁴⁾ PYTD variance is due to increased consulting fees (power plant) and sick pay (accrual change).

UTILITIES COMMISSION MEETING

TO:	FROM:				
ERMU Commission	Mike Tietz – Technical Services Superintendent				
MEETING DATE: AGENDA ITEM NUMBER:					
April 8, 2025	ril 8, 2025 5.2				
SUBJECT:	SUBJECT:				
2024 Annual Reliability R	eport				
ACTION REQUESTED:					
Receive the 2024 Annual Reliability Report					

BACKGROUND:

Minnesota Rules Chapter 7826 Public Utilities Commission Electric Utility Standards cover safety, reliability, service, and reporting requirements. Per 7826.0100(A), municipal utilities are exempt from these requirements. However, the Elk River Municipal Utilities Commission adopted several parts of this chapter as a Distribution Reliability Standard policy requiring annual reporting on system reliability.

DISCUSSION:

In 2024, our reliability index numbers remained impressive. These reliability index numbers demonstrate the condition of our solidly built electrical system as well as the excellent response times our line crews provide. The utility's commitment to accountability, long term visioning of system design, and ongoing system maintenance are also reflected by these numbers.

The table below reflects the number of customer outage minutes for the last 10 years.

Year	# of Customers	# of Outage Minutes	# of Outages
2015	9449	225,337	41
2016	10862	432,310	59
2017	11489	354,625	40
2018	12158	117,055	51
2019	12463	312,885*	59
2020	12604	197,884	51
2021	13038	628,670	61
2022	13228	174,500	50
2023	13543	187,469	51
2024	13797	575,509	43

^{*118,978} of these minutes are due to two separate transmission outages.

Listed below are several reliability indices that are used within the electric industry to make it easier to compare performance among utilities along with ERMU's 2023 and 2024 statistics.

Average Service Availability Index (ASAI)

ASAI is a measure of the average availability of the sub-transmission and distribution systems to serve customers. It is the ratio of the total customer minutes that service was available to the total customer minutes available in a time period. This is normally expressed as a percentage.

ERMU's 2024 ASAI is **99.992%** Availability ERMU's 2023 ASAI is **99.9973%** Availability

Customer Average Interruption Duration Index (CAIDI)

CAIDI is defined as the average duration (in minutes) of an interruption experienced by customers during a specific time frame. It is calculated by summing the customer minutes off during each sustained¹ interruption in the time period and dividing this by the number of customers experiencing one or more sustained¹ interruptions during the time period. The resulting unit is minutes. The index enables utilities to report the average duration of a customer outage for those customers affected.

ERMU's 2024 CAIDI is **118.931 minutes** ERMU's 2023 CAIDI is **84.827 minutes**

System Average Interruption Duration Index (SAIDI)

SAIDI is defined as the average interruption duration (in minutes) for customers served during a specified time period. It is determined by summing the customer minutes off for each sustained¹ interruption during a specified time period and dividing that sum by the average number of customers served during that period. The resulting unit is minutes. This index enables the utility to report how many minutes' customers would have been out of service if all customers were out at one time.

ERMU's 2024 SAIDI is 42.083 minutes

ERMU's 2023 SAIDI was 14.077 minutes

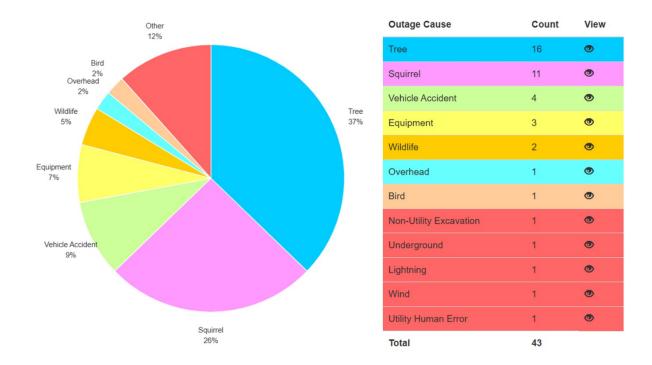

System Average Interruption Frequency Index (SAIFI)

SAIFI is defined as the average number of times that a customer is interrupted during a specified time period. It is determined by dividing the total number of sustained¹ interrupted customers in a time period by the average number of customers served. The resulting unit is "interruptions per customer."

ERMU's 2024 SAIFI is **0.354** ERMU's 2023 SAIFI was **0.166**

¹ Only outages lasting longer than five minutes are included in the calculations, as defined by IEEE 1366.

Staff review these statistics in detail to find ways to continually improve our system. These statistics are very good when compared with other utilities. As indicated by the following pie chart and statistics list, you can see the causes of the outages experienced in 2024.

Many investor-owned and cooperative run utilities "storm normalize "their reliability numbers by removing "major outages" due to storms from their reliability index number calculations. Our reliability numbers have not been storm normalized. Our numbers reflect these major outages and represent what our customers experienced in 2024. Overall, our electric distribution system is very resilient, and our system reliability remains excellent.

Please receive the attached American Public Power Association's (APPA) eReliability Annual Report which contains published averages that can be used to better understand the performance of our electric system relative to other utilities nationally and to those within their region or size class.

ACTION REQUESTED:

Staff requests the Commission receive and file the APPA eReliability Tracker 2024 Annual Report for Elk River Municipal Utilities.

ATTACHMENT:

• APPA eReliability Tracker 2024 Annual Report for Elk River Municipal Utilities

Elk River Municipal Utilities

ANNUAL BENCHMARKING REPORT **RELIABILITY TRACKER

American Public Power Association

I. About This Report

This report focuses on distribution system reliability across the country and is customized to each utility that participates in the American Public Power Association's eReliability Tracker service. APPA created the eReliability Tracker Annual Report to assist utilities in their efforts to understand and analyze their electric system. In 2012, APPA developed the eReliability Tracker thanks to a grant from the Demonstration of Energy & Efficiency Developments (DEED) program.

This report reflects data in the eReliability Tracker from January 1, 2024 to December 31, 2024. This analysis might not properly reflect your utility's statistics if you do not have a full year of data in the system. The report includes data recorded as of February 25, 2025.

Reliability reflects both historic and ongoing engineering investment decisions within a utility. Proper use of reliability metrics ensures that a utility is performing its intended function and is providing service in a consistent and effective manner.

While the primary use of reliability statistics is for self-evaluation, you can use these statistics to compare your utility with similar utilities. However, differences such as electrical network configuration, ambient environment, weather conditions, and number of customers served typically limit most utility-to-utility comparisons. Due to the diverse range of utilities that use the eReliability Tracker, this report endeavors to improve comparative analyses by grouping utilities by size and region.

Since this report contains data for all utilities that use the eReliability Tracker, it is important to consider how a particularly large or small utility can affect comparative benchmarks. To ease the issues associated with comparability, each utility's reliability statistics are weighted based on customer count when aggregated. This means that all utilities are equally weighted, and all individual statistics are developed on a per customer basis.

The aggregate statistics in this report are calculated from the 350 utilities with verified 2024 outage data. Utilities that experienced no outages in 2024, or did not upload any data, will have NULL, None, or "0" values in their report for utility-specific data and were not included in the aggregate analysis. Also note that log-normal data with a z-score^[1] greater than 3.25 may be excluded if it significantly distorts the aggregate statistics.

[1]: A z-score indicates how much a data point differs from the mean. For instance, a z-score of 3.25 indicates that the data point is three and one-quarter standard deviations from the mean. A z-score of 0 indicates that the data point is identical to the mean.

Utility Classifications

This report separates utilities into groups according to geographic region and the number of customers served. Table 1 shows the range of customer counts for utilities that use the eReliability Tracker by five distinct groups of approximately 107 utilities per group.

Your utility is in size class 4 and region 3.

Table 1. Customer count range per size class

	Customer Count Range
Class 1	>0
Class 2	>1,527
Class 3	>3,582
Class 4	>7,526
Class 5	>14,528

Each utility is also grouped with all other participating utilities within their region. Figure 1 shows the number of utilities using the eReliability Tracker in each region and Figure 2 shows the states and territories included in each region.

Figure 1. Number of utilities subscribed to the eReliability Tracker by region

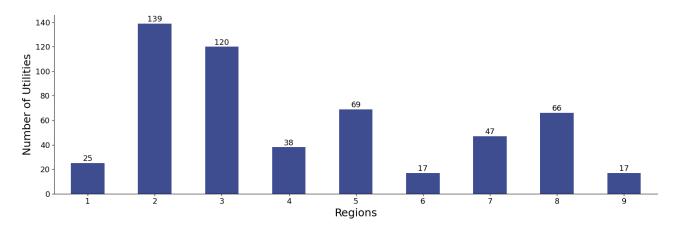

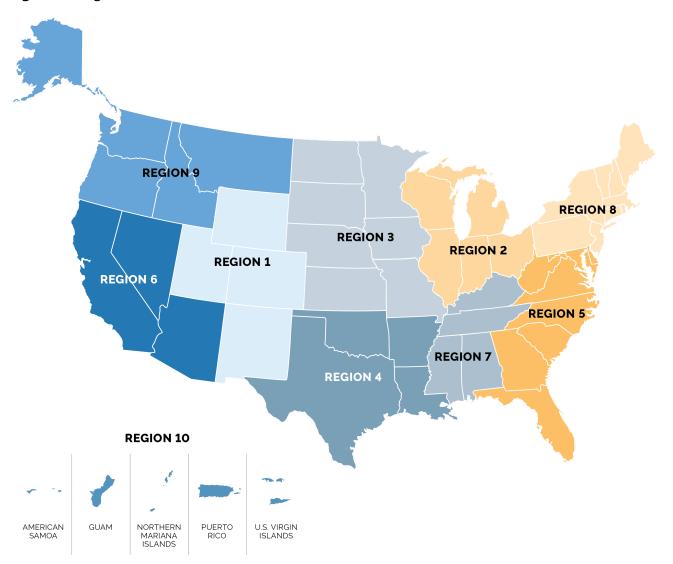

Figure 2. Regions

II. IEEE Statistics

When it comes to reliability, the industry standard metrics are defined in the Institute for Electrical and Electronics Engineers' Guide for Electric Power Distribution Reliability Indices, or IEEE 1366 guidelines. For each utility, the eReliability Tracker performs IEEE 1366 calculations for System Average Interruption Duration Index (SAIDI), System Average Interruption Frequency Index (SAIFI), Customer Average Interruption Duration Index (CAIDI), Momentary Average Interruption Frequency Index (MAIFI), and Average Service Availability Index (ASAI).

It is important to note how major events (MEs) are calculated and used in this report. An example of an ME includes severe weather, such as a tornado or hurricane, that leads to unusually long outages in comparison to your distribution system's typical outage. This report uses the **APPA ME threshold**, which is based directly on the SAIDI for specific outage events, rather than a daily SAIDI. The APPA ME threshold allows a utility to remove outages that exceed the IEEE 2.5 beta threshold for outage events, which considers up to 10 years of the utility's outage history. In the eReliability Tracker, if a utility does not have at least 36 outage events prior to the year being analyzed, then no threshold is calculated. If this is the case for your utility, then you will have a NULL value in the following field and the calculations without MEs in the SAIDI, SAIFI, CAIDI, and ASAI sections of this report will be the same as the calculations with MEs for your utility. More outage history will provide a better threshold for your utility.

Your utility's APPA major event threshold is 6.78 minutes.

For each of the reliability indices, this report displays your utility's metrics alongside the mean values for all utilities using the eReliability Tracker and within the same class and region as your utility. The first table within each of the following subsections allows you to better understand the performance of your electric system relative to other utilities nationwide and to those within your same region or size class. The second table breaks down the national data into quartile ranges, a minimum value, and a maximum value.

All indices, except MAIFI, are calculated for outages with and without MEs. Furthermore, the tables show indices for scheduled and unscheduled outages. Note that scheduled and unscheduled calculations include MEs. Also note that wherever MEs are excluded, the exclusion is based on the APPA ME threshold for your system.

II.1. System Average Interruption Duration Index

SAIDI is the average duration (in minutes) of an interruption per customer served by the utility during a specific time frame.

Since SAIDI is a sustained interruption index, only outages lasting longer than five minutes are included in the calculations. SAIDI is calculated by dividing the sum of all customer minutes of interruption^[2] within the specified time frame by the average number of customers served during that period. For example, a utility with 100 customer minutes of interruption and 100 customers would have a SAIDI of 1.

Note that in the tables below, scheduled and unscheduled calculations include MEs. Also note that wherever MEs are excluded, the exclusion is based on the APPA ME threshold for your system.

Table 2. Average SAIDI with and without MEs *In minutes*

	All	No MEs	Unscheduled	Scheduled
Your utility	42.08	9.8	42.08	NULL
Utilities that use the eReliability Tracker	120.3	54.49	113.49	13.19
Utilities in your region	50.0	32.24	48.83	3.0
Utilities in your size class	96.25	39.74	93.5	4.31

Table 3. Summary SAIDI data from the eReliability Tracker *In minutes*

	All	No MEs	Unscheduled	Scheduled
Minimum	0.08	0.08	0.08	<0.01
First Quartile	19.39	11.07	18.77	0.19
Median	44.37	26.79	40.95	1.24
Third Quartile	131.4	55.66	127.24	5.03
Maximum	1,639.92	776.98	1,634.25	629.54

^{[2]:} Customer minutes of interruption is calculated by multiplying total customers interrupted and total minutes of interruption.

Figure 3. Average SAIDI by region

II.2. System Average Interruption Frequency Index

SAIFI is the average instances a customer on the utility system will experience a sustained interruption during a specific time frame.

Since SAIFI is a sustained interruption index, only outages lasting longer than five minutes are included in the calculations. SAIFI is calculated by dividing the total number of customers that experienced sustained interruptions by the average number of customers served during that period. For example, a utility with 150 customer interruptions and 200 customers would have a SAIFI of 0.75.

Note that in the tables below, scheduled and unscheduled calculations include MEs. Also note that wherever MEs are excluded, the exclusion is based on the APPA ME threshold for your system.

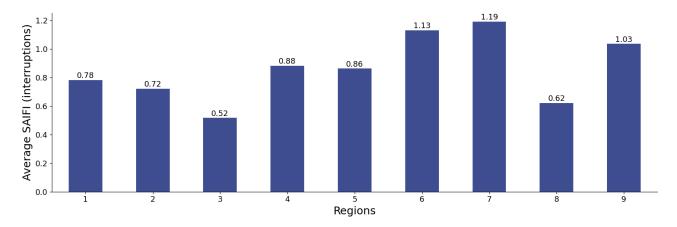

Table 4. Average SAIFI with and without MEs *In interruptions*

	All	No MEs	Unscheduled	Scheduled
Your utility	0.35	0.14	0.35	NULL
Utilities that use the eReliability Tracker	0.78	0.54	0.75	0.06
Utilities in your region	0.52	0.4	0.51	0.03
Utilities in your size class	0.65	0.43	0.63	0.03

Table 5. Summary SAIFI data from the eReliability Tracker *In interruptions*

	All	No MEs	Unscheduled	Scheduled
Minimum	<0.01	<0.01	<0.01	<0.01
First Quartile	0.21	0.14	0.19	<0.01
Median	0.54	0.36	0.53	0.01
Third Quartile	1.16	0.77	1.1	0.04
Maximum	3.63	2.43	3.63	2.32

Figure 4. Average SAIFI by region

II.3. Customer Average Interruption Duration Index

CAIDI is the average duration (in minutes) of an interruption experienced by customers during a specific time frame.

Since CAIDI is a sustained interruption index, only outages lasting longer than five minutes are included in the calculations. CAIDI is calculated by dividing the sum of all customer minutes of interruption by the number of customers that experienced one or more interruptions during that period. This metric reflects the average customer experience (minutes of duration) during an outage.

Note that in the tables below, scheduled and unscheduled calculations include MEs. Also note that wherever MEs are excluded, the exclusion is based on the APPA ME threshold for your system.

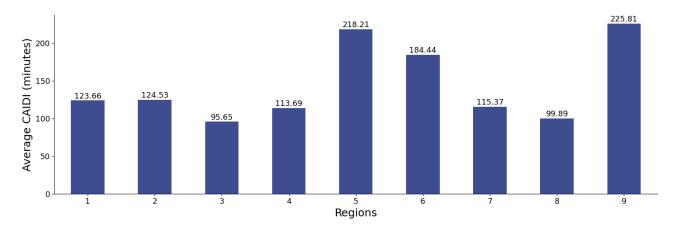

Table 6. Average CAIDI with and without MEs *In minutes*

	All	No MEs	Unscheduled	Scheduled
Your utility	118.93	67.46	118.93	NULL
Utilities that use the eReliability Tracker	135.22	92.4	138.62	153.96
Utilities in your region	95.65	83.74	95.41	105.79
Utilities in your size class	143.62	86.47	143.61	157.41

Table 7. Summary CAIDI data from the eReliability Tracker *In minutes*

	All	No MEs	Unscheduled	Scheduled
Minimum	11.21	11.21	10.52	7.82
First Quartile	62.85	51.38	62.41	61.8
Median	93.56	81.55	93.94	95.16
Third Quartile	143.73	110.8	144.19	162.66
Maximum	1,923.68	402.94	2,012.24	1,899.69

Figure 5. Average CAIDI by region

II.4. Momentary Average Interruption Frequency Index

MAIFI is the average number of momentary interruptions a utility customer will experience during a specific time frame.

In this report, an outage with a duration of five minutes or less is classified as momentary. MAIFI is calculated by dividing the total number of customers that experienced momentary interruptions by the total number of customers served by the utility. For example, a utility with 20 momentary customer interruptions and 100 customers would have a MAIFI of 0.20.

Momentary interruptions can be more difficult to track and utilities without an automated outage management system might not log these interruptions; therefore, some utilities have a MAIFI of zero.

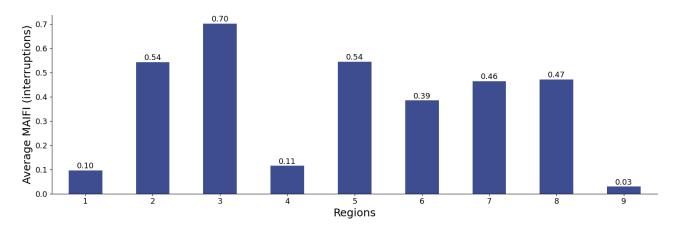

Table 8. Average MAIFI *In interruptions*

	All
Your utility	NULL
Utilities that use the eReliability Tracker	0.45
Utilities in your region	0.7
Utilities in your size class	0.66

Table 9. Summary MAIFI data from the eReliability Tracker *In interruptions*

	All
Minimum	<0.01
First Quartile	<0.01
Median	0.06
Third Quartile	0.53
Maximum	5.0

Figure 6. Average MAIFI by region

II.5. Average Service Availability Index

ASAI is the percentage of time the sub-transmission and distribution systems are available to serve customers during a specific time frame.

This load-based index represents the percentage availability of electric service to customers within the period analyzed. It is calculated by dividing the total hours in which service is available to customers by the total hours that service is demanded by the customers. For example, an ASAI of 99.99% means that electric service was available for 99.99% of the time during the given period. Note that the higher your ASAI value, the better the performance.

In the tables below, scheduled and unscheduled calculations include MEs. Also note that wherever MEs are excluded, the exclusion is based on the APPA ME threshold for your system.

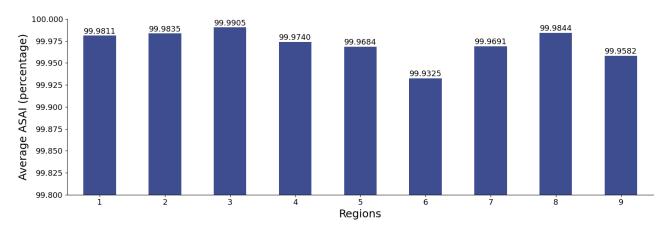

Table 10. Average ASAI with and without MEs *In percentage*

	All	No MEs	Unscheduled	Scheduled
Your utility	99.992	99.9981	99.992	NULL
Utilities that use the eReliability Tracker	99.9775	99.9898	99.9787	99.9976
Utilities in your region	99.9905	99.9939	99.9907	99.9994
Utilities in your size class	99.9817	99.9924	99.9823	99.9991

Table 11. Summary ASAI data from the eReliability Tracker *In percentage*

	All	No MEs	Unscheduled	Scheduled
Maximum	99.9999	99.9999	99.9999	99.9999

Minimum	99.6888	99.86	99.6899	99.8856

Figure 7. Average ASAI by region

II.6. Energy Information Administration Form 861 Data

Form EIA-861 collects annual information on electric power industry participants involved in the generation, transmission, distribution, and sale of electric energy in the United States and its territories.

In 2014, Energy Information Administration (EIA) began publishing reliability statistics in Form EIA-861; therefore, APPA included these statistics in this report for informational purposes. Please note that the following data includes 174 investor-owned, 467 rural cooperative, and 327 public power utilities that were large enough to be required to fill out the full EIA-861 form. The statistics do not include data from utilities that complete the EIA 861-S form, which smaller entities complete. Note that the 327 participating public power utilities include entities classified by EIA as municipal, political subdivision, and state. In addition, since the collection and release of EIA form data lags by a year, the data is based on 2023 data that was published October 10, 2024. Therefore, we suggest you only use the aggregate statistics contained herein as an informational tool for further comparison of reliability statistics.

In Form EIA-861, an entity provides SAIDI and SAIFI including and excluding ME days in accordance with the IEEE 1366-2003 or IEEE 1366-2012 standard.

Although EIA collected other reliability-related data, the tables below only include SAIDI and SAIFI data including and excluding ME days. You can download the full set of data at: www.eia.gov/electricity/data/eia861/.

Table 12. Your utility's SAIDI and SAIFI with and without IEEE ME days

SAIDI with IEEE ME	SAIDI without IEEE	SAIFI with IEEE ME days	SAIFI without IEEE ME
days (minutes)	ME days (minutes)	(interruptions)	days (interruptions)
42.08	9.48	0.35	0.14

Table 13. Summary SAIDI data from Form EIA-861, 2023 *In minutes*

	All	No MEs
Average	376.90	149.41
Minimum	0.20	0
First Quartile	80.88	51.59
Median	178.01	101.18
Third Quartile	392.12	175.32
Maximum	10,820.00	2,475.09

Table 14. Summary SAIFI data from Form EIA-861, 2023 *In interruptions*

	All	No MEs
Average	1.71	1.26
Minimum	0.01	0
First Quartile	0.82	0.60
Median	1.30	0.99
Third Quartile	2.14	1.54
Maximum	17.38	16.92

III. Outage Causes

Equipment failure, extreme weather events, wildlife, and vegetation are some of the most common causes of electric system outages. The following pie chart shows the percentages of the primary causes of outages for all utilities using the eReliability Tracker in 2024.

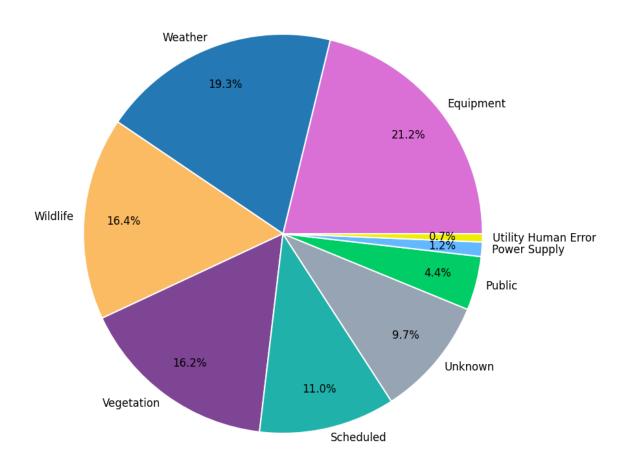

Figure 8. Primary causes of outages in 2024

Certain factors, such as regional weather and animal/vegetation patterns, can make some causes more prevalent for a specific group of utilities. The following section includes graphs depicting common causes of outages for your utility, all utilities in your region, and all utilities using the eReliability Tracker.

Charts containing aggregate information are customer-weighted to account for differences in utility size for a better analytical comparison. For example, a particularly large utility may have a large number of outages compared to a small utility. To avoid skewing the data toward large utilities, the number of cause occurrences is divided by customer size to account for the differences. In Figures 9 to 14, the data represent the number of occurrences for each group

of 1,000 customers. A customer-weighted occurrence rate of "1" means an average of one outage from that cause occurred per 1,000 customers in 2024.

Note that the sustained outage cause analysis is more comprehensive than the momentary outage cause analysis due to a larger and more robust sample size for sustained outages. Regardless, tracking both sustained and momentary outages helps utilities understand and reduce outages. To successfully use the outage information tracked by your utility, it is imperative to classify and record outages in detail. The more information provided per outage, the more conclusive and practical your analyses will be.

III.1. Sustained Outage Causes

In general, sustained outages are the most commonly tracked outage type. In analyses of sustained outages, utilities tend to exclude scheduled outages, partial power, customer-related problems, and qualifying major events from their reliability indices calculations. While this is a valid method for reporting, these outages should be included for internal review to make utility-level decisions. In this section, we evaluate common causes of sustained outages for your utility, corresponding region, and for all utilities that use the eReliability Tracker. It is important to note that sustained outages are classified in this report as outages that last longer than five minutes, as defined by IEEE 1366.

Figure 9. Top five causes of sustained outages for all utilities that use the eReliability Tracker

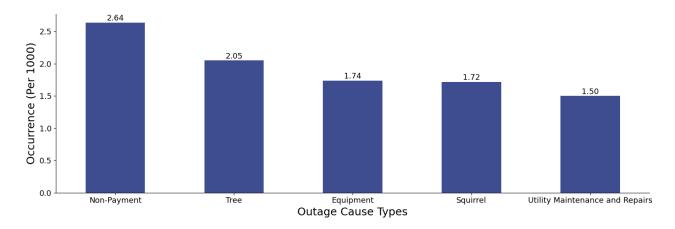

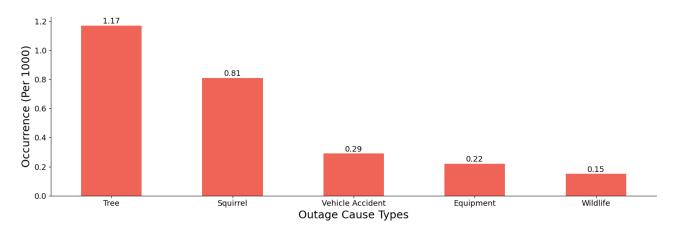

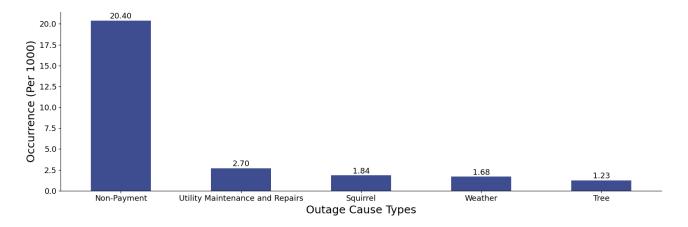

Figure 10. Top five causes of sustained outages for your utility^[3]

^{[3]:} The number of occurrences for each cause is divided by the utility's customer count (in thousands) to create an occurrence rate that can be compared across different utility sizes.

Figure 11. Top five causes of sustained outages in your region

III.2. Momentary Outage Causes

The ability to track momentary outages can be difficult or unavailable on some systems, but due to the hazard they pose for electronic equipment, it is important to track and analyze the causes of momentary outages. This section evaluates the common causes of momentary outages for your utility, region, and size class as well as common causes for all utilities that use the eReliability Tracker. Please note that only outages lasting less than five minutes are classified as momentary, as defined by IEEE 1366. In Figures 12–14, for each utility, the number of occurrences for each cause is divided by that utility's customer count (in thousands) to create an occurrence rate that can be compared across different utility sizes.

Figure 12. Top five causes of momentary outages for all utilities that use the eReliability Tracker

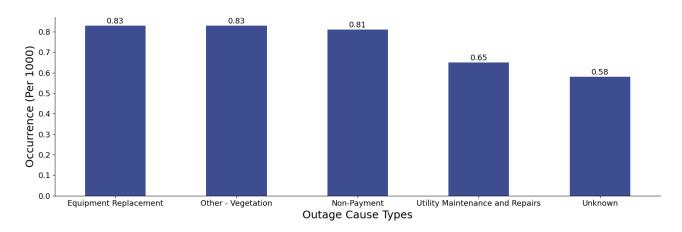

Figure 13. Top five causes of momentary outages for your utility

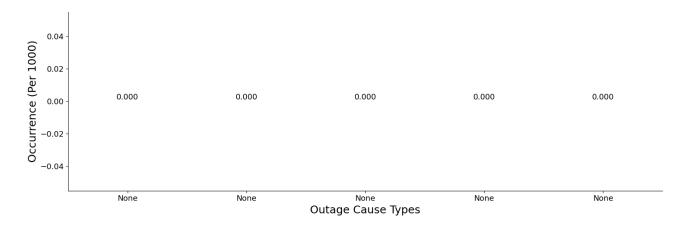

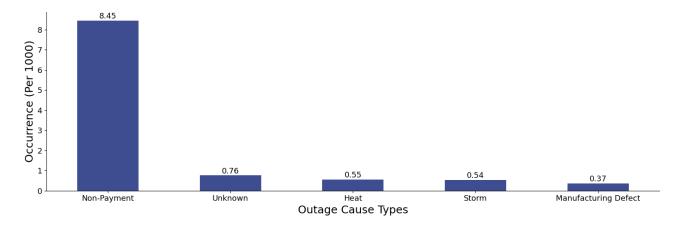

Figure 14. Top five causes of momentary outages in your region

Thank you for your active participation in the eReliability Tracker service. We hope this report is useful to your utility in analyzing your system. If you have any questions regarding the material provided in this report, please contact:

TO:	FROM:					
ERMU Commission	Mark Hanson – General Manager					
MEETING DATE:	AGENDA ITEM NUMBER:					
April 8, 2025	5.3					
SUBJECT:						
Water Service Line Ownership						
ACTION REQUESTED:						
Discuss possible policy changes to ERMU's water service line ownership						

BACKGROUND:

At the February 2025 meeting, staff presented the results of a 50-city survey describing water service line ownership policies. Selected cities created a diverse sample set including Minnesota Municipal Power Association membership, Minnesota Municipal Utilities Association membership, population, and regional proximity. Water service line breaks are relatively rare (2-3 per year) but can be expensive. Such repairs typically cost anywhere from \$3,000 to \$30,000+ depending on the amount of restoration work needed.

For ERMU's customers, property owners own their entire water service line, from the main to their home or business. The same is true for the city's sanitary sewer service lines, although the two do not have to match. Three other options were also discussed at the February meeting:

- The city owns the service line from the main through the curb stop valve
- The city offers a protection program (repair fund) to assist owners with repair costs
- The city differentiates between residential and commercial properties

Commission members asked several clarifying questions for each of the ownership options, including the potential for insuring the service lines. After further discussion, the consensus was to delay action and bring it back in 60 days so staff could research the insurance options.

DISCUSSION:

The League of Minnesota Cities Insurance Trust (LMCIT) will insure water service lines if ERMU:

- 1) Also insures all our water mains (they are currently not insured), and
- Takes ownership of the water service lines.

LMCIT has estimated the cost to insure the water mains is \$47,000 per year and the cost to insure both the mains and the service lines is \$61,350 per year. The deductible limits are \$20,000 per occurrence and \$40,000 annual aggregate. Therefore, ERMU would need to incur over \$101,350 in water main/service line annual repair costs before breaking even. Based on past years, it is unlikely we would experience annual totals over \$100,000.

Possible Ownership Options:

The chart below summarizes the surveyed data for the typical ownership options for water service lines. The advantages and disadvantages of each option are listed after the table.

- 1) Status Quo: The property owner owns the entire service line (24 cities/50 surveyed)
- 2) Modified Status Quo: No change to ownership, but ERMU implements a service line protection program to cover repair costs (3/24).
- 3) ERMU owns from the main through the Curb Stop for <u>all</u> properties (26/50)
- 4) ERMU owns from the main through the Curb Stop for <u>residential</u> properties only (3/50)

Option	Overall	Metro	MMPA	MMUA	Size	Regional
Main Only (ERMU)*	24/50	9/28	3/5	9/16	18/33	6/12
Protection Program	3/24	0/9	0/3	3/9	3/18	1/6
Through Curb Stop	26/50	19/28	2/5	7/16	15/33	6/12
Residential Only*	3/50	1/28	0/5	2/16	2/33	1/12

^{*}Includes those cities offering a protection program.

Option 1, Status Quo. The property owner owns the entire service line (ERMU's current policy, 24/50 surveyed cities use this policy).

Advantages: The simplest approach to managing service lines. Customers would have the option to distribute their repair/replacement costs over 10 years by having their repair costs assessed to their property.

Disadvantages: Can place a financial burden on customers that need to repair/replace their water service line. Despite numerous "Who Owns What" communications, most customers don't realize they are responsible for service line costs.

Option 2: Modified Status Quo. No change to ownership, but ERMU implements a service line protection program to cover repair costs (3/24 cities).

Advantages: No change to City Ordinance/ERMU Water Rules. The implementation of a protection program provides a funding source for water service line repairs without impacting rates. Additionally, it can be crafted to control ERMU's liability while still easing the financial burden on customers. The fee would be implemented similar to the City's current franchise fee. It can also include an opt-out option if desired.

Disadvantage: Since it's a separate fee (not included in the water rates) some customers may see it as a lack of transparency.

Option 3: ERMU owns from main through Curb Stop for all properties (26/50 cities).

Advantages: Simple and consistent implementation that mirrors majority of the 50 cities surveyed. Offers protection to all customers, regardless of type, size, or location. The added risk associated with covering all properties could be further controlled by using a tiered structure based on service line size.

Disadvantages: Likely represents the most expensive option as it represents the greatest financial exposure. Rates would need to increase to cover the increased exposure. Since the increased costs would be recovered through increased rates, there is no opt out option.

Option 4: ERMU owns from main through Curb Stop for *residential* **properties only (3/50** cities).

Advantages: Offers protection to residential customers while avoiding the higher cost potential associated with commercial properties. The majority of residential properties have one-inch or smaller lines that connect to water mains located under low-volume residential roads. Commercial/industrial properties can have service lines that are considerably longer and larger that connect to water mains under higher-volume collector roads. Larger lines and connections under higher-volume roads can significantly increase repair costs.

Disadvantages: Smaller business owners, with line sizes similar to residential properties, may be upset over the lack of consistency with residential properties.

FINANCIAL:

Financial exposure will depend on what, if any, changes are made to our current policy. If ERMU takes on the added responsibility of funding service line repairs/replacement from the main through the curb stop valve, residential costs would increase by approximately \$2.20/month. Costs for commercial customers would increase by approximately \$5.10/month. Depending on the selected program, these amounts would be recovered through either a service fee or a rate increase. These amounts could decrease if additional risk-limiting measures are implemented. Calculating the final amounts would be part of our 2025 rate study, planned for the third quarter of 2025.

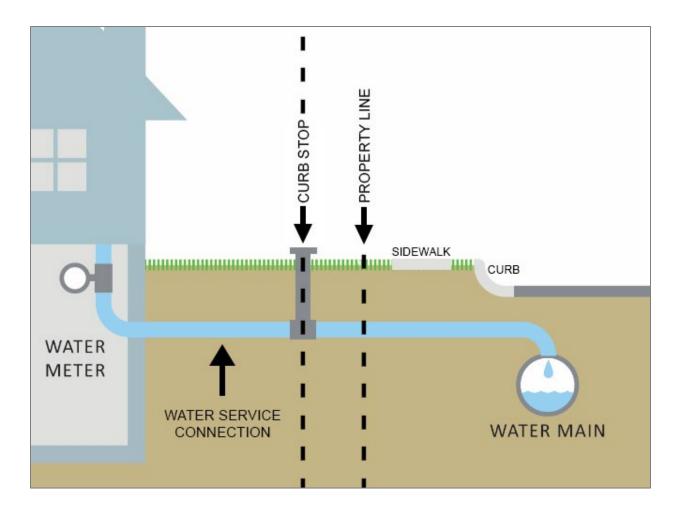

DISCUSSION QUESTIONS:

- 1) Does the Commission wish to socialize water service line repair costs?
 - If yes, is there a preference for implementing a service line repair program or revising the ordinance/water rules?
- 2) If the Commission desires to socialize repair costs, is there a desire to exclude commercial properties?
 - If yes, is there a preference to exclude all commercial properties, or only those commercial properties exceeding a certain service line size?
- 3) If the Commission desires to socialize repair costs, is there a desire to limit ERMU's risk by capping our exposure through additional limitations?
 - If yes, staff will present risk mitigation options at a future commission meeting.

2025-4 - 5.3a - Water Service Line Diagram

то:	FROM:					
ERMU Commission	Mark Hanson – General Manager					
MEETING DATE:	AGENDA ITEM NUMBER:					
February 11, 2024	5.4					
SUBJECT:						
Water Service Line Ownership						
ACTION REQUESTED:						
Discuss possible policy changes to ERMU's water service line ownership						

BACKGROUND:

At the December 2024 meeting, commission members directed staff to survey water service line ownership policies of various cities. Staff selected 50 cities and identified their respective ownership policies. Cities were selected based on a desire to get a diverse sample set while still including cities with similar attributes such as Minnesota Municipal Power Association membership, Minnesota Municipal Utilities Association membership, size, and regional proximity.

For ERMU's customers, property owners own and are responsible for their entire water service line, from the main to their home or business. Per city ordinance, the same is true for sanitary sewer service lines. The surveyed cities, however, described four different types of ownership for water service lines:

- The property owner owns the entire service line (current ERMU policy)
- The city owns the service line from the main through (including) the curb stop valve
- The city offers a protection program (repair fund) to assist owners with repair costs
- The city differentiates between residential and commercial properties

Water service line breaks are relatively rare but can be expensive. Such repairs typically cost anywhere from \$3,000 to \$30,000+ depending on the amount of restoration work needed. Water service line repairs often involve older homes/businesses with owners who may have limited resources, making it difficult for them to absorb these unexpected costs.

DISCUSSION:

Frequencies and Costs of Service Line Breaks:

Based on historical averages over the last eight years, ERMU experiences roughly two water service line breaks (leaks) per year. Most of the breaks occur at the curb stop valve. With roughly 5,650 total water customers, repairing two service line breaks per year at an assumed \$8000 repair cost would average out to an increase of \$0.25/month per account.

The bigger financial impact, however, is the need to replace service lines from the main through the curb stop when doing water main replacement projects. This is a common practice for utilities that own the service line through the curb stop valve because it minimizes the potential of having to cut into a freshly paved road to repair/replace a broken service line. These costs are estimated at \$3,000 per service line. On average, ERMU would replace approximately 45 service line connections per year as part of a water main replacement project, adding another \$2.00/month per account.

Differentiating the frequencies and costs described above by residential versus commercial accounts yields the following averages:

Break Repair	Residential	Commercial
Customer Accounts	5,100	550
Breaks per Year	2	0.33
Average Cost per Break	\$6,000	\$12,000
Average Cost/Month/Account	\$0.20	\$0.60

Curb Stop to Main Replacement	Residential	Commercial
Customer Accounts	5,100	550
Services per Year	40	5
Average Cost per Break	\$3,000	\$6,000
Average Cost/Month/Account	\$2.00	\$4.50

Totals	Residential	Commercial
Monthly Break Cost	\$0.20	\$0.50
Monthly Replacement Cost	\$2.00	\$3.80
Total Monthly Cost/Account	\$2.20	\$5.10

Possible Ownership Options:

Listed below are the typical options for ownership/responsibility of water service lines. The chart summarizes the surveyed data for each option. The advantages and disadvantages of each option are listed after the table.

- 1) Status Quo: The property owner owns the entire service line (24 cities/50 surveyed)
- 2) Modified Status Quo: No change to ownership, but ERMU implements a service line protection program to cover repair costs (3/24).
- 3) ERMU owns from the main through the Curb Stop for all properties (26/50)
- 4) ERMU owns from the main through the Curb Stop for <u>residential</u> properties only (3/50)

Option	Overall	Metro	MMPA	MMUA	Size	Regional
Main Only*	24/50	9/28	3/5	9/16	18/33	6/12
Protection Program	3/24	0/9	0/3	3/96	3/18	1/6
Through Curb Stop	26/50	19/28	2/5	7/16	15/33	6/12
Residential Only*	3/50	1/28	0/5	2/16	2/33	1/12

^{*}Includes those cities offering a protection program.

Option 1, Status Quo. The property owner owns the entire service line (24/50).

Advantages: The simplest approach to managing service lines. Customers would have the option to distribute their repair/replacement costs over 10 years by having their repair costs assessed to their property.

Disadvantages: Can place a financial burden on customers that need to repair/replace their water service line. Despite numerous "Who Owns What" communications, most customers don't realize they are responsible for service line costs.

Option 2: Modified Status Quo. No change to ownership, but ERMU implements a service line protection program to cover repair costs (3/24).

Advantages: No change to City Ordinance/ERMU Water Rules (the property owner will still own the entire service line). The implementation of a protection program provides a funding source for water service line repairs without impacting rates. Additionally, it can be crafted to control ERMU's liability while still easing the financial burden on customers. Whether to implement a cap to limit/share repair responsibility, whether to include the entire service line or just through the curb stop, and whether to limit eligible line size are all examples of how ERMU can control its financial exposure. It can also include an opt-out option if desired. Allows for the option to not include customers who are behind on their payments.

Disadvantage: Since it's a separate fee (not included in the water rates) some customers may see it as a lack of transparency. For comparison, Austin Utilities charges \$3.00/month for their water service fund program. Owatonna Public Utilities charges \$0.99/month for their service line protection program. Information on both programs is attached. Austin's water service fund covers service lines 100% up to two-inch and at 50% for service lines larger than two-inch. Owatonna limits their program to residential customers only.

Option 3: ERMU owns from main through Curb Stop for <u>all</u> properties (26/50).

Advantages: Simple and consistent implementation that mirrors most of the 50 cities surveyed. Offers protection to all customers, regardless of type, size, or location. The added risk associated with covering all properties could be further controlled by using a tiered structure based on service line size.

Disadvantages: Likely represents the most expensive option as it represents the greatest financial exposure. Rates would need to increase to cover the increased exposure. Since the increased costs would be recovered through increased rates, there is no opt out option.

Option 4: ERMU owns from main through Curb Stop for residential properties only (3/50).

Advantages: Offers protection to residential customers while avoiding the higher cost potential associated with commercial properties. The majority of residential properties have one-inch or smaller lines that connect to water mains located under low-volume residential roads. Commercial/industrial properties can have service lines that are considerably longer and larger that connect to water mains under higher-volume collector roads. Larger lines and connections under higher-volume roads can significantly increase repair costs.

Disadvantages: Smaller business owners, with line sizes similar to residential properties, may be upset over the lack of consistency with residential properties.

FINANCIAL:

Financial exposure will depend on what, if any, changes are made to our current policy. If ERMU takes on the added responsibility of funding service line repairs/replacement from the main through the curb stop valve, residential costs would increase by approximately \$2.20/month. Costs for commercial customers would increase by approximately \$5.00/month. Depending on the selected program, these amounts would be recovered through either a service fee or a rate increase. Calculating the final amounts would be part of our 2025 rate study, planned for the third quarter of 2025.

Note: The amounts presented are estimates only, they are not intended to cap our expenses. If we adopt a plan that increases our financial responsibility, we will have to treat all eligible customers the same, even if the total annual costs exceed our budget estimates.

NEXT STEPS:

Staff requires commission direction on which, if any, policy changes they would like to pursue for approval at a future commission meeting.

TO:	FROM:						
ERMU Commission	Mike Tietz – Technical Services Superintendent						
MEETING DATE:	AGENDA ITEM NUMBER:						
April 8, 2025	5.4						
SUBJECT:	SUBJECT:						
Advanced Metering Infrastructure Update							
ACTION REQUESTED:							
None							

DISCUSSION:

As of April 3, Allegiant has completed 4,054 residential water meter replacements and 523 retrofits. Allegiant has pulled their staff from the residential part of the project due to intermittent appointments. Existing scheduled appointments will be completed by an Allegiant technician who is still working on the commercial project. ERMU staff will be scheduling and completing the remaining residential meter exchanges as time allows. The residential water meter exchange work is approximately 92% complete.

To date we have made 86 residential repairs utilizing master plumber Karsten Nelson (Archer Plumbing) with a running total of \$30,610.36 in repair costs. In April 2024, the Commission voted to absorb these residential costs at an estimate of \$300 per job for approximately 100-150 homes, totaling between \$30-\$45K.

Allegiant's commercial meter subcontractor (Archer Plumbing) has completed 244 commercial meter replacements and 31 retrofits as of April 3. The commercial water meter exchange work is about 45% complete.

As of April 3, Allegiant has completed 9,547 residential electric meter replacements. Allegiant has removed staffing from the residential part of the project due to a lack of available meters which stems from a supply chain issue with our supplier. ERMU staff will complete these meter replacements once meters become available. The residential electric meter exchange work is about 78% completed.

We are still waiting for the delivery of our commercial electric meters for the project. ERMU staff will be utilized for all commercial electric meter installations and will be testing current transformers/potential transformers during each visit to verify equipment is working correctly and accurately. We are still waiting for the remainder of our residential meters, 3S, 4S & 2S-320A, which are expected in Q2 of 2025.

Overall, approximately 85% of the total available AMI meters have been installed.

- Glencoe Light and Power has expressed interest in the two external fuel tanks at the power plant. They plan on visiting the site in the next couple of weeks to inspect the tanks and make a final determination. I will update the Commission as more details are known.
- I have registered for the American Public Power Association's Spring Education Institute in Orlando, Florida, May 5-9, 2025. I will be attending courses on Cost of Service and Rate Design to prepare for our cost of service study this fall with Dave Berg Consulting.
- The Minnesota Municipal Power Agency (MMPA) Board of Directors met March 25, 2025, at Chaska City Hall in Chaska, Minnesota and via videoconference. Commissioner Stewart and I attended. The public summary follows:
 - The Board reviewed the Agency's financial/operating performance for February 2025.
 - Participation in the residential Clean Energy Choice program increased by 57 customers. Customer penetration for the program is 6.1%.
 - The Board discussed the status of renewable projects the Agency is pursuing.

- Office walk-in traffic for March consisted of 123 customers, averaging 31 customers per week over the four-week period.
- ERMU disconnections for March: The Cold Weather Rule is in effect, meaning customers cannot be disconnected until 30 days after they receive their disconnection notice. The cold weather rule ends at the end of April.
 - Cycle 1 12 disconnections.
 - Cycle 2 6 disconnections.
 - Cycle 3 9 disconnections.
- During the month of March 2025, the customer service team entered 38 payment arrangements with customers. During March 2024 there were 34 payment arrangements.
- A significant amount of staff time is dedicated to the Advanced Metering Infrastructure (AMI) project, including daily follow-ups with customers and coordination with both internal and external teams.
- Customer service staff has started making outbound calls to schedule water meter replacements for customers with ERMU's water department. At the moment, we are scheduling ten appointments per week with plans to increase this number as the water department gains additional resources.
- As the AMI project transitions in-house, I want to take a moment to recognize Michelle Venema, our billing specialist, for her exceptional efforts during Allegiant's involvement in the project. Michelle carefully reviewed the daily meter exchange files to ensure the accuracy of customer billing statements. This was no small task and required significant attention to detail and organization to meet our billing deadlines.
- The IT team has been collaborating with the city's IT staff in preparation for the upcoming Information Security Committee Tabletop Exercise. This interactive exercise will serve as a valuable opportunity to assess and strengthen our defense strategies.
- Currently there are ten active residential solar photovoltaic projects planned or under construction in the ERMU service territory.

•	In the last 30 days, combined the level two chargers located downtown and in the parking lot in front of ERMU had 32 sessions and provided customers with 383 kWh of green energy.
•	Over the past month, the credit and collections specialist and administrations director met with our current collection agency, as well as three others, to ensure we're getting the right level of service while keeping our collection fees competitive.

- I want to express my gratitude to the accounting department for their dedication and pride in their work every day. Their commitment to excellence plays a key role in ensuring a smooth and efficient audit process.
- The annual MISO (Midwest Independent System Operator) Attachment O reporting has been completed and approved. It is used to determine the transmission rebates we will receive as being a part owner of transmission systems.
- The Energy Information Administration 112 survey has been filed. This is a new mandatory report that collects data from electric and natural gas providers on final termination notices, service disconnects, and reconnects for bill non-payment for residential customers.
- Annual surveys/reports continue to be completed.
- Staff is working on Property & Casualty Insurance renewal application for 2025-2026.

- The bill inserts for April 2025 are a new approach to the Clean Energy Choice certificates that had been sent out to individuals participating in the program in years past. This year we are aggregating the data (for residential and commercial programs respectively) and providing it to all customers. This also provides an opportunity to promote the program for those who may be interested in participating.
- In addition to the bill insert topic, social media posts this month feature the commission meeting notice, National Safe Digging Month, Severe Weather Awareness Week, AC Tune Up Rebates, Lineworker Appreciation Day, irrigation controller rebates, and more.
- On April 2, members of the State Records Retention Task Force met to discuss proposed updates to the General Records Retention Schedule for Minnesota Cities. Tony presented findings on the application of public safety records retention and state statute's impact on the schedule. The group will meet again in May to discuss further and ultimately submit proposals to the state records review board.
- Tony attended the Municipal Clerk & Financial Officers Association of Minnesota's annual conference March 19-21, in Brooklyn Center. This year offered great sessions on emergency management planning, data requests/records management, AI, and apprentice programs. Thanks to the Commission for these continuing opportunities to advance industry knowledge and skills, staff looks forward to applying them!
- The communications team is happy to report that 11 scholarship applications were received this year using ERMU's new scholarship form! ERMU's new scholarship program will award up to two students with a \$1,000 post-secondary education scholarship. The goal of the program is to provide financial assistance for those who plan to further their education towards a career in water, electric, or conservation fields. The scholarship committee will review the applications and select the winner(s) by May 1.
- Elk River Municipal Utilities, in partnership with the Minnesota Municipal Utilities Association, is offering a FREE OSHA-approved training on Chemical Hazards and Hazard

Communication on Tuesday, April 29. Registration is now open! If anyone you know might be interested in this FREE opportunity, please share the details listed below.

- Session 1 | 60-minute main session: Learn the basics of working safely with hazardous chemicals and how to protect yourself from chemical hazards.
- Session 2 | Advanced train-the-trainer session (optional): Designed for business owners and supervisors to understand their responsibilities and meet OSHA expectations.
- Location: Elk River Municipal Utilities Field Services Building 1435 Main Street, Elk River, MN
- o Date/Time: Tuesday, April 29
- Session 1 (main session for all): 9:00 a.m. 10:00 a.m.
- Session 2 (optional advanced session for business owners/supervisors): 10:15
 a.m. − 11:15 a.m.
- o Click here to register or contact jfoss@ermumn.com for more information.

CLEAN ENERGY CERTIFICATE

This certificate recognizes the households in ERMU's service territory that participated in the Clean Energy Choice program, collectively using 4,175,903 kWh of renewable energy in 2024.

Their combined reduction of emissions is equivalent to:

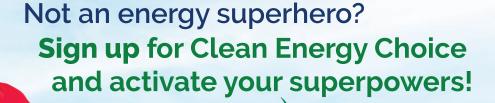

Driving 9,123,990 miles in a gas-powered vehicle

Electricity use in 656 homes for one year

Charging 226,822,353 smartphones

Elk River Municipal Utilities

CLEAN ENERGY CERTIFICATE

This certificate recognizes the businesses in ERMU's service territory that participated in the Clean Energy Choice program, collectively using 10,751,968 kWh of renewable energy in 2024.

Their combined reduction of emissions is equivalent to:

Driving 23,492,127 miles in a gas-powered vehicle

Electricity use in 1,690 homes for one year

Charging 584,014,207 smartphones

- Staff is working through the second round of maps for the new GIS mapping system that we plan to move forward with in the future. Maps 1 through 60 are complete.
- The dehydration of the existing Cooper/Eaton switchgear is going well.
- Staff is still dealing with the lack of communication and action taken on the reclosers that were recalled. We are waiting for all 30 of our units to be repaired at this time.
- ERMU received its new Vac-Tron and trailer the week of March 24.
- We are working on lining up projects for 2025 construction season.

- Installed 13 new residential services, which involves the connection of a secondary line once the customer requests service.
- Joe Schmidt, Safety Instructor from Minnesota Municipal Utilities Association, held a safety meeting on excavating and trenching and confined space hazard awareness on March 26.
- The City's Fleet Maintenance Division is wrapping up our truck and trailer DOT inspections for the year.
- Continue to dehydrate oil in our switchgear to reduce moisture. We have completed over 20 and will continue with this process through April.
- Crews are performing equipment checks and thermal imaging of equipment out on our system.
- GRE completed their maintenance and we switched the Waco substation online on March 14.
- Crews installed the third transformer at Jonny Pops. The weather cooperated allowing the bore crew to make short work installing the primary to the site. With the nice spring, they will be starting soon on spring construction projects.
- Carr's Tree Service finished tree trimming with us on March 20. Road restrictions started early making it harder for them to get around. Our crews will continue to trim into April.
- Inventory/procurement has taken delivery of our underground wire order for the year.
- I attended the American Public Power Association Rodeo and Engineering and Operations Conference in Sacramento March 28-April 2.

- In March, the locators processed 212 locate tickets. These consisted of 174 normal tickets, 1 emergency ticket, 18 updated tickets, 10 meets, 3 planning, 2 boundary surveys, and 4 cancellations. This resulted in a 91.0% increase in tickets from the previous month and a 12.8% decrease from the prior March.
- Staff has completed review of GPS equipment and has decided to purchase two Trimble R580 units. These will be used during the construction of our underground facilities to aid in mapping and help meet the new locating laws that go into effect in 2026. The locators are currently demo-ing the Radio Detection GPS locator. We expect to have a decision on the GPS locator soon.
- Electrical technicians completed 213 service order tasks, updated the power bill, addressed customer meter issues and any off-peak concerns.
- The Advanced Metering Infrastructure (AMI) residential water meters and residential
 electric meters continue to be installed in new services. The electrical technicians have
 been busy changing out the current Automated Meter Reading meters to AMI meters
 for off-peak around the system. Approximately 5,179 water meters and 11,675 electric
 meters are currently active within our AMI system.
- Staff have successfully completed oil replacement/dehydration on 25 switchgears so far
 utilizing the trailer-mounted oil collection system. Contaminated oil is reconditioned
 overnight and then used in another switchgear the next day. The testing of oil in
 completed units shows the moisture levels returning to acceptable levels. We extended
 the timeframe on this project to recondition the oil on as many switchgear as possible
 by the end of April.
- Our monthly peak was 41.80 MW on March 8, at 7:02 p.m.

- Delivered a water meter, installed a Smart Point module, and took curb stop ties for 10 new water services
- Completed 20 BACTI/Total Chlorine Residual Samples
 - All confirmed negative for Coliform Bacteria
 - o Bacteriological/Disinfectant Residual Monthly Report submitted to the MDH
- Completed 21 routine fluoride samples
 - All samples met MDH standards
 - Submitted MDH Fluoride Report
- Submitted the Discharge Monitoring Report for the diesel generation plant to the Minnesota Pollution Control Agency.
- Completed and submitted the 2024 Water Conservation Report to the DNR.
- Staff applied to the Minnesota Department of Health for the Service Line Inventory
 Technical Assistance program. This program is intended to aid Community Public Water
 Supplies in achieving compliance with the Environmental Protection Agency's Lead and
 Copper Rule Revisions and Lead and Copper Rule Improvements. The purpose of this
 round of technical assistance is to determine the material type for any remaining
 unknowns reported on our initial service line inventory using records review and/or inhome visual inspection.
- The water operators have had an increased workload due to additional water meter exchanges with Allegiant scaling back appointments, nearing the end of their contract with us.
- Our annual water treatment plant preventative maintenance is complete. Water staff
 have done an outstanding job ensuring that the wells and filters are ready for the
 summer months. The annual preventive maintenance includes recharging and cleaning
 filters, replacing chemical lines, changing compressor oil, changing pump motor oil for
 the wells, and painting. One key aspect of our maintenance process is the staff's use of
 their experience to anticipate potential problems that may arise during the summer. To
 prevent these issues, they proactively replace items known to have a higher likelihood
 of failure.

- New chlorine gas alarm system equipment has been installed in the water treatment plants to replace the aging equipment. The upgraded gas detection equipment is designed to continuously monitor and detect gas leaks before they lead to harmful conditions, ensuring the safety of our personnel and the facility.
- Derek Lutter has accepted the new water operator position within our growing water department. This additional role was created to address the expanding needs of our municipal water system and ensure that we continue to provide excellent service to our community. He brings a wealth of experience and qualifications to the position. He begins working with ERMU on April 8.
- We will begin flushing hydrants the week of April 14. Customers will be notified and a
 map with the zones and dates for flushing will be made public. Flushing is expected to
 take approximately 6 weeks. We are increasing the amount of time scheduled for
 flushing due to the number of fire hydrants now in the distribution system.
