

IXL Math Summer Work – 5th Grade. All 5th-grade students are required to complete summer work on IXL Math, an online program that helps students practice skills independently with built-in explanations and support. It also allows teachers to track progress and plan instruction for the new school year.

Logging in: Students will select **6th grade** when signing in. Skill sets will be posted in Google Classroom. Students should complete each assigned skill to **90% mastery** and date their work as they go.

Important: Skill numbers in IXL may change. Always use the **skill title** (not just the number) to find and complete the correct assignments.

Sixth Grade Skills Required to be completed.

Section	Description of Skill	Date Completed	Score
C	Divide whole numbers with 2-digit divisors.		
F	Prime or Composite		
F	Identify Factors		
H	Add and Subtract Decimal Numbers; word problems.		
I	Multiply Decimals		
I	Division with decimal divisors		
I	Multiply and divide decimal word problems.		
J	Add, subtract, multiply, or divide two decimals.		
K	Add and subtract fractions with unlike denominators.		
K	Add and Subtract Mixed Numbers		
L	Multiplying two fractions		
L	Multiplying Mixed Numbers		
M	Divide Fractions and Mixed Numbers		
N	Add, subtract, multiply, or divide two fractions		
R	Graph points on a coordinate plane.		
W	Convert and compare metric units.		
HH	The volume of cubes and rectangular prisms
