

COVID - 19

Dipping Dynamics is deemed an essential service provider in the field of animal health throughout Australia, and is registered as such with the COVID Authority to continue to operate under COVID restrictions.

We are therefore permitted to continue to service our clients with the sheep dipping service upon request.

Our dip operators are however required to be tested as per the current guidelines prior to crossing any state borders to provide the service.

You can assist us in ensuring that we can reach you in a timely fashion by giving us at least two weeks' notice for the date you would like to commence your sheep dipping.

Dipping Dynamics also has a registered COVID Risk Mitigation Plan which is carried by each operator in their truck to assist with the process of keeping everyone safe in the event of an identified risk situation.

We ask that you please abide by whatever current COVID restrictions apply in your State or LGA region while we are on your property to ensure the safety of all people involved in the dipping process.

We are committed to providing the best possible treatment for your livestock and, as always, are determined to conduct our business in the most efficient and professional manner possible during these testing times.

We look forward to seeing you again this dipping season.
