## AI-Powered Menu management

Students: Nguyen Tuong Khang | Hoang Dinh Tri | Ngo Lam Bao Trung  
Vo Nguyen Kien | Tran Thanh Tung

Supervisors: Dr. Nguyen Hoang Minh | Mr. Nguyen Manh  
Ms. Nguyen Hoa | Mr. Nguyen Hau

### Objective

90% Accuracy

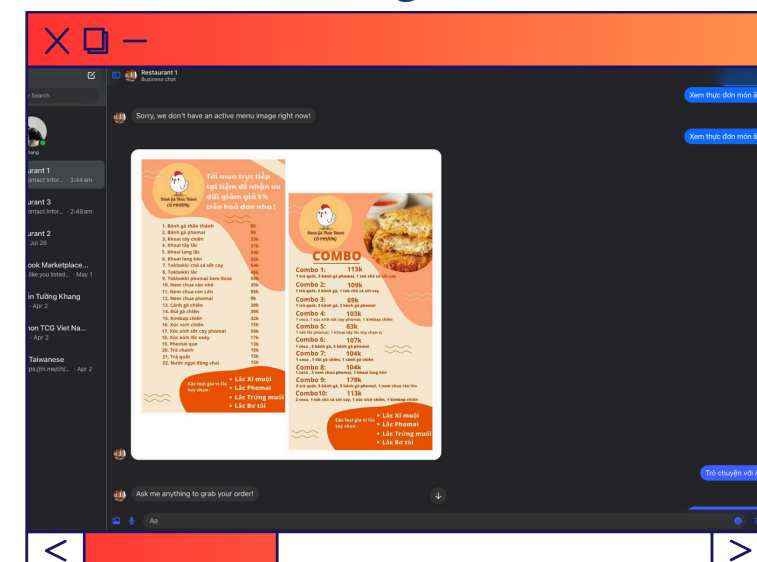

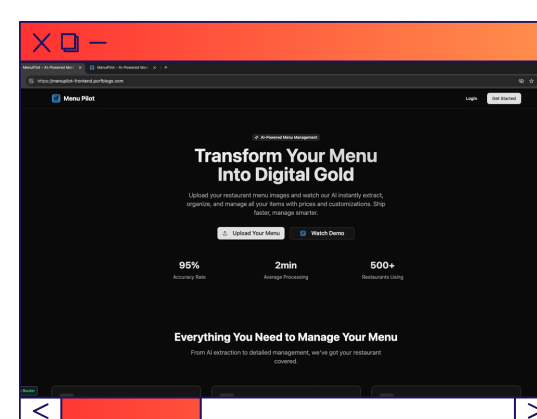

Average 2 mins processing

### Background and Motivation

The MenuPilot project was created to address operational inefficiencies from manual menu updates. The motivation shifted after realizing the digitized data's true business value is in generating revenue. The project now provides a comprehensive solution connecting back-office efficiency with a customer-facing sales tool, aiming to reduce overhead and actively drive business growth.

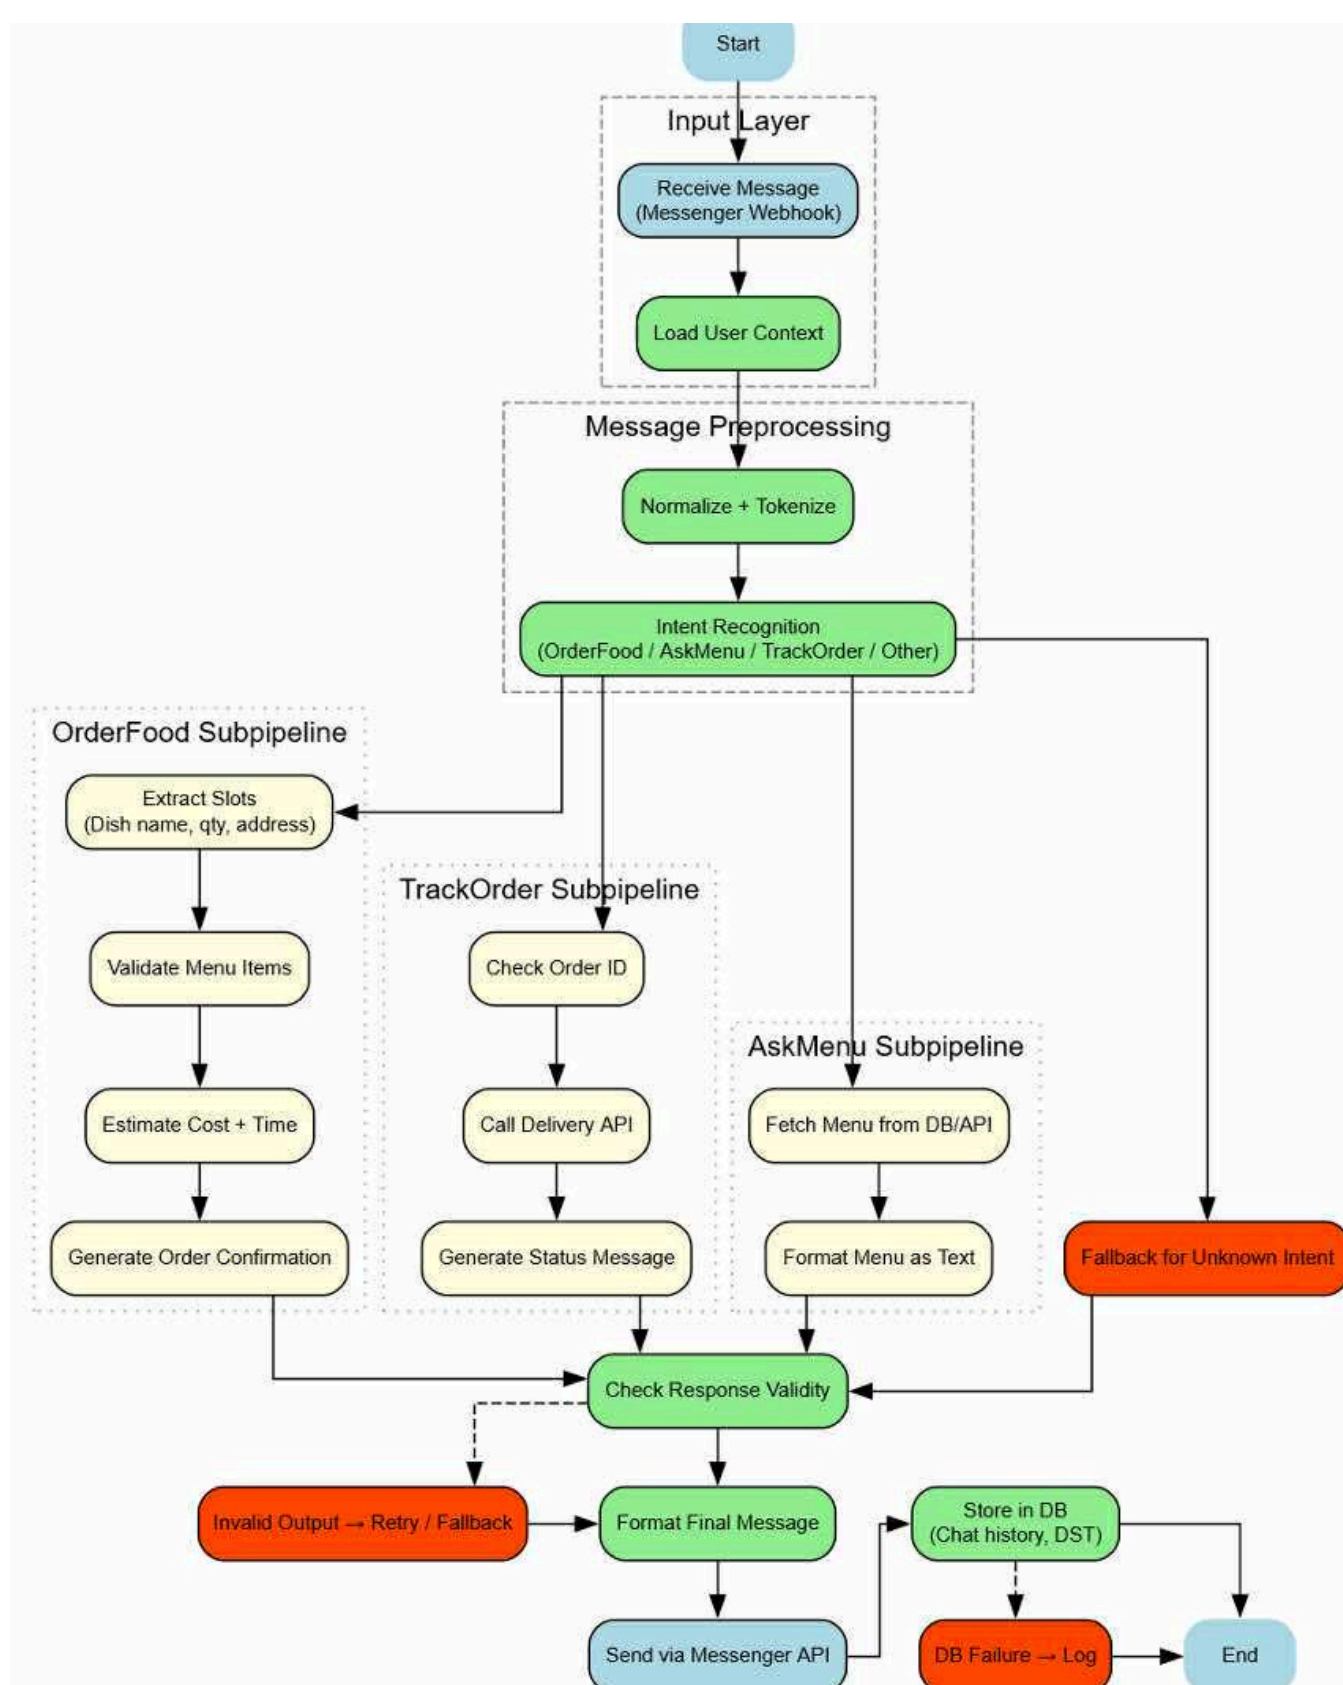

### Demo and features

- Automate menu uploading and management process
- Improve interaction and control over images

- Chat bot ordering food via Messenger
