

# SOCRATESCODE

Inspired by the great philosopher, it doesn't just solve programming problems for you, it guides you through them with smart, question-driven learning. The result? Knowledge that sticks, skills that grow, and thinking that lasts.

## Motivations

### Lack of self-learning support

Educator can be slow in responding student inquiry and has limited availability outside office hour.

### Self-learning is hard

It can be hard for student to find the appropriate learning material in the vast information available on the Internet, or to learn from AI properly when it can be used for easily solving programming problem.

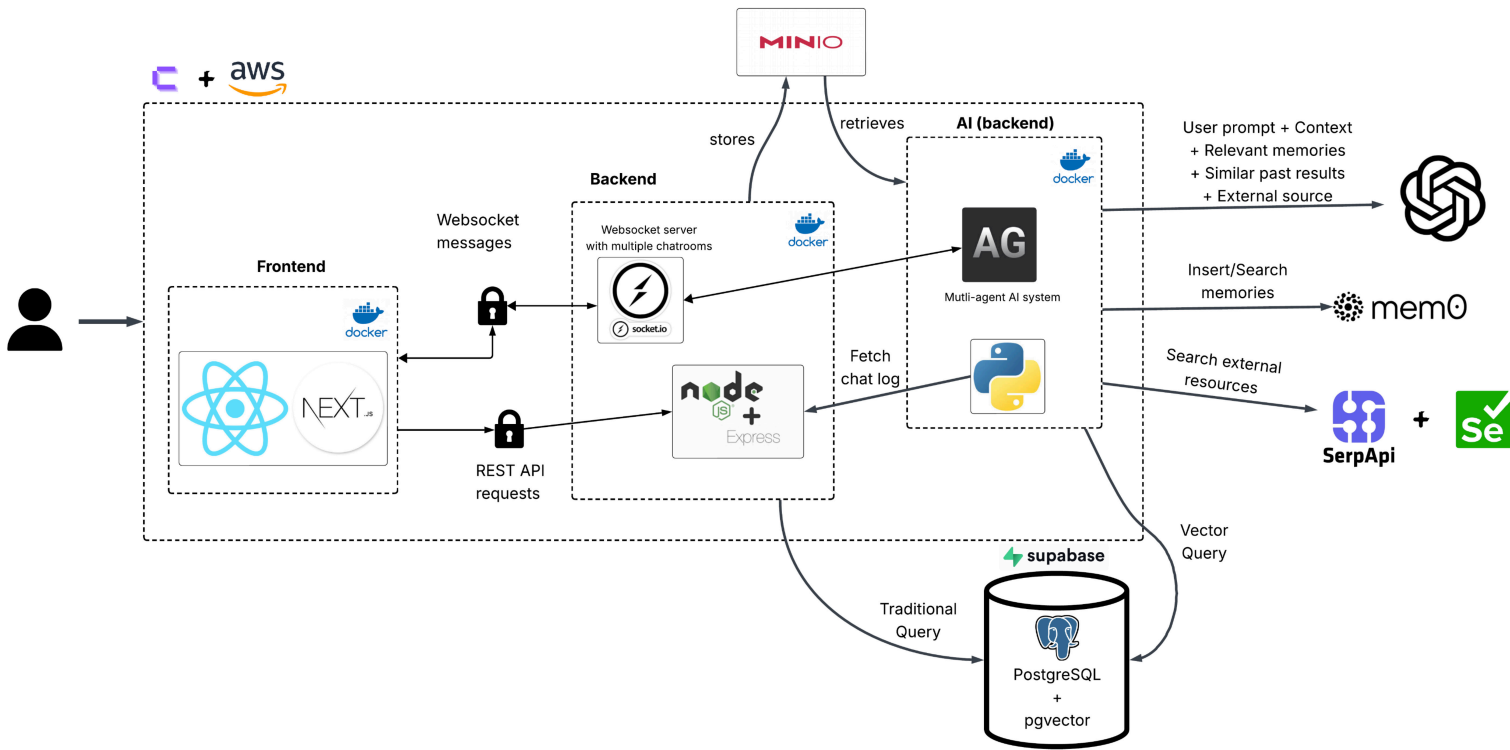

## Challenges

Provide an interactive Q&A experience that encourages deeper reasoning.

Help learner overcome the challenge of shallow understanding and lack of critical thinking.

Implement performance evaluation tools to measure response quality, student engagement, and learning outcomes

## Architecture

# FEATURES

## PERSONALIZED LEARNING

Set and forget. Get personalized learning experience with minimal configuration.

## SOCRATIC DIALOGUE

We ask question, not giving direct answer, so that student can think and learn from it

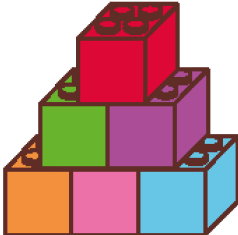

## PROGRAMMING FOCUSED

Developed for learning and solving programming purpose, ensuring only relevant response are delivered to you.

## STEP-BY-STEP LEARNING

Your programming problem is broke down and stack on top of each other as you make progress on tackling your problem.

## INTUITIVE INTERFACE

Switching from other chat apps is effortless, with a familiar experience and minimal overhead - just as simple as using your favorite chat application.
