

REMOTE ENERGY & REFRIGERATION

Creating Sustainable Enterprises for Remote
Communities

PRESENTATION OUTLINE

POINTS FOR DISCUSSION

About the Company

Background

Problem

Solution

Costs and Benefits

Black Stump Technologies' purpose is to empower individuals, communities and the organisations that support and protect them in times of their greatest need and for the longer term. Our solar-powered refrigeration and energy technologies specifically developed for remote areas enable us to provide rapidly deployable solutions to the issues of clean water, food, sanitation, medical storage, cold-supply-chain and energy.

BACKGROUND

REMOTE KANGAROO HARVESTING

- Increased kangaroo populations causing environmental and economic damage.
- State Government issued quotas for kangaroo culling not being met.
- Kangaroo is one of the most sustainable, lean and delicious meats that Australia produces.
- Kangaroo is 100% natural lean meat that is sustainably and ethically sourced from the open ranges of Australia.
- Remote Indigenous Australian communities have access to land with large kangaroo stocks and hunting knowledge.

PROBLEM

GOVERNMENT QUOTAS

Not being reached.

INDIGENOUS COMMUNITIES

No current off-grid business case for Indigenous communities to harvest sustainable meat.

COLD CHAIN

Carcass needs to be chilled after hunting to meet food safety requirements.

Remote communities lack access to electricity and chillers.

SOLUTION

BLACK STUMP

Redeployable, Energy Independent Cooling & Freezing

100% Solar Powered	Transportable World Wide
No Operating Costs	No Fuel Logistics or Storage
Low Maintenance	No Special Training or Equipment
24 Hour Operation	Non-Polluting & Quiet
Under 10 minutes from Delivery to Operation	

CREATING A SUSTAINABLE BUSINESS

Using Black Stump's Solar Kanga Cooler and business plan to create a sustainable off-grid business for Indigenous communities living on Country that have access to large kangaroo stocks.

SOLUTION
